Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 2 of the 122 other email apps we grade

Soverin is a Dutch email host that charges a yearly fee instead of showing ads or scanning mail. A mailbox comes with 25 GB, unlimited aliases, and calendar and contact sync, and works in standard mail apps as well as webmail. It also sells mailboxes to businesses and resellers.

To get you started, here are **8 things to know about Soverin**, taken from its own pages and our grades.

3 **It runs on Web**

Web.

4 **No ads or scanning**

The vendor says it does not scan emails, track readers or sell data, and that it removes the sender's IP from message headers.

5 **Your own domain**

Connect a domain you already own for free, or register a new one through Soverin for a yearly fee.

6 **Unlimited aliases**

Aliases are free, and the vendor also lists multiple mailboxes.

7 **A 1.8 GPA, above 2 of 122**

That is against the other email apps we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

To replace Soverin you would be making an email client: sending, receiving, threading and searching years of mail. That is not a weekend's work, with an AI app builder or without one.

Who Soverin is for

- ✓ Fits if you want a cheap private mailbox on your own domain and no ads
- ✓ Works for people who'd rather pay a few euros than be the product

Who it is not for

- ✗ Skip it if you want to try before paying, as there's no free plan or trial
- ✗ Skip it if you want end-to-end encryption, which it doesn't offer
- ✗ Tight if you want monthly billing, as it's billed once a year
- ✗ Watch out: sign-up needs a mobile phone number
- ✗ Watch out: prices are in euros and include VAT

Good to know

Good for

- ✓ People who want to pay for email instead of using a free ad-funded service
- ✓ Anyone moving to a custom domain who wants it kept portable

- ⓘ Prices are in euros and include VAT.
- ⓘ Not end-to-end encrypted: the vendor describes connection encryption and encrypted disks, not encrypted mailboxes.
- ⓘ Signing up needs a mobile phone number, which the vendor says is used only for password resets.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

2/122

Other email apps it is graded above

Soverin's GPA of 1.8 is higher than 2 of the 122 other email apps we grade, and level with 8.

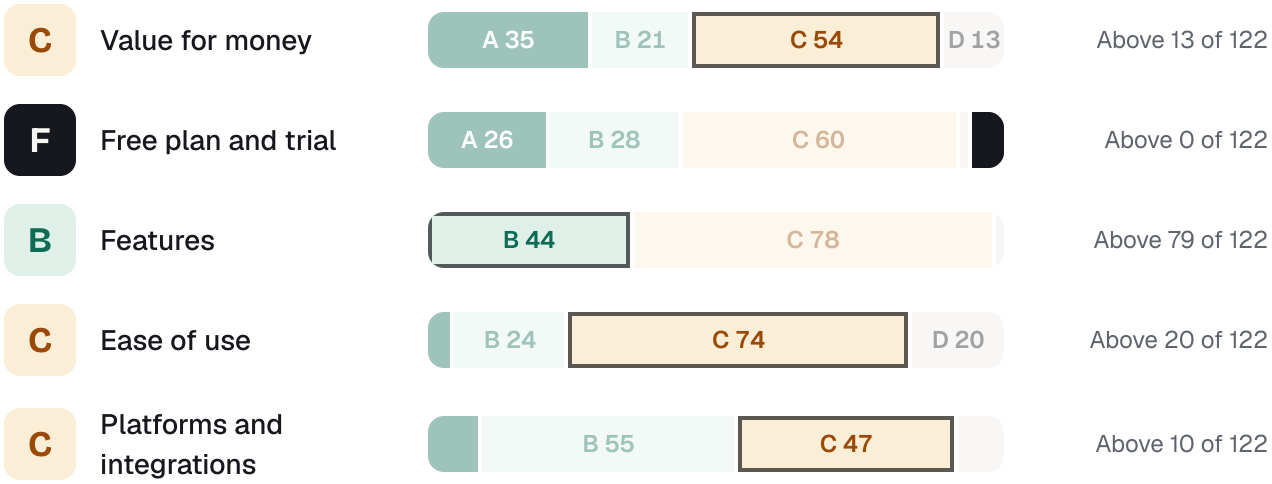

It stands best on features (B, above 79 of 122) and worst on free plan and trial (F, above 0).

Its paid plans start at about $3.63 a month, against a middle price of $4.92 for the category: 28 of the 76 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 17 tools score higher and cost less.

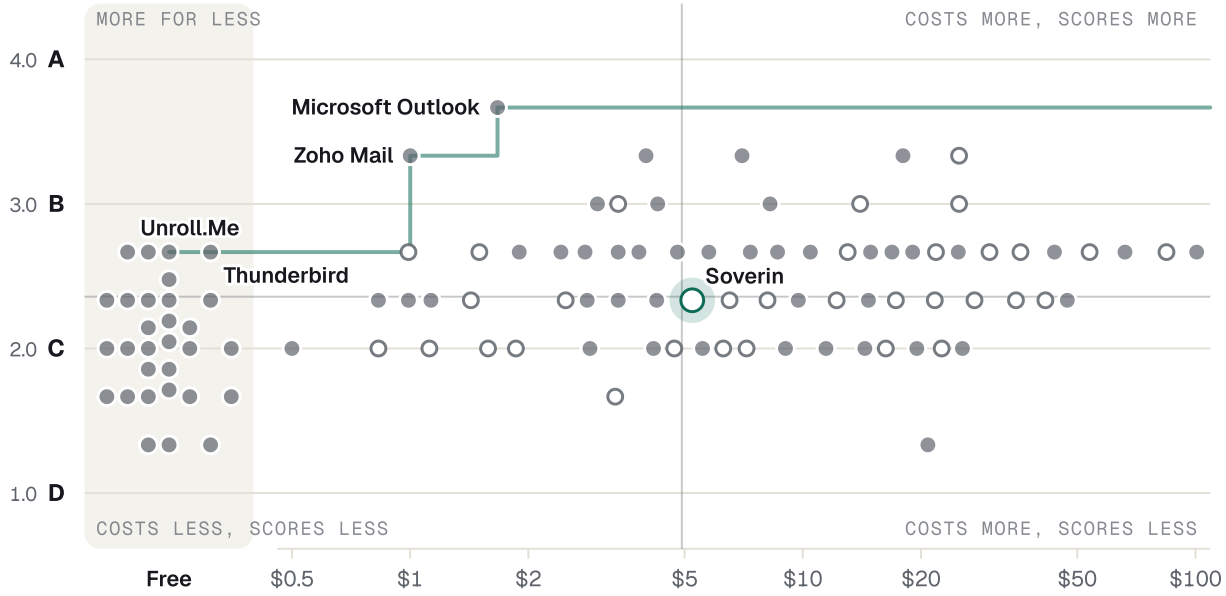

Each grade against the category

Every bar is all 123 email apps we grade, cut by the letter each got. Soverin's own letter is outlined.

Price against what you get

Each dot is one of 107 email apps. Further left costs less; higher up scores better on features, ease of use and platforms. Soverin is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Soverin you would be making an email client: sending, receiving, threading and searching years of mail. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 112 of the 122 other email apps grade higher. It costs $43.57 a year.

What you could make

- Calendar: an app builder makes this well.

What you could not

- An email client: sending, receiving, threading and searching years of mail.

- It plugs into other products, Apple Mail, Microsoft Outlook and Thunderbird among them.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Soverin's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
