PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

0/178

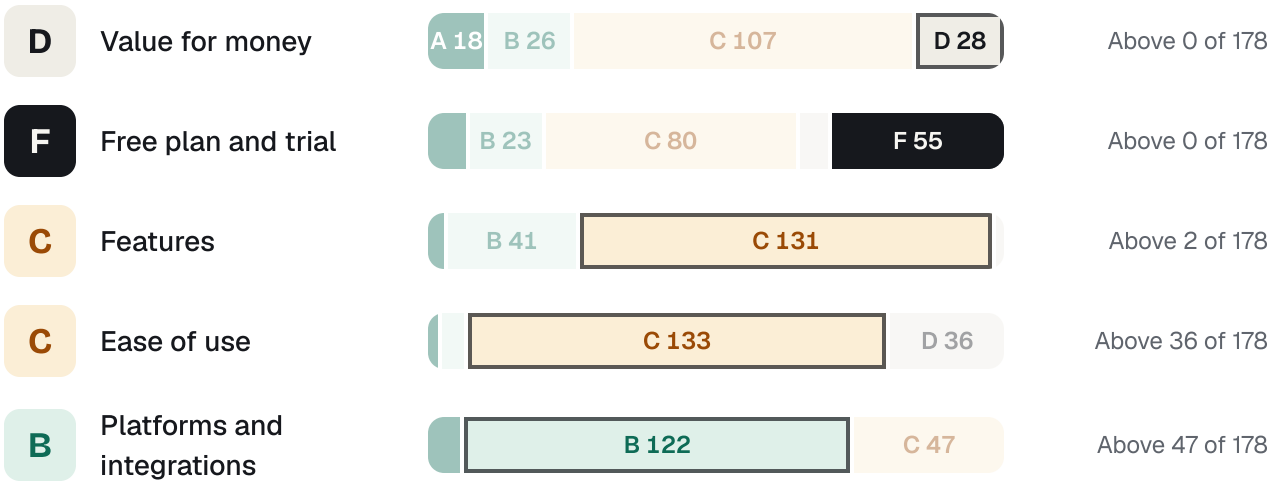

Other AI agents it is graded above

Slang AI's GPA of 1.6 is higher than 0 of the 178 other AI agents we grade, and level with 29.

It stands best on platforms and integrations (B, above 47 of 178) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 179 AI agents we grade, cut by the letter each got. Slang AI's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Slang AI you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 149 of the 178 other AI agents grade higher.

What you could make

- Appointment booking: an app builder makes this well.

What you could not

- An AI agent, with the models and the safeguards behind it.
- It plugs into other products, OpenTable, Resy and SevenRooms among them.

What this rests on. Slang AI's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
