Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 11 of the 72 other inventory management tools we grade

Slimstock sells Slim4, a supply chain planning platform that covers demand forecasting, inventory optimization, replenishment, supply planning and sales and operations planning. It is built for mid-size and large companies in retail, distribution and manufacturing, and is sold through the vendor's local offices.

To get you started, here are **7 things to know about Slimstock**, taken from its own pages and our grades.

> **A planning platform sold through offices takes a rollout, and no store rating is on record.**
>
> From our grade for ease of use

1 **Best for supply chain planning for larger companies**

No price is published, and it covers far more than stock control, so small shops will find it heavy.

2 **It runs on Web**

Web.

3 **Inventory optimisation**

Inventory pages cover optimisation, auto replenishment, multi-echelon optimisation, allocation, network balancing and open-to-buy.

4 **Demand management**

Demand forecasting, demand planning, demand sensing and forecasting by customer or channel.

5 **Supply chain planning**

Supply planning, production planning and scheduling, S&OP, integrated business planning and scenario planning.

6 **A 1.8 GPA, above 11 of 72**

That is against the other inventory management tools we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

The plain part of Slimstock you could make: inventory and reports. What surrounds it you could not. The 2 things listed below take a company, not a weekend.

Best for supply chain planning for larger companies

Slimstock sells Slim4, a planning platform for demand forecasting, inventory, replenishment and S&OP, through local offices. No price is published, and it covers far more than stock control, so small shops will find it heavy.

TOOLGPA REPORT CARD **Slimstock** Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published; buyers book a demo or call a local office, so there is no figure to set against this category's $91 middle price.
Free plan and trial	F	No free plan or trial; it is sold by demo only.
Features	B	Inventory optimisation, demand management, supply chain planning, commerce management and data management. The listing shows no gap in the core work.
Ease of use	C	A planning platform sold through offices takes a rollout, and no store rating is on record.
Platforms and integrations	C	Web only, and the pages we read name no integrations.

Grade point average Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Slimstock is for

- ✓ Fits if you run a mid-sized or large distributor or retailer with a planning team
- ✓ Makes sense if you want one vendor for forecasting, replenishment and S&OP

Who it is not for

- ✕ Skip it if you want a price on the page, as none is published
- ✕ Skip it if you are a small shop that only counts stock
- ✕ Watch out: no free plan or trial is shown, only demos
- ✕ Not for you if you want self-serve sign-up

Good to know

Good for

- ✓ Mid-size and large distributors and retailers planning stock centrally
- ✓ Companies that want forecasting, replenishment and S&OP in one platform
- ✓ Planning teams with local-language support needs

Worth knowing

- ⓘ No pricing is published; the site directs buyers to book a demo or contact a local office.
- ⓘ The platform covers far more than stock control, so it suits larger planning teams more than small shops.
- ⓘ The vendor's pages are available in 11 languages and it lists offices in 28 countries.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

11/72

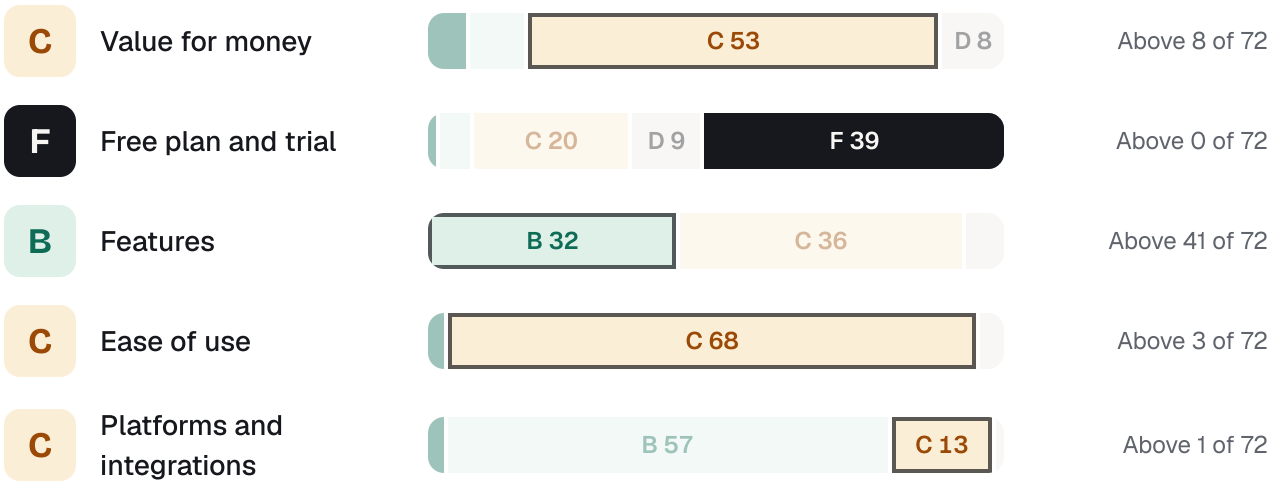

Other inventory management tools it is graded above

Slimstock's GPA of 1.8 is higher than 11 of the 72 other inventory management tools we grade, and level with 16.

It stands best on features (B, above 41 of 72) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 73 inventory management tools we grade, cut by the letter each got. Slimstock's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Slimstock you could make: inventory and reports. What surrounds it you could not. The 2 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 45 of the 72 other inventory management tools grade higher.

What you could make

- Inventory and reports: an app builder makes these well.

What you could not

- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Slimstock's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
