SkySlope is a transaction management suite for real estate brokerages, covering forms, compliance checklists, audit review, offers and accounting. Its e-signature product, DigiSign, sends and tracks real estate documents inside the same platform. The suite is priced for brokerages from a published monthly floor, and DigiSign is an add-on.

To get you started, here are **8 things to know about SkySlope**, taken from its own pages and our grades.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

You could make this

What SkySlope does at its core is templates, tasks and reports, and that is the kind of thing an AI app builder makes well.

You would give up 2 things, listed below, and little else. It costs $75 a year. An AI app builder starts at about $20 a month on our listings, and you only need it while you build.

What you could make

- Templates, tasks and reports: an app builder makes these well.

What you could not

- A real app for iOS. Something home-made would be a web page.

- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. SkySlope's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
