07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Signicat's own pages, its app-store listings and our grades. Every fact in it is on Signicat's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 19 of the 78 other e-signature and proposal tools we grade

Signicat is a European digital identity provider whose electronic signing products cover simple, advanced and qualified signatures under eIDAS. Companies can embed signing into their own systems through an API or use the Dokobit-branded self-service portal. Signatures are tied to eID methods such as BankID, MitID and Smart-ID.

To get you started, here are **7 things to know about Signicat**, taken from its own pages and our grades.

> **No prices are published, the API suits developers more than occasional signers, and detailed rates sit behind an account.**
>
> From our report card of Signicat

1 **Best for developers embedding signing in a digital identity stack**

Signicat is a digital identity platform with an e-signature API that covers all three eIDAS signature levels.

2 **It runs on Web**

Web.

3 **Embedded signing API**

A Sign API lets a company add signing to its own applications, such as customer portals, document systems or chat interfaces.

4 **All three eIDAS signature levels**

Supports simple, advanced and qualified electronic signatures, with the identity methods and certificate types listed for each level.

5 **eID-based signer identity**

Signers can use methods such as Norwegian and Swedish BankID, MitID, Smart-ID, itsme and Freja eID, plus SMS or email one-time codes.

6 **A 2.0 GPA, above 19 of 78**

That is against the other e-signature and proposal tools we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Signicat you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for developers embedding signing in a digital identity stack

Signicat is a digital identity platform with an e-signature API that covers all three eIDAS signature levels. No prices are published, the API suits developers more than occasional signers, and detailed rates sit behind an account.

TOOLGPA REPORT CARD

Signicat

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No prices are published; fees combine setup, subscription and transaction charges quoted through a form.
Free plan and trial	F	No free plan or trial on record; per-method prices sit behind a free dashboard account.
Features	B	Signing API at all three eIDAS levels with eID-based signer identity, forwarding and evidence management. The listing shows no gap in the core work.
Ease of use	C	No store rating on record. It is an API, so someone has to build the integration.
Platforms and integrations	B	Web and an API, with Salesforce, Okta, ForgeRock, Curity and Cryptshare connections.

Grade point average — Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Signicat is for

- ✓ Fits if you are building signing into your own product and need eIDAS levels
- ✓ Works for firms that also need eID-based identity checks

Who it is not for

- ✕ Not for you if you just want to send a few documents, as the API suits developers
- ✕ Skip it if you need prices up front, since none are published
- ✕ Pricey if you expect a simple bill: fees combine setup, subscription and transaction charges
- ✕ Watch out: individuals and small teams are pointed to its self-service portal, which is sold as Dokobit

Good to know

Good for

- ✓ Banks and insurers embedding signing in onboarding flows
- ✓ Companies in the Nordics, DACH and Benelux that rely on national eIDs
- ✓ Developers who want to test through a free sandbox account

Worth knowing

- ⓘ No prices are published: the pricing page asks for a form and a quote, and says fees combine setup, subscription and transaction charges.
- ⓘ Detailed per-method transaction prices sit behind a free Signicat Dashboard account.
- ⓘ Signicat is mainly an identity platform, so signing is one of many products and the API suits developers more than occasional signers.
- ⓘ The self-service portal for individuals and teams has its own public prices under the Dokobit name.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Signicat's current pricing could not be confirmed from its own site.

> **No prices are published; fees combine setup, subscription and transaction charges quoted through a form.**
>
> From our grade for value for money

We could not confirm Signicat's current prices from its own site, so this guide lists no plans. signicat.com has them.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Electronic signature API inside a digital identity platform. Here is what it does, as its own site describes it, and what it covers: public API, workflow automation, documents.

> **Signing API at all three eIDAS levels with eID-based signer identity, forwarding and evidence management.**
>
> From our grade for features

Embedded signing API

A Sign API lets a company add signing to its own applications, such as customer portals, document systems or chat interfaces.

All three eIDAS signature levels

Supports simple, advanced and qualified electronic signatures, with the identity methods and certificate types listed for each level.

eID-based signer identity

Signers can use methods such as Norwegian and Swedish BankID, MitID, Smart-ID, itsme and Freja eID, plus SMS or email one-time codes.

Sign forwarding

A contract sent to someone without signing rights can be passed on, so the right person signs.

Self-service portal

The Electronic Signature Portal, branded Dokobit by Signicat, offers signing without integration. It lists up to 3 free signatures a month.

Digital evidence management

An audit service that records who did what and when, offered alongside the signing products.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

19/78

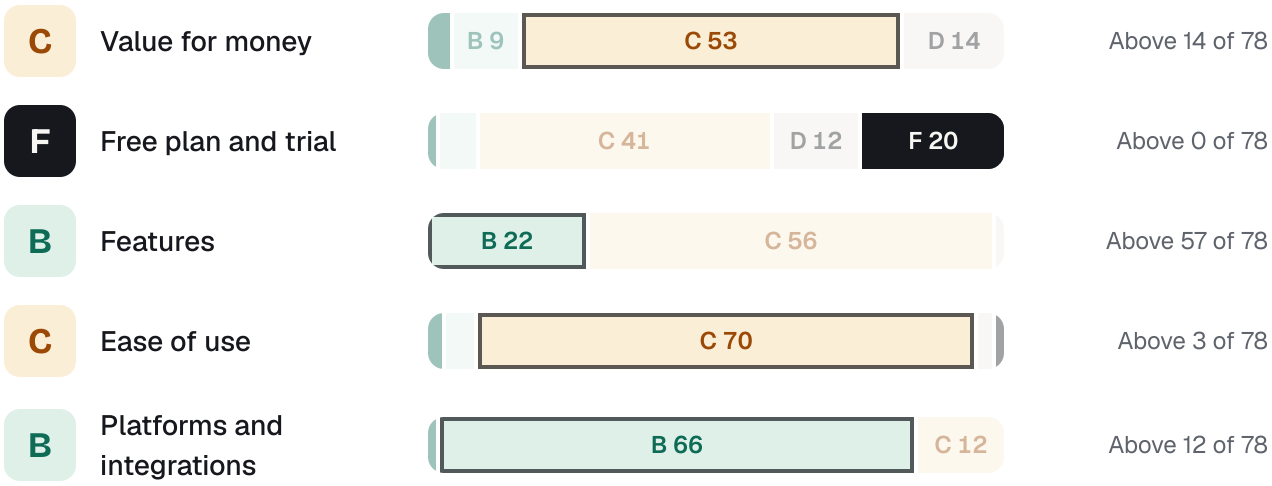

Other e-signature and proposal tools it is graded above

Signicat's GPA of 2.0 is higher than 19 of the 78 other e-signature and proposal tools we grade, and level with 18.

It stands best on features (B, above 57 of 78) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 79 e-signature and proposal tools we grade, cut by the letter each got. Signicat's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Signicat you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 41 of the 78 other e-signature and proposal tools grade higher.

What you could make

- Documents: an app builder makes this well.

What you could not

- Connections to other products, each kept working as those products change.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Signicat's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Dokobit, Scrive, Skribble, Namirial and Penneo

The 5 tools Signicat is most often weighed against, with where each one differs from it.

2.6 GPA

Dokobit

Free plan · from €8/mo

eIDAS-based e-signing portal with per-signature pricing.

- Dokobit has a free plan. Signicat does not.
- Only Dokobit lists iOS and Android apps.
- Dokobit also covers reports.

Signicat and Dokobit compared in full

2.4 GPA

Scrive

Free trial · from €21/mo

E-signatures with European eID verification, portal and API.

- Scrive also covers templates and forms.

Signicat and Scrive compared in full

2.4
GPA

Skribble

Free trial · from €23/mo

Swiss e-signatures with qualified signatures for EU and Swiss law.

Signicat and Skribble compared in full

1.8
GPA

Namirial

Paid

European trust-services group with eIDAS electronic signature software.

- Namirial also covers templates.

Signicat and Namirial compared in full

2.2
GPA

Penneo

Free trial

Nordic digital signing with national eIDs and document collection.

- Penneo also covers templates and forms.

PART 06 · QUESTIONS

Quick answers

The questions people ask about it, each answered in a line or two

11

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Signicat free?

No. Signicat is a paid product.

What platforms does Signicat work on?

Signicat is available on Web.

Does Signicat have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. Signicat is listed for Web.

Does Signicat have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. Signicat is listed for Web.

Is Signicat open source?

Signicat is not described as open source on its own site, as read on Nov 13, 2026.

Does Signicat have an API?

Yes. Signicat offers a public API, according to its own site.

What does Signicat integrate with?

Signicat's listing names Salesforce, Okta, ForgeRock, Curity and Cryptshare.

Who makes Signicat?

Signicat is made by a company of the same name.

What are the alternatives to Signicat?

The closest alternatives to Signicat in our directory are Dokobit, Scrive, Skribble, Namirial and Penneo.

How does Signicat compare with other e-signature and proposal tools?

Signicat's GPA of 2.0 is higher than 19 of the 78 other e-signature and proposal tools we grade, and level with 18.

Could I make my own version of Signicat?

To replace Signicat you would be making connections to other products, each kept working as those products change.

Where this guide comes from

The prices, plans, platforms and features were read from Signicat's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Signicat's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Signicat. Prices change, so check signicat.com before you buy.
