Welcome

What it is, who it suits, its grades and the ten things to know first

2.6

GPA, above 132 of the 168 other AI image and video generators we grade

Starryai is an AI image generator on the web, iPhone, iPad and Android that turns a prompt into art, anime or photoreal images in hundreds of styles, and makes short videos. Images are paid for with Lumens, and Unlimited Pro plans keep generating at slow speed once the Lumens run out. A public feed shows each image with its prompt and style so others can recreate it.

To get you started, here are **9 things to know about Starryai**, taken from its own pages and our grades.

> **Lumens, styles, slow mode and different costs per setting take a few tries to get the hang of.**
>
> From our grade for ease of use

1 **Best for phone-first AI art with daily free images**

Free accounts get daily images, but edits, video and bigger upscales always cost Lumens, and the Pro prices are in-app prices.

2 **Paid plans start at $21.62 a month**

As its pricing page puts it: $4.99 per week (Starter Pro Weekly, US App Store in-app price).

3 There is a free plan

A free account with daily free images and no watermark; new accounts are topped up with 5 Lumens, and 1 Lumen makes 4 images at base settings.

4 It runs on 3 platforms

Web, iOS and Android.

5 Prompt to image in many styles

Type a prompt, pick a style or none, and add reference images to guide style, face or composition. Photoreal images and edits use Nano Banana.

6 Short video generation

Make 10-second videos with the Nova Ultra model. Video always costs Lumens, including on Unlimited plans.

7 Custom styles

Train a style on your own set of images, then use it privately or publish it to your profile for others.

8 A 2.6 GPA, above 132 of 168

That is against the other AI image and video generators we grade, on value, the free plan, features, ease of use and platforms.

9 Keep it

To replace Starryai you would be making an image model, which you can rent by the picture but not make. That is not a weekend's work, with an AI app builder or without one.

- ✗ Watch out: upscaled and enhanced images are deleted after 7 days, and edited images aren't saved
- ✗ Pricey if you pay weekly, at $4.99 a week against $11.99 a month
- ✗ Watch out: web plan prices show only after sign-in, so these are the US App Store prices
- ✗ Skip it if you need a desktop app or an API, as neither is listed

Good to know

Good for

- ✓ Casual creators making art on a phone
- ✓ Heavy users who want unlimited standard images at slow speed
- ✓ Learning prompts by remixing what others have posted
- ✓ Artists who want to train a style on their own work

Worth knowing

- ⓘ Web plan prices are shown only after signing in; the plans here are the US App Store's in-app prices.
- ⓘ Unlimited plans cover standard generation only; edits, transformations, video and 8x or 16x upscales always use Lumens.
- ⓘ Upscaled and enhanced images are deleted after 7 days, and edited images are not saved, so they must be downloaded at once.
- ⓘ Web purchases can be refunded within 7 days if under 5% of the Lumens were used; app purchases go through Apple or Google.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Starryai you would be making an image model, which you can rent by the picture but not make. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.6 is higher than 132 of the 168 other AI image and video generators we grade. It costs $259.48 a year.

What you could not

- ✕ An image model, which you can rent by the picture but not make.
- ✕ A video model, which you can rent by the second but not make.

- ✕ A members' space with posts, chat and events that people keep coming back to.
- ✕ A real app for iOS and Android. Something home-made would be a web page.
- ✕ AI features, unless you pay a model provider for each request yourself.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Starryai's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
