Who ShipTime is for

- ✓ Fits if you ship parcels from Canada and want to compare couriers
- ✓ Works for Shopify stores wanting rates at checkout

Who it is not for

- ✗ Skip it if you want a price list, as costs show only inside an account
- ✗ Watch out: the Shopify app is free to install but additional charges may apply, in USD
- ✗ Watch out: the vendor's site blocks automated reads, so this rests on its help center and Shopify listing
- ✗ Tight if you want a phone app, as none is listed

Good to know

Good for

- ✓ Canadian small businesses that want no monthly fee
- ✓ Shopify and WooCommerce sellers wanting checkout rates
- ✓ Shippers who need parcels and freight in one account

Worth knowing

- ⓘ No fixed price list could be read: costs depend on the courier, weight and route quoted inside an account.
- ⓘ The vendor's own site sits behind a bot check, so this entry rests on its help center and Shopify App Store listing.
- ⓘ The Shopify app is free to install but the listing says additional charges may apply, billed in USD.

Where it stands

Its grades against its category, and whether to keep it or make your own

62/80

Other shipping software it is graded above

ShipTime's GPA of 2.6 is higher than 62 of the 80 other shipping software we grade, and level with 6.

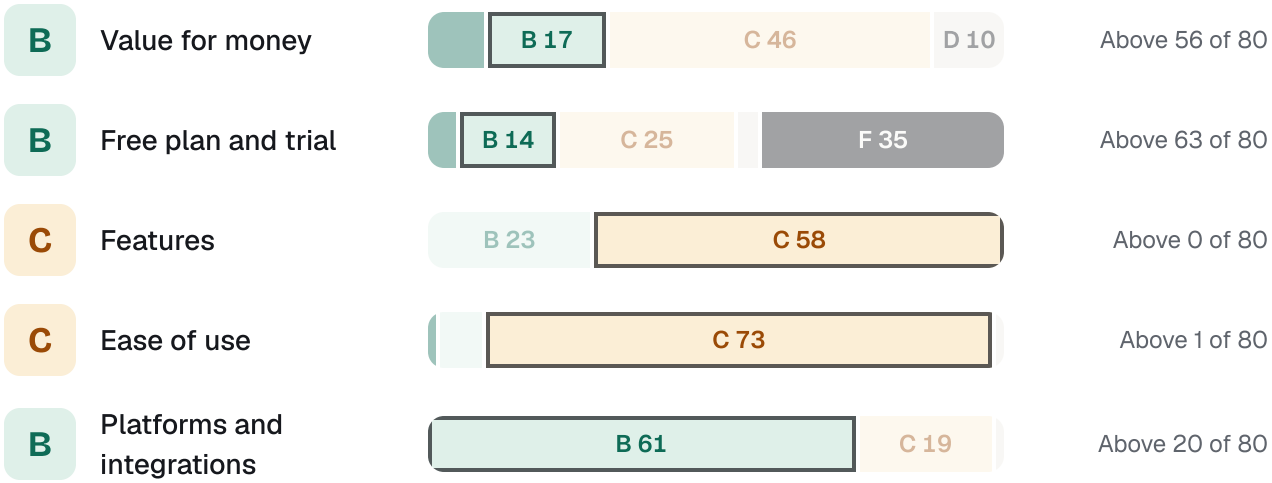

It stands best on free plan and trial (B, above 63 of 80) and worst on features (C, above 0).

ShipTime has no paid plan.

On features, ease of use and platforms it scores 2.3 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

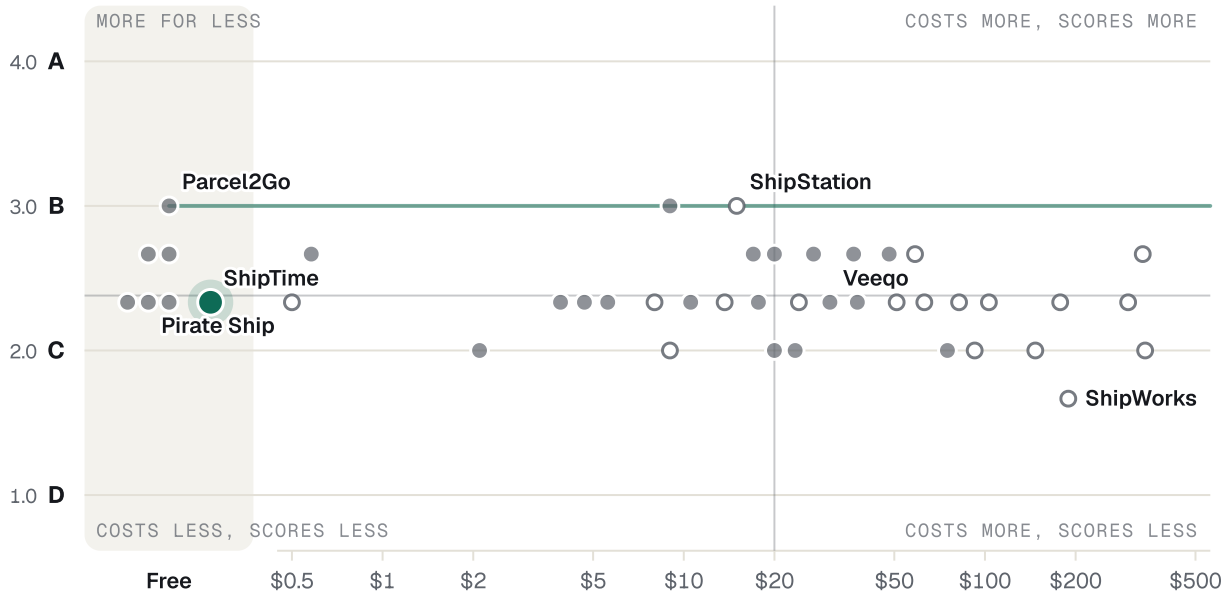

Each grade against the category

Every bar is all 81 shipping software we grade, cut by the letter each got. ShipTime's own letter is outlined.

Price against what you get

Each dot is one of 43 shipping software. Further left costs less; higher up scores better on features, ease of use and platforms. ShipTime is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

ShipTime is free, so making your own would save you nothing.

And it is not the kind of software a weekend replaces. It is one of the better ones too: its GPA of 2.6 is higher than 62 of the 80 other shipping software we grade.

What you could make

- Reports: an app builder makes this well.

What you could not

- Discounted carrier rates and labels, which take an agreement with each carrier.

- Connections to other products, each kept working as those products change.

What this rests on. ShipTime's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
