PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

69/186

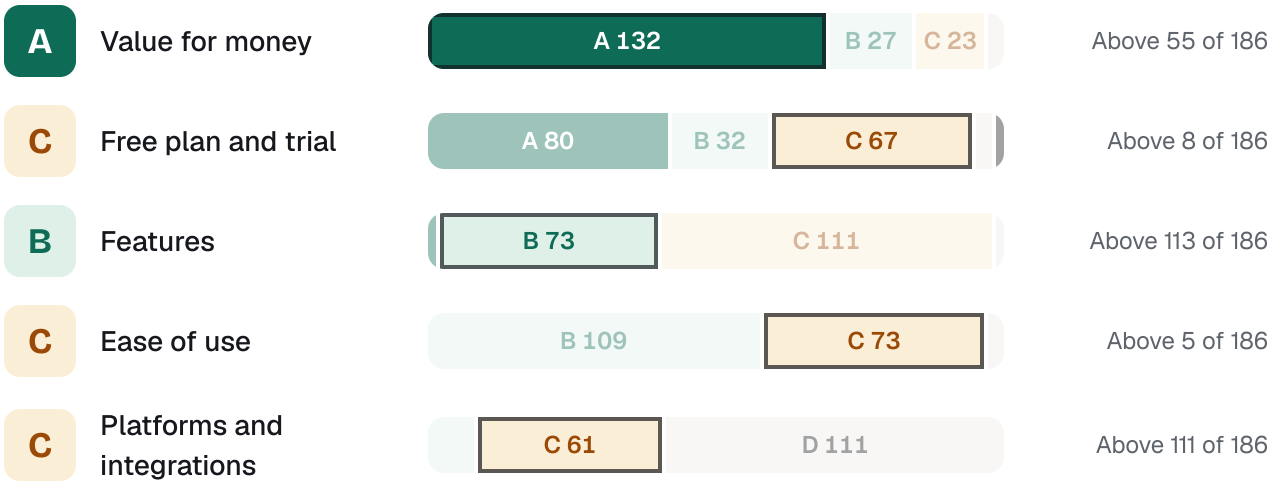

Other desktop utilities it is graded above

Smooze's GPA of 2.6 is higher than 69 of the 186 other desktop utilities we grade, and level with 46.

It stands best on value for money (A, above 55 of 186) and worst on ease of use (C, above 5).

Each grade against the category

Every bar is all 187 desktop utilities we grade, cut by the letter each got. Smooze's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Smooze you would be making keys and buttons remapped below the level of apps. That is not a weekend's work, with an AI app builder or without one.

It costs $19.99, paid once.

What you could not

- ✕ Keys and buttons remapped below the level of apps.
- ✕ A native app living in the menu bar.
- ✕ A real app for macOS. Something home-made would be a web page.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Smooze's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
