Where it stands

Its grades against its category, and whether to keep it or make your own

32/85

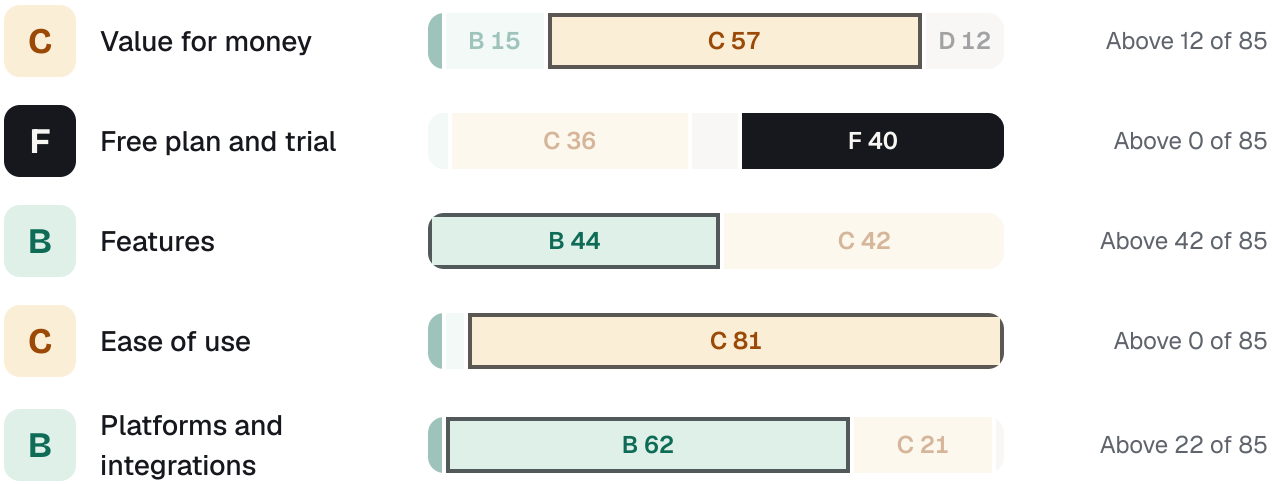

Other salon, spa and studio booking apps it is graded above

SpaSoft's GPA of 2.0 is higher than 32 of the 85 other salon, spa and studio booking apps we grade, and level with 15.

It stands best on features (B, above 42 of 85) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 86 salon, spa and studio booking apps we grade, cut by the letter each got. SpaSoft's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of SpaSoft you could make: appointment booking, class booking, inventory, reports and forms. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

What you could make

- Appointment booking, class booking, inventory, reports and forms: an app builder makes these well.

What you could not

- It plugs into other products, Oracle Hospitality, Agilysys and Infor among them.
- What a company asks for before it lets staff use something: roles and permissions.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. SpaSoft's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
