Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 49 of the 122 other web hosts we grade

Sliplane runs Docker containers and apps deployed from GitHub or a Docker image on servers in Europe, the US and Singapore. App hosting is priced per server rather than per service, so any number of services can share one server. The same account also offers managed PostgreSQL and S3-compatible object storage as separate products.

To get you started, here are **9 things to know about Sliplane**, taken from its own pages and our grades.

>
> **You pick server sizes and deploy containers, which has a learning curve.**
>
> From our grade for ease of use

1 **Best for container hosting billed per server**

VAT, with unlimited services per server.

2 **Paid plans start at about $10.05 a month**

As its pricing page puts it: €9 per server / month (Starter), excluding VAT.

3 **You can try it first**

A free demo server, deleted automatically after 48 hours unless you add a payment method and turn it into a paid server.

4 **It runs on Web**

Web.

5 **Push to deploy**

Connect a GitHub repository or a container registry; Sliplane detects the framework, builds, and deploys with zero-downtime releases.

6 **Unlimited services per server**

Each server runs as many services as fit on it at no extra charge, so the bill follows servers, not apps.

7 **One-click presets**

Presets cover popular software such as n8n, Open WebUI, Grafana, Metabase and several databases.

8 **A 2.0 GPA, above 49 of 122**

That is against the other web hosts we grade, on value, the free plan, features, ease of use and platforms.

9 **Your call**

The report card

Best for container hosting billed per server

Sliplane runs Docker containers on servers billed by size, from €9 a month ex. VAT, with unlimited services per server. It offers only a 48-hour demo, and managed PostgreSQL starts at €19 a month.

TOOLGPA REPORT CARD

Sliplane

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	Starter is €9 a month per server ex. VAT, in the ordinary range, and managed PostgreSQL adds €19 a month.
Free plan and trial	D	A demo server is removed after 48 hours unless you add a payment method, shorter than a week.
Features	C	Push to deploy, unlimited services per server, backups, SSL and a REST API. Built around containers, not shared PHP hosting.
Ease of use	C	You pick server sizes and deploy containers, which has a learning curve.
Platforms and integrations	B	Web dashboard with a REST API and several integrations.

Grade point average — Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Sliplane is for

- ✓ Fits if you run Docker containers and want several services on one server
- ✓ Works for small teams that deploy from GitHub

Who it is not for

- ✕ Skip it if you want shared PHP hosting, as it is built around containers
- ✕ Tight if you want to try it, as the demo server is deleted after 48 hours
- ✕ Pricey if you need a database, as managed PostgreSQL starts at €19 a month with no free tier
- ✕ Watch out: prices are in euros ex. VAT and a busy app may need a bigger tier

Good to know

Good for

- ✓ Developers who want to run many small services on one predictable monthly server cost
- ✓ Teams that need European hosting
- ✓ Self-hosters of tools such as n8n who do not want to manage a server

Worth knowing

- ⓘ Prices are in euros and exclude VAT; yearly billing is labeled 33% cheaper and hourly billing costs more than monthly, but those figures are not in the page text.
- ⓘ Servers are billed by size, so a busy app may need a larger tier; custom configurations require a minimum commitment.
- ⓘ Managed PostgreSQL starts at €19 a month with no free tier, and object storage costs €5 per extra 250 GB.
- ⓘ The service is built around containers; the site describes deploying from GitHub or Docker images rather than shared PHP hosting.

From our grade for features

Push to deploy

Connect a GitHub repository or a container registry; Sliplane detects the framework, builds, and deploys with zero-downtime releases.

Unlimited services per server

Each server runs as many services as fit on it at no extra charge, so the bill follows servers, not apps.

One-click presets

Presets cover popular software such as n8n, Open WebUI, Grafana, Metabase and several databases.

Backups and SSL

Daily volume backups, free SSL certificates and free Sliplane subdomains for public services are listed as always included.

Managed PostgreSQL and object storage

PostgreSQL with point-in-time backups starts at €19 a month, and S3-compatible storage is billed in 250 GB blocks with the first GB free.

REST API

Servers and services can be provisioned and deployed programmatically with a personal access token.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

49/122

Other web hosts it is graded above

Sliplane's GPA of 2.0 is higher than 49 of the 122 other web hosts we grade, and level with 24.

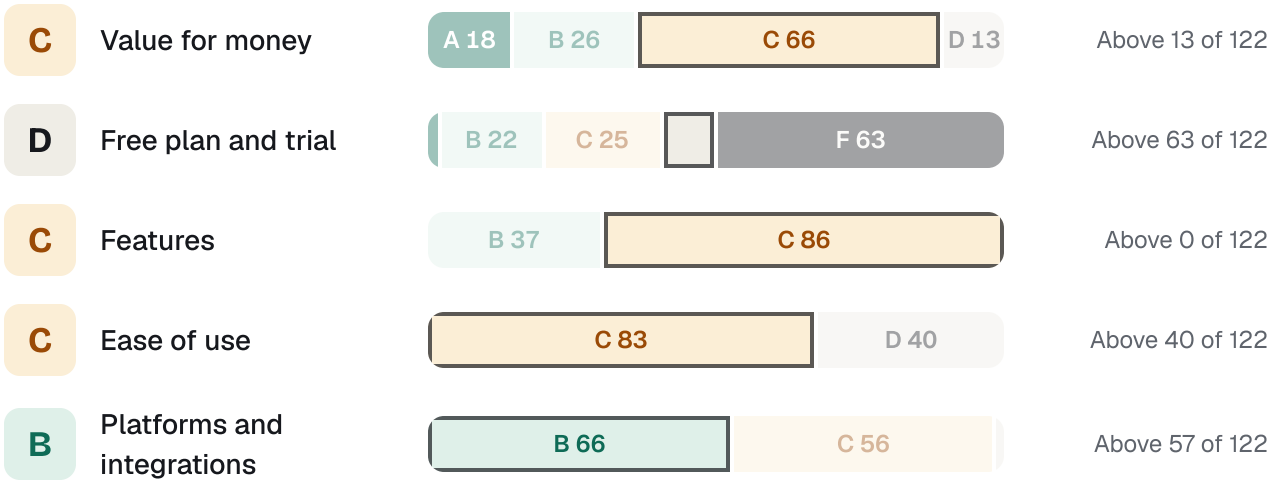

It stands best on platforms and integrations (B, above 57 of 122) and worst on free plan and trial (D, above 63).

Its paid plans start at about $10.05 a month, against a middle price of $9.69 for the category: 56 of the 107 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 3 tools score higher and cost less.

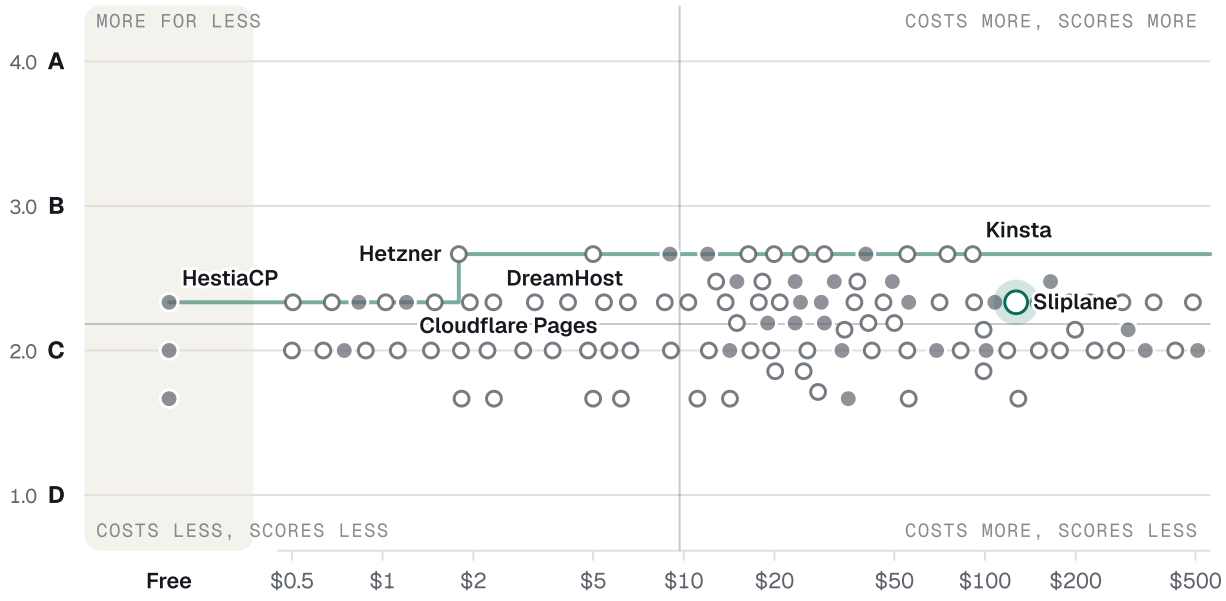

Each grade against the category

Every bar is all 123 web hosts we grade, cut by the letter each got. Sliplane's own letter is outlined.

Price against what you get

Each dot is one of 111 web hosts. Further left costs less; higher up scores better on features, ease of use and platforms. Sliplane is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Your call

Sliplane sits between: not beyond making, and not a weekend's work either.

What you would give up is listed below. Whether that is worth the price is your call. It costs $120.66 a year.

What you could make

- It runs in a browser, which is where something home-made would run too.

What you could not

- Databases with views, filters and links between them.

- ✕ It plugs into other products, GitHub, Docker and PostgreSQL among them, and has an API.

What this rests on. Sliplane's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
