PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

19/33

Other shipping software it is graded above

ShipRush's GPA of 2.4 is higher than 19 of the 33 other shipping software we grade, and level with 7.

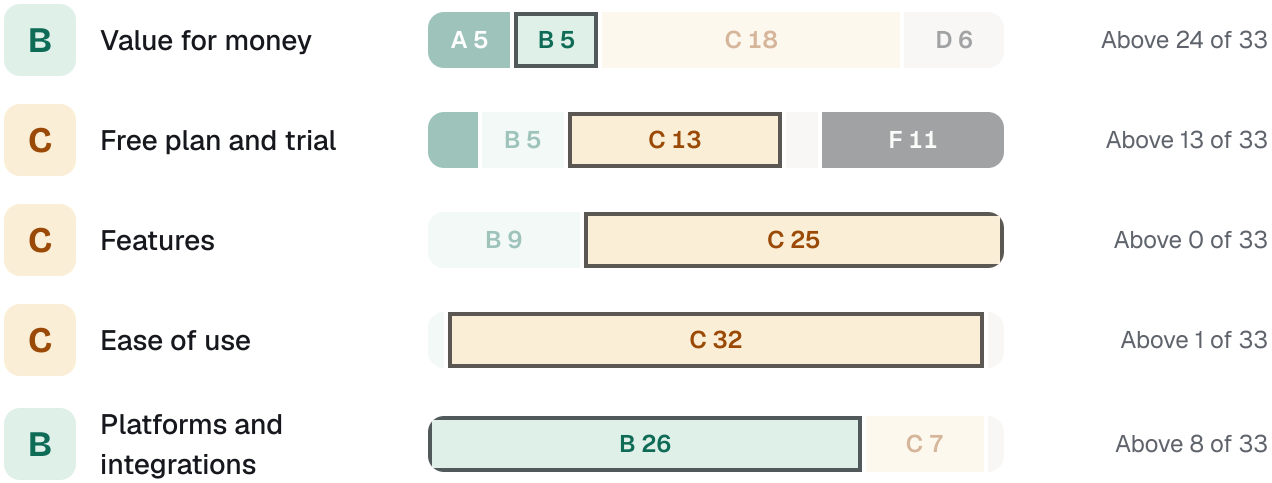

It stands best on value for money (B, above 24 of 33) and worst on features (C, above 0).

Its paid plans start at $9.95 a month, against a middle price of $21.50 for the category: 2 of the 19 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

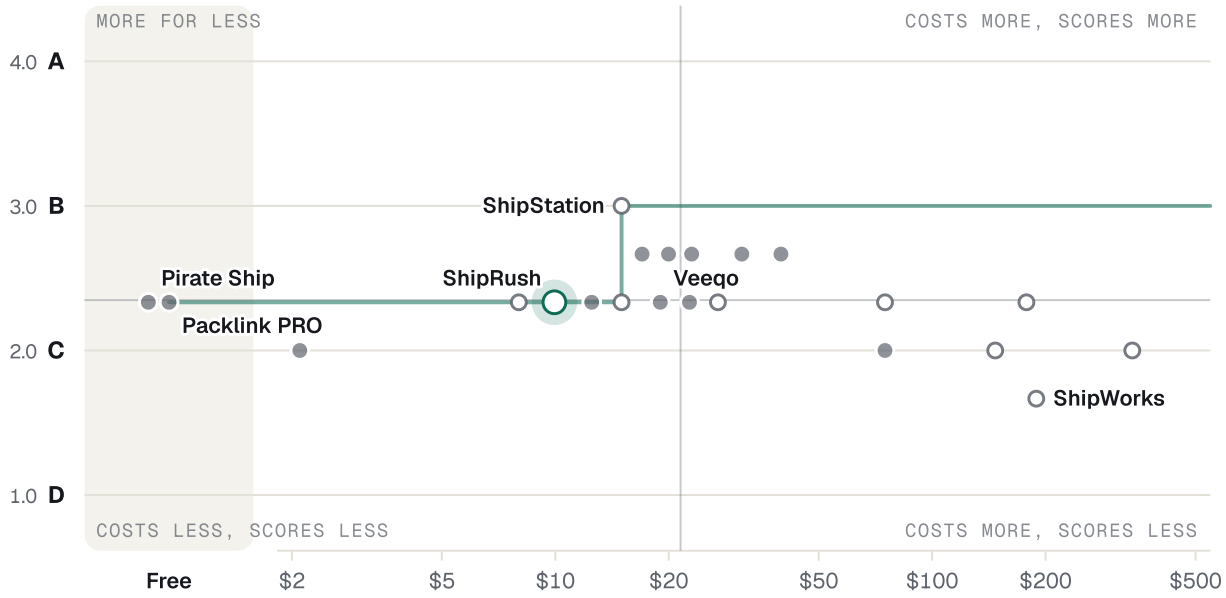

Each grade against the category

Every bar is all 34 shipping software we grade, cut by the letter each got. ShipRush's own letter is outlined.

Price against what you get

Each dot is one of 22 shipping software. Further left costs less; higher up scores better on features, ease of use and platforms. ShipRush is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace ShipRush you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

It costs $119.40 a year.

What you could not

- ✕ Discounted carrier rates and labels, which take an agreement with each carrier.
- ✕ Connections to other products, each kept working as those products change.

- ✕ Scanning barcodes with a phone camera or a scanner.

What this rests on. ShipRush's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
