PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

14/133

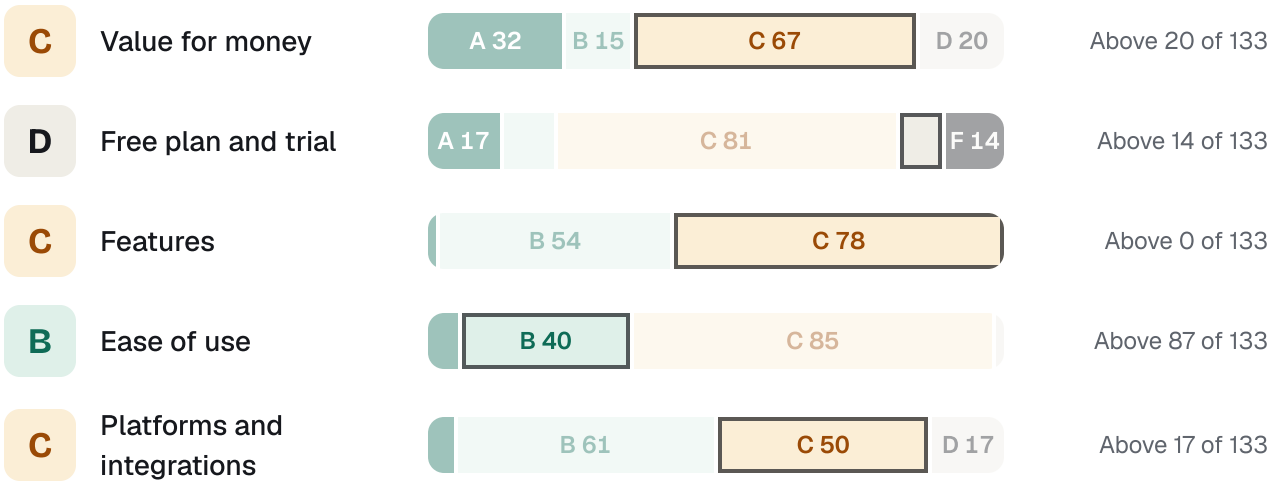

Other screen recording and video tools it is graded above

Splice's GPA of 2.0 is higher than 14 of the 133 other screen recording and video tools we grade, and level with 27.

It stands best on ease of use (B, above 87 of 133) and worst on free plan and trial (D, above 14).

Each grade against the category

Every bar is all 134 screen recording and video tools we grade, cut by the letter each got. Splice's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Splice you would be making a video editor. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 92 of the 133 other screen recording and video tools grade higher.

What you could not

- A video editor.
- Storing and serving files for other people.
- A real app for iOS and Android. Something home-made would be a web page.

What this rests on. Splice's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
