Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 17 of the 49 other shift scheduling apps we grade

Skello is a French workforce management platform for hospitality, retail, pharmacy and similar field teams. It builds compliant schedules, records clock-ins on a tablet or phone, tracks absences and prepares payroll variables. A payroll service, recruitment add-on and HR tools are sold alongside.

To get you started, here are **9 things to know about Skello**, taken from its own pages and our grades.

1 **Best for French and European shift teams**

But the page doesn't say what that monthly amount is based on, and the Smart Planner needs the dearer tiers.

2 **Paid plans start at about $65.91 a month**

As its pricing page puts it: €59 per month and up (Standard Clocking), basis not stated.

3 **You can try it first**

14-day free trial on every plan

4 **It runs on Web**

Web.

5 **Compliant scheduling**

Week, month and day views with regulatory alerts set from the collective agreement, schedule locking and templates.

6 **Smart scheduling**

Planning Max and Duo Max forecast staffing needs and create schedules automatically; Smart Planner is an optional extra on lower tiers.

7 **Time clocking**

Staff clock in on a tablet or mobile with geolocation, and hours worked are tracked for payroll.

8 **A 2.0 GPA, above 17 of 49**

That is against the other shift scheduling apps we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Skello you would be making payroll taxes worked out and filed with the government for you. That is not a weekend's work, with an AI app builder or without one.

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Skello is for

- ✓ Fits if you run a shop, restaurant or clinic in France and want rules like RTT and DPAE built in
- ✓ Works for teams that want scheduling and clocking from one vendor

Who it is not for

- ✗ Skip it if you're outside France, because the legal rules follow French employment law
- ✗ Not for you if you want a clear per-head price, as the basis isn't stated
- ✗ Tight if you need forecasting and auto-scheduling, which start on Max tiers
- ✗ Watch out: the Business plan for 200 to 10,000 employees has no price

Good to know

Good for

- ✓ French hotels, restaurants, retail and pharmacy teams
- ✓ Managers who need schedules checked against collective agreements
- ✓ Businesses wanting rostering and payroll variables in one place

Worth knowing

- ⓘ Prices are in euros and shown as a starting figure; the page does not say what the monthly amount is based on, such as site or headcount.
- ⓘ The Business plan for 200 to 10,000 employees has no published price.
- ⓘ Several features, including the Smart Planner and unlimited document storage, depend on the plan tier.
- ⓘ Legal rules built in, such as RTT and DPAE, follow French employment law.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

17/49

Other shift scheduling apps it is graded above

Skello's GPA of 2.0 is higher than 17 of the 49 other shift scheduling apps we grade, and level with 8.

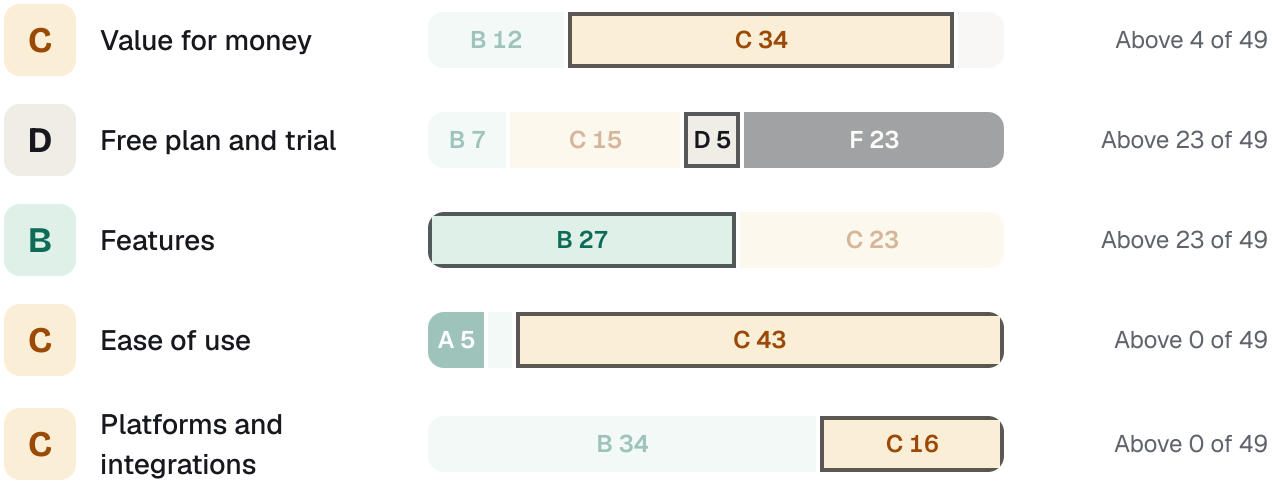

It stands best on features (B, above 23 of 49) and worst on free plan and trial (D, above 23).

Its paid plans start at about $65.91 a month, against a middle price of $16.76 for the category: 27 of the 28 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 12 tools score higher and cost less.

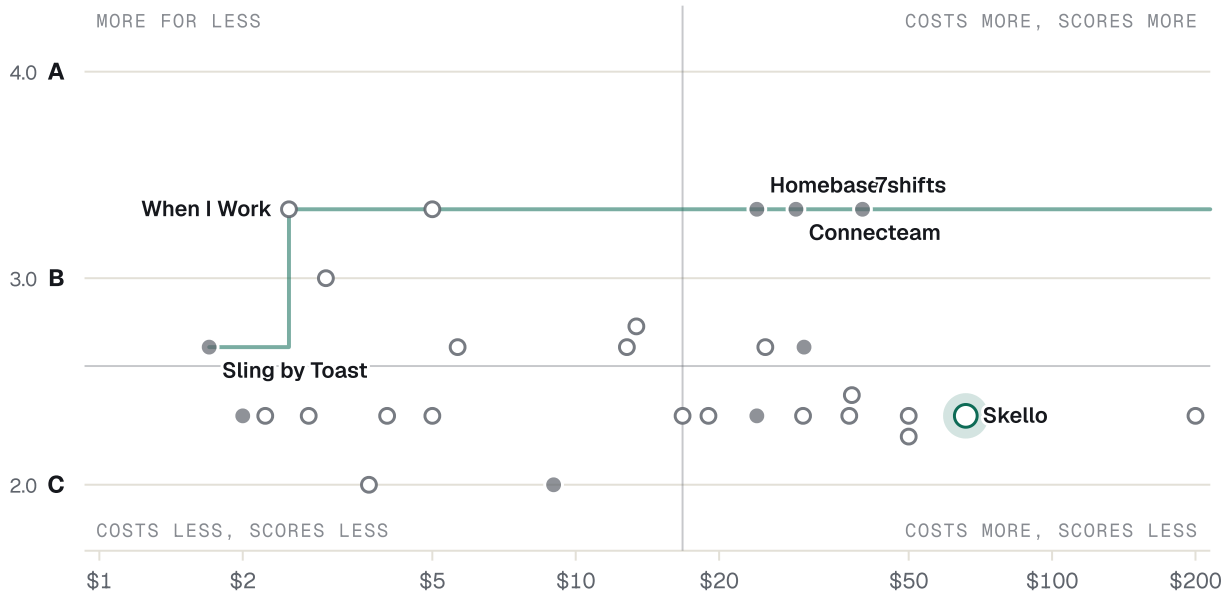

Each grade against the category

Every bar is all 50 shift scheduling apps we grade, cut by the letter each got. Skello's own letter is outlined.

Price against what you get

Each dot is one of 29 shift scheduling apps. Further left costs less; higher up scores better on features, ease of use and platforms. Skello is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Skello you would be making payroll taxes worked out and filed with the government for you. That is not a weekend's work, with an AI app builder or without one.

It costs $790.98 a year.

What you could make

- Time off and employee records: an app builder makes these well.

What you could not

- Payroll taxes worked out and filed with the government for you.

- A rota the whole staff sees on their phones, with swaps and alerts.
- Clocking in from a phone, checked against where and when.
- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Skello's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
