Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Stallion Express is free, so making your own would save you nothing.

And it is not the kind of software a weekend replaces. It is one of the better ones too: its GPA of 2.6 is higher than 62 of the 80 other shipping software we grade.

What you could not

- ✕ Discounted carrier rates and labels, which take an agreement with each carrier.
- ✕ Connections to other products, each kept working as those products change.

What this rests on. Stallion Express's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
