Who SlideLizard is for

- ✓ Fits if you present from PowerPoint on a Windows laptop and want live polls in it
- ✓ Works for companies that want the Enterprise Suite hosted on their own servers

Who it is not for

- ✗ Skip it if you use a Mac, as the Mac version is listed as not yet available
- ✗ Not for you if you present from Google Slides or Keynote, as it needs PowerPoint
- ✗ Skip it if you want a price on the page, as none is published
- ✗ Watch out: the page does not say what happens when the 30-day PRO trial ends

Good to know

Good for

- ✓ PowerPoint-based teams that want polls inside their existing decks
- ✓ Companies that need one approved slide library
- ✓ Organizations with strict hosting or data-protection rules

Worth knowing

- ⓘ No plan prices are published; the pricing page offers demos and quotes for LIZ AI and the Enterprise Suite.
- ⓘ The presenter plugin installs on Windows 7-11 with PowerPoint 2016-2024 or Office 365; the Mac version is listed as not yet available.
- ⓘ Attendees join in a web browser, but presenting needs the PowerPoint plugin, so it does not run in Google Slides or Keynote.
- ⓘ A free 30-day PRO trial is advertised; what happens after it was not stated on the pages read.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

2/51

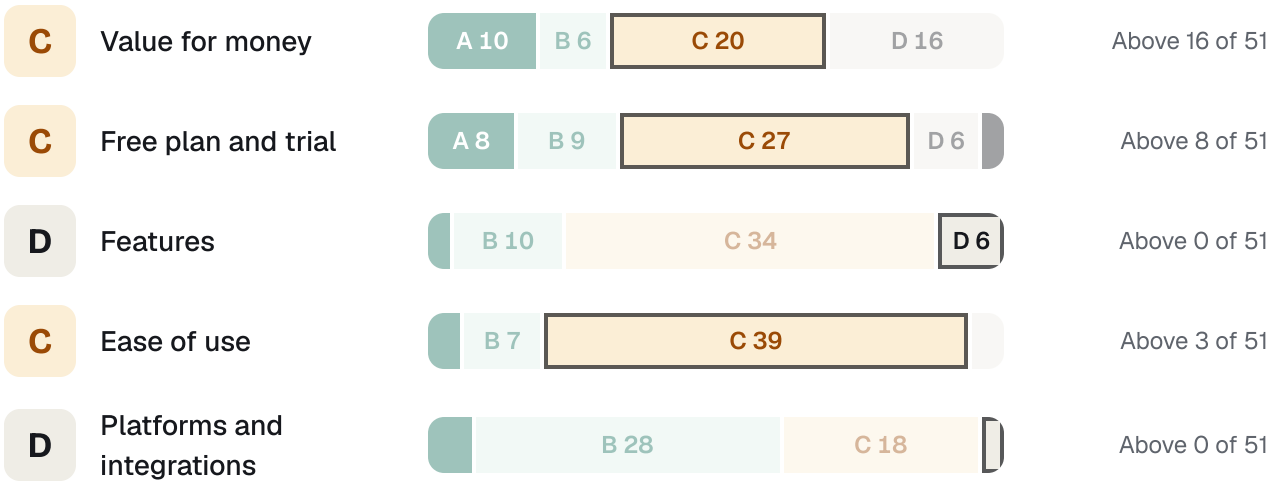

Other presentation tools it is graded above

SlideLizard's GPA of 1.6 is higher than 2 of the 51 other presentation tools we grade, and level with 3.

It stands best on value for money (C, above 16 of 51) and worst on features (D, above 0).

Each grade against the category

Every bar is all 52 presentation tools we grade, cut by the letter each got. SlideLizard's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of SlideLizard you could make: surveys. What surrounds it you could not. The 4 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 46 of the 51 other presentation tools grade higher.

What you could make

- Surveys: an app builder makes this well.

What you could not

- A slide editor.
- A real app for Windows. Something home-made would be a web page.
- Several people working in it at the same moment.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. SlideLizard's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
