Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of SociableKit you could make: review collection and reports. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

It is one of the better ones too: its GPA of 2.6 is higher than 55 of the 63 other customer review tools we grade. It costs $110.04 a year.

What you could make

- Review collection and reports: an app builder makes these well.

What you could not

- It plugs into other products, Google, Facebook and Instagram among them, and has an API.
- AI features, unless you pay a model provider for each request yourself.
- Hooks into the device itself: widgets.

What this rests on. SociableKit's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
