GPA, above 38 of the 78 other e-signature and proposal tools we grade

Sign.com, made by Smallpdf, lets people upload a document, add signature fields and send it to one or more signers, or sign a PDF themselves. A free plan allows two documents a month, and paid plans lift the limits on documents, signees and templates. The vendor says signatures meet eIDAS and the ESIGN Act.

To get you started, here are **9 things to know about Sign.com**, taken from its own pages and our grades.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

38/78

Other e-signature and proposal tools it is graded above

Sign.com's GPA of 2.2 is higher than 38 of the 78 other e-signature and proposal tools we grade, and level with 19.

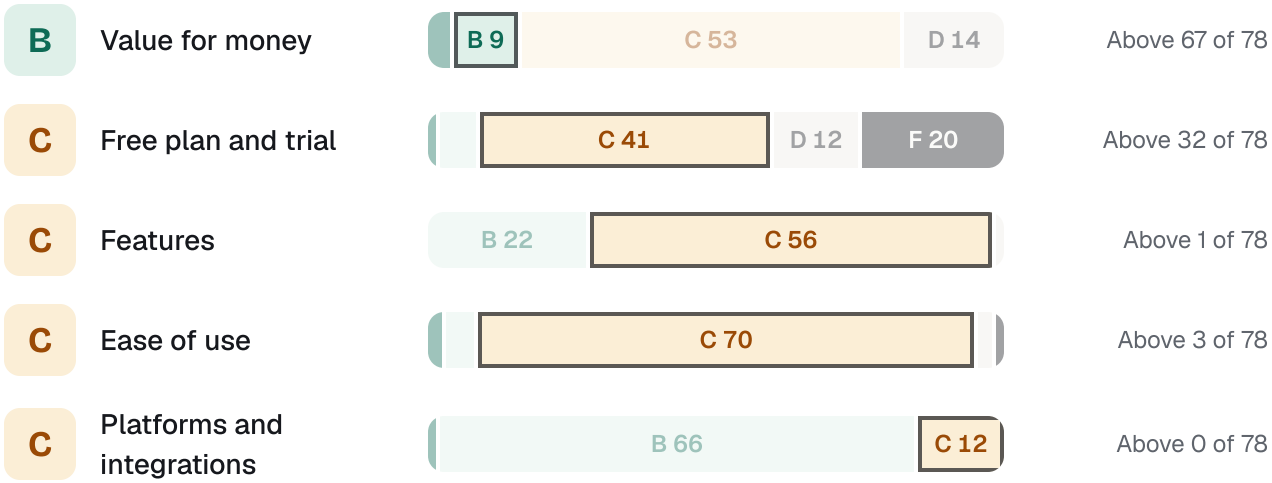

It stands best on value for money (B, above 67 of 78) and worst on platforms and integrations (C, above 0).

Its paid plans start at $7 a month, against a middle price of $19 for the category: 3 of the 54 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 1 tool scores higher and costs less.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

You could make this

What Sign.com does at its core is documents and templates, and that is the kind of thing an AI app builder makes well.

You would give up one thing, listed below, and little else. It costs $84 a year. An AI app builder starts at about $20 a month on our listings, and you only need it while you build.

What you could make

- Documents and templates: an app builder makes these well.

What you could not

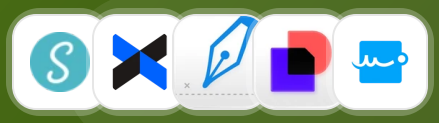

- ✕ Sharing with other people, which means accounts and invitations.

It runs in a browser, which is where something home-made would run too.

What this rests on. Sign.com's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
