Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of SkillSyncer you could make: resume builder and templates. What surrounds it you could not. The 2 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 26 of the 45 other resume builders grade higher. It costs $139.44 a year.

What you could make

- Resume builder and templates: an app builder makes these well.

What you could not

- × A score built from what the top results for each keyword cover.

- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. SkillSyncer's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
