Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 1 of the 149 other project management tools we grade

SmartPM analyzes construction schedules that teams upload and checks them for health problems, compares revisions and tracks performance over time. A higher plan adds an interactive Gantt viewer, time impact analysis and what-if scenarios. It is sold by annual subscription to contractors, owners and government agencies, with unlimited users on both plans.

To get you started, here are **9 things to know about SmartPM**, taken from its own pages and our grades.

> From our grade for ease of use

1 **Best for checking construction schedules made in other tools**

SmartPM reads construction schedules from other tools and checks their health and delays.

2 **Paid plans start at $1 a month when paid by the year**

As its pricing page puts it: $12K per year for up to 50 projects.

3 **You can try it first**

60-day risk-free trial; the site also offers a demo using your own schedules

4 **It runs on Web**

Web.

5 **Schedule health checks**

Uploaded schedules are checked automatically for quality problems, and revisions can be compared against each other.

6 **Performance trends**

Tracks how a project's schedule performs over time and exports change and quality reports.

7 **Time impact analysis**

The Controls plan adds what-if scenarios and time impact analysis for schedule delays.

8 **A 1.6 GPA, above 1 of 149**

That is against the other project management tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

The plain part of SmartPM you could make: Gantt & timelines and reports. What surrounds it you could not. The 2 things listed below take a company, not a weekend.

Best for checking construction schedules made in other tools

SmartPM reads construction schedules from other tools and checks their health and delays. It costs $12,000 a year at the lowest and does not replace the scheduling tool.

TOOLGPA REPORT CARD — **SmartPM** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	F	$12K a year for up to 50 projects, about $1,000 a month, against $9 in the middle for project tools, and nothing on record sets it apart as a different kind of purchase for small teams.
Free plan and trial	C	A 60-day risk-free trial, and a demo on your own schedules. The page does not say whether a card is needed.
Features	D	It analyses schedules made in other tools and does not replace them, so it needs another product to be useful at all.
Ease of use	C	No store rating on record. Schedule files have to be connected and read first.
Platforms and integrations	B	Web only, with Autodesk Forma and Procore links and an Open API. No desktop or phone apps are listed.
Grade point average		Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who SmartPM is for

- ✓ Fits if you run a contractor with many projects and schedules from other tools
- ✓ Works for teams who need delay analysis, not scheduling

Who it is not for

- ✗ Skip it if you are an individual or small team, as plans start at $12K a year
- ✗ Not for you if you want a scheduling tool, as it only analyses other tools' files
- ✗ Watch out: Controls is $25K a year, priced by slots, 5 to start
- ✗ Watch out: managed services are sold as add-ons with no price on the page

Good to know

Good for

- ✓ Contractors and construction managers checking CPM schedules
- ✓ Owners and developers monitoring schedule risk across projects
- ✓ Government agencies reviewing contractor schedules

Worth knowing

- ⓘ Both plans are annual subscriptions at $12K and $25K a year; there is no monthly or free plan.
- ⓘ Essentials covers up to 50 projects, while Controls is priced by slots: 5 to start, with the option to expand.
- ⓘ It analyzes schedules made in other scheduling tools rather than replacing them, and the pages read name no desktop or mobile apps.
- ⓘ Managed services are sold as add-ons; the page gives no prices for them.

Where it stands

Its grades against its category, and whether to keep it or make your own

1/149

Other project management tools it is graded above

SmartPM's GPA of 1.6 is higher than 1 of the 149 other project management tools we grade, and level with 5.

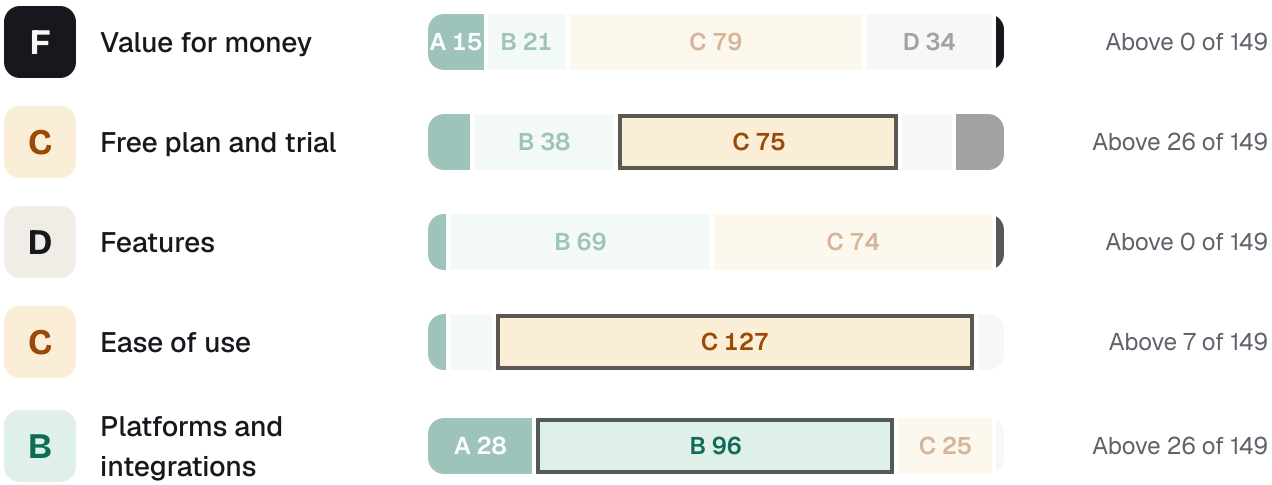

It stands best on platforms and integrations (B, above 26 of 149) and worst on value for money (F, above 0).

Its paid plans start at $1 a month when paid by the year, against a middle price of $9 for the category: 0 of the 121 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 2 tools score higher and cost less.

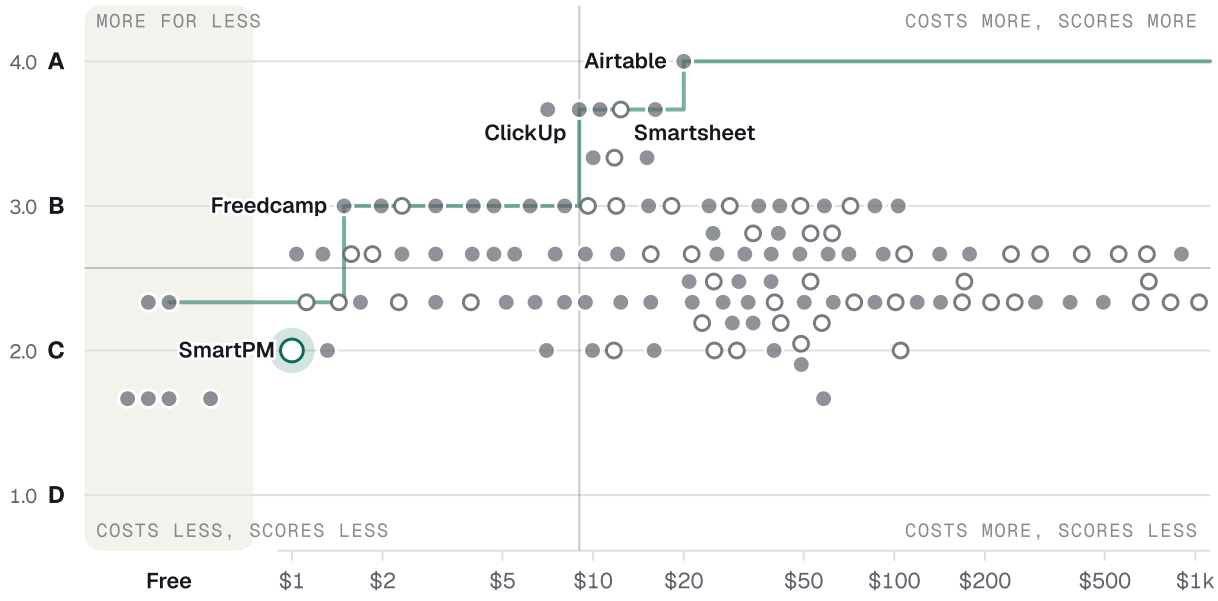

Each grade against the category

Every bar is all 150 project management tools we grade, cut by the letter each got. SmartPM's own letter is outlined.

Price against what you get

Each dot is one of 128 project management tools. Further left costs less; higher up scores better on features, ease of use and platforms. SmartPM is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of SmartPM you could make: Gantt & timelines and reports. What surrounds it you could not. The 2 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 143 of the 149 other project management tools grade higher. It costs $12 a year.

What you could make

- Gantt & timelines and reports: an app builder makes these well.

What you could not

- Connections that pull numbers from dozens of other services.

- ✕ It plugs into other products, Autodesk Forma and Procore among them, and has an API.

What this rests on. SmartPM's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
