What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Ssemble you would be making a video editor. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 106 of the 168 other AI image and video generators grade higher. It costs $72 a year.

What you could not

- ✕ A video editor.
- ✕ Speech turned into text you can trust.
- ✕ It plugs into other products, TikTok, YouTube and Instagram among them, and has an API.

- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Ssemble's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
