Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 9 of the 89 other presentation tools we grade

Slidebook is a collection of public investor presentations and startup pitch decks that can be searched by phrase and filtered by type, such as IPO, M&A or SPAC. It is a reference library rather than a tool for making slides. A free tier shows extended results and a paid tier shows full ones.

To get you started, here are **9 things to know about Slidebook**, taken from its own pages and our grades.

> **No store rating is on record, but it is a site you open and search with nothing to set up.**

Keep it, or make your own?

Keep it

To replace Slidebook you would be making a library of papers and sources to search. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 70 of the 89 other presentation tools grade higher. It costs $348 a year.

What you could make

- Documents: an app builder makes this well.

What you could not

- A library of papers and sources to search.

	× A slide editor.

What this rests on. Slidebook's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
