PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

34/60

Other browsers it is graded above

Slimjet's GPA of 3.0 is higher than 34 of the 60 other browsers we grade, and level with 9.

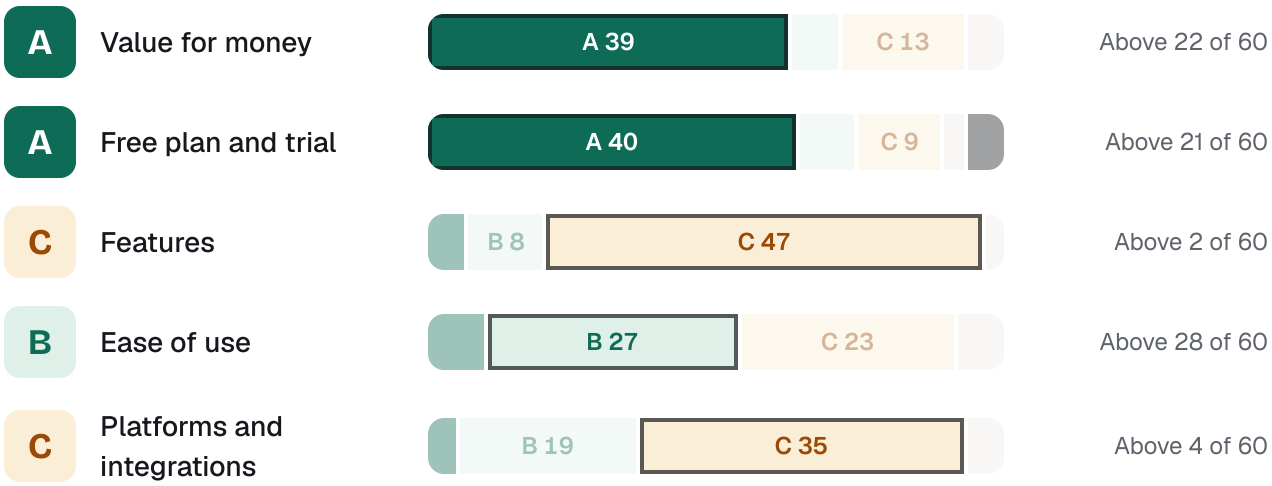

It stands best on value for money (A, above 22 of 60) and worst on features (C, above 2).

Slimjet has no paid plan.

On features, ease of use and platforms it scores 2.3 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

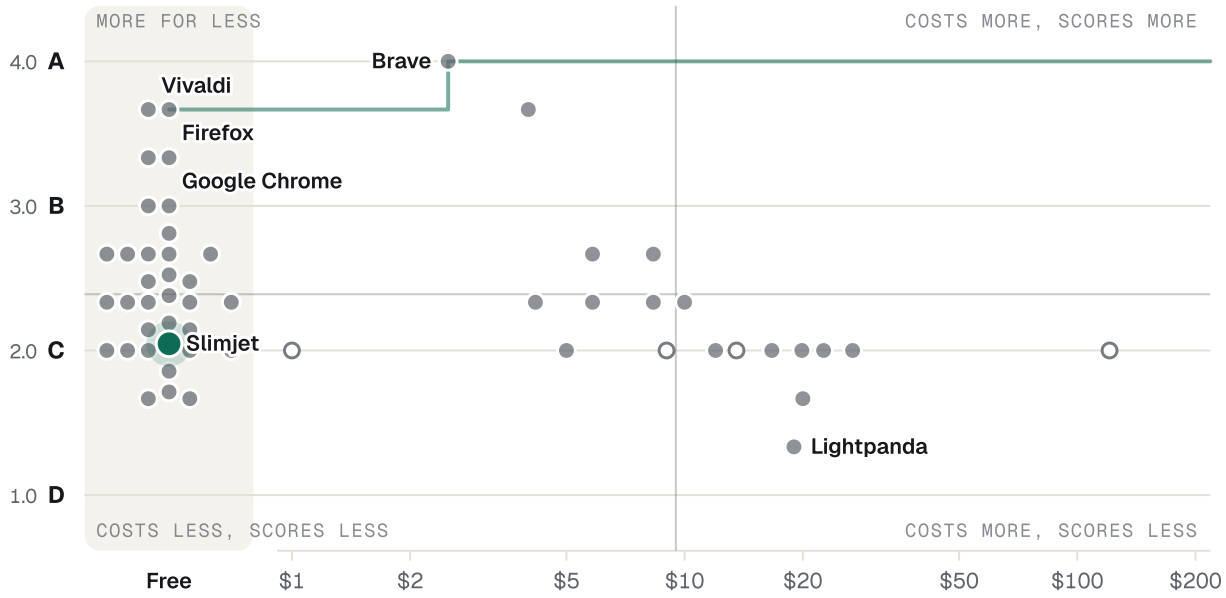

Each grade against the category

Every bar is all 61 browsers we grade, cut by the letter each got. Slimjet's own letter is outlined.

Price against what you get

Each dot is one of 54 browsers. Further left costs less; higher up scores better on features, ease of use and platforms. Slimjet is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Slimjet is free, so making your own would save you nothing.

And it is not the kind of software a weekend replaces.

What you could make

- Ad and tracker blocking: an app builder makes this well.

What you could not

- A web browser.
- Apps for macOS, Windows and Linux that stay in step with each other.

What this rests on. Slimjet's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
