Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Nothing SlidesPilot does is plain enough to make in a weekend. The 3 things listed below take a company.

It costs $107.88 a year.

What you could not

- ✕ A slide editor.
- ✕ A real app for iOS and Android. Something home-made would be a web page.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. SlidesPilot's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
