SlidesGPT builds a slide deck from a typed prompt or an uploaded document and exports it to PowerPoint, PDF or Google Slides. A free plan covers creating and sharing decks, and paid plans add exports and image generation. A separate API lets other software generate decks.

What you could not

- ✕ A slide editor.
- ✕ It plugs into other products, ChatGPT, Google Slides and PowerPoint among them, and has an API.

- ✕ AI features, unless you pay a model provider for each request yourself.
