Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 4 of the 49 other shift scheduling apps we grade

StaffAny is workforce management software for restaurants and other food and beverage businesses in Southeast Asia. It covers shift scheduling, an on-site time clock, timesheets and leave. Payroll, an applicant tracking system and staff rewards are sold as add-ons, and the pages mention Singapore grant support.

To get you started, here are **7 things to know about StaffAny**, taken from its own pages and our grades.

4 **Auto-scheduling**

The Scale plan adds auto-scheduling, sales per labor hour (SPLH) and target manpower figures.

5 **Time clock**

Geofenced and QR clock-in, GPS with a photo, and a web time clock on every plan; WiFi clock-in begins on Growth.

6 **A 1.8 GPA, above 4 of 49**

That is against the other shift scheduling apps we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace StaffAny you would be making payroll taxes worked out and filed with the government for you. That is not a weekend's work, with an AI app builder or without one.

What it works with

Lark

StaffAny is made by StaffAny.

Where it stands

Its grades against its category, and whether to keep it or make your own

4/49

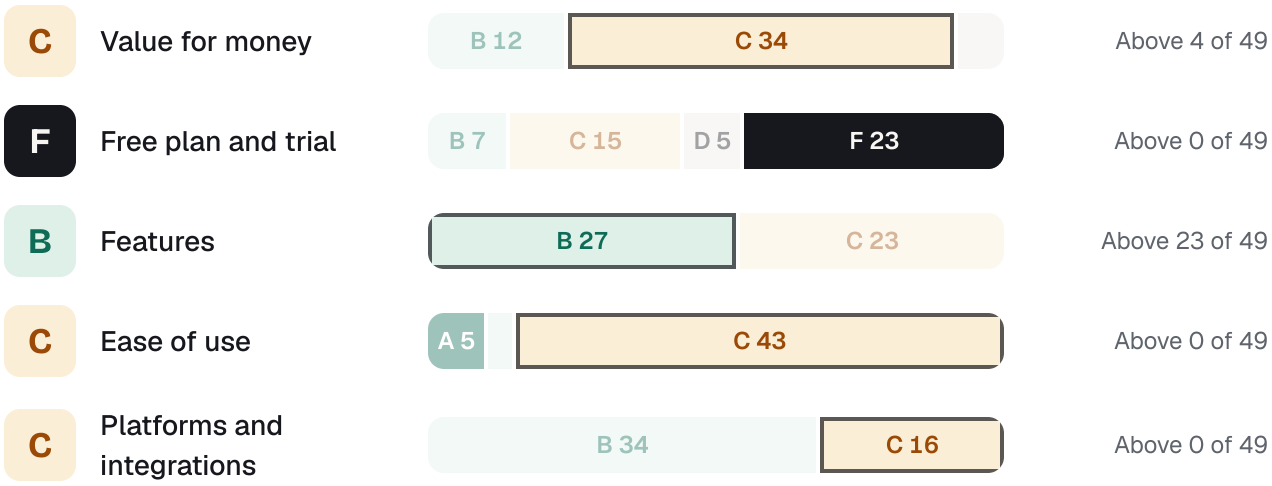

Other shift scheduling apps it is graded above

StaffAny's GPA of 1.8 is higher than 4 of the 49 other shift scheduling apps we grade, and level with 12.

It stands best on features (B, above 23 of 49) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 50 shift scheduling apps we grade, cut by the letter each got. StaffAny's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace StaffAny you would be making payroll taxes worked out and filed with the government for you. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 33 of the 49 other shift scheduling apps grade higher.

What you could make

- Time off, applicant tracking and reports: an app builder makes these well.

What you could not

- Payroll taxes worked out and filed with the government for you.
- A rota the whole staff sees on their phones, with swaps and alerts.
- Clocking in from a phone, checked against where and when.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. StaffAny's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
