PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

64/72

Other AI voice generators it is graded above

Speechma's GPA of 2.6 is higher than 64 of the 72 other AI voice generators we grade, and level with 2.

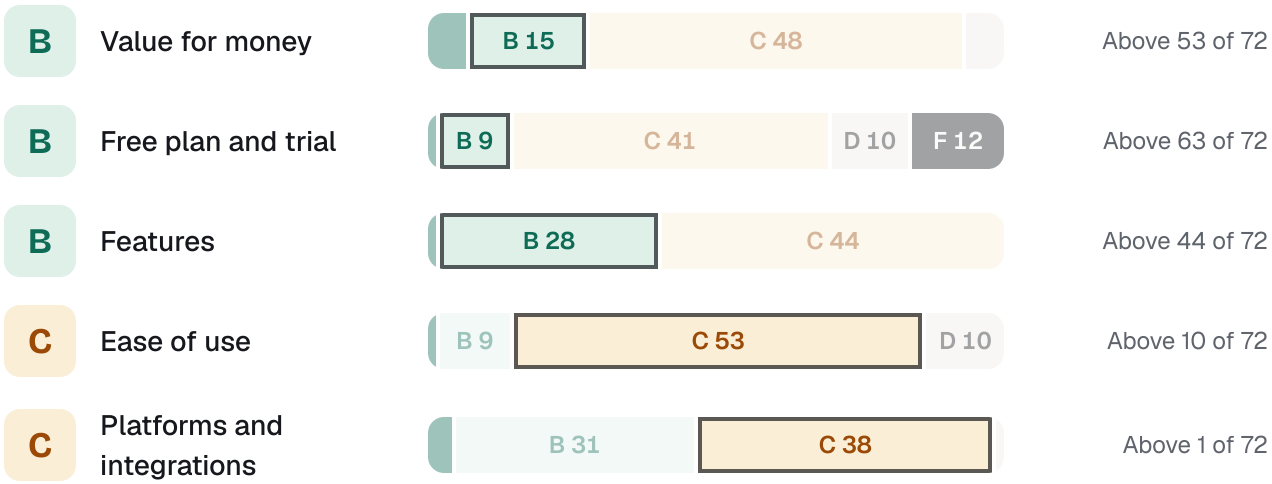

It stands best on free plan and trial (B, above 63 of 72) and worst on platforms and integrations (C, above 1).

Its paid plans start at $4.40 a month, against a middle price of $9.99 for the category: 3 of the 50 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

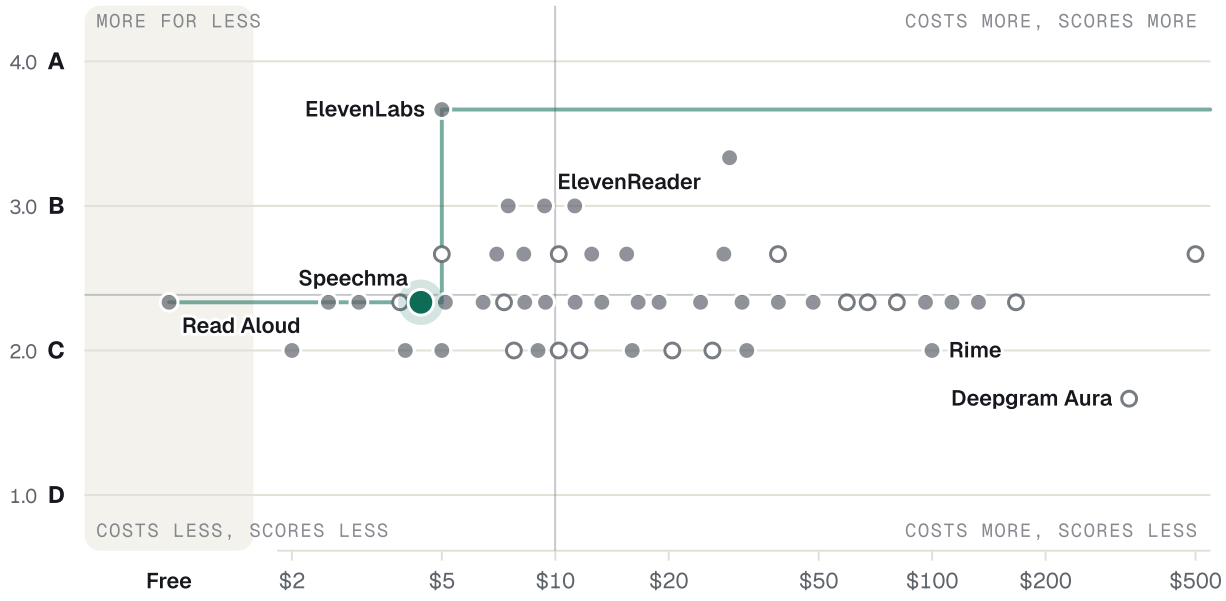

Each grade against the category

Every bar is all 73 AI voice generators we grade, cut by the letter each got. Speechma's own letter is outlined.

Price against what you get

Each dot is one of 52 AI voice generators. Further left costs less; higher up scores better on features, ease of use and platforms. Speechma is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Speechma you would be making a voice model, which you can rent by the minute but not make. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.6 is higher than 64 of the 72 other AI voice generators we grade. It costs $52.80 a year.

What you could not

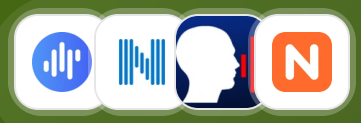

- ✕ A voice model, which you can rent by the minute but not make.
- ✕ A voice model trained on your recordings.

- ✕ Speech turned into text you can trust.
- ✕ A real app for Android. Something home-made would be a web page.
- ✕ An API that other software can build on.
- ✕ AI features, unless you pay a model provider for each request yourself.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Speechma's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
