Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 42 of the 80 other shipping software we grade

Starshipit connects an online store to more than 60 couriers so labels, tracking and customer notifications run from one place. Rules pick a carrier, validate addresses and print documents. Plans are priced by monthly label volume, with no per-label fee on top of the carrier's own rates.

To get you started, here are **9 things to know about Starshipit**, taken from its own pages and our grades.

> "
>
> **You connect your store and carriers and write rules, so it is a C.**
>
> From our grade for ease of use

1 **Best for multi-carrier labels and tracking pages**

Plans are tied to label volume, live rates, returns and pick-and-pack are paid add-ons, and charges are in Australian dollars.

2 **Paid plans start at $27 a month**

As its pricing page puts it: $27 per month for up to 100 labels, billed annually ($35 billed monthly).

3 **You can try it first**

30-day free trial, no credit card required

4 **It runs on 3 platforms**

Web, iOS and Android.

5 Multi-carrier labels

Connects a store to 60+ couriers, compares rates and prints labels using the seller's own carrier accounts and rates.

6 Automation rules

Rules choose the carrier, validate addresses and produce packing slips, manifests and customs documents. Starter allows 3 rules and Enterprise is unlimited.

7 Tracking and notifications

Branded tracking pages and shipping notifications keep customers informed; advanced versions start on the Professional plan.

8 A 2.2 GPA, above 42 of 80

That is against the other shipping software we grade, on value, the free plan, features, ease of use and platforms.

9 Keep it

To replace Starshipit you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Starshipit is for

- ✓ Fits if you ship under 100 parcels a month and want branded tracking
- ✓ Works for stores that sell on Shopify or WooCommerce and use several carriers

Who it is not for

- ✕ Tight if you want more rules: 3 on Starter and 5 on Professional
- ✕ Pricey if you add extras: live rates $30, returns $20 and pick and pack $100 a month
- ✕ Watch out: charges are in Australian dollars and the dollar amounts shown are converted
- ✕ Watch out: going over your label limit means moving up a plan

Good to know

Good for

- ✓ Online retailers that want one tool across many couriers
- ✓ Brands in Australia and New Zealand adding US or international carriers
- ✓ 3PLs and multi-brand operators that need several accounts under one login

Worth knowing

- ⓘ The pricing page notes that charges are made in Australian dollars, so the dollar amounts shown are a displayed conversion.
- ⓘ Paid add-ons include live rates ($30 a month), a returns portal ($20) and the pick and pack app ($100), billed in AUD.
- ⓘ Starter plans are capped at 3 automation rules and Professional at 5.
- ⓘ Plans are tied to monthly label volume, so volume above a plan's limit means moving to the next tier.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

42/80

Other shipping software it is graded above

Starshipit's GPA of 2.2 is higher than 42 of the 80 other shipping software we grade, and level with 6.

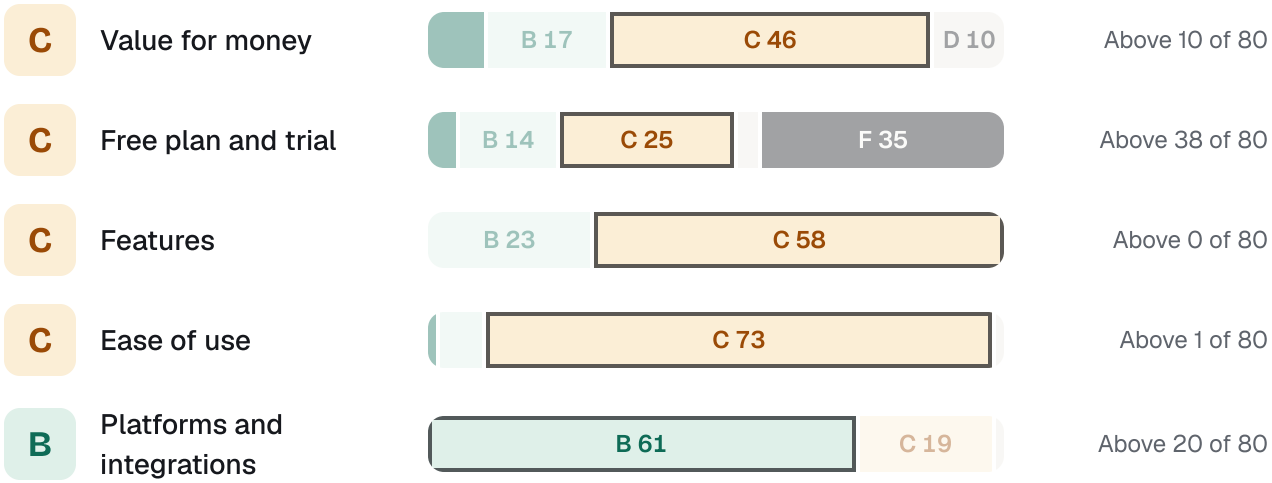

It stands best on platforms and integrations (B, above 20 of 80) and worst on features (C, above 0).

Its paid plans start at $27 a month, against a middle price of $19.99 for the category: 21 of the 35 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 9 tools score higher and cost less.

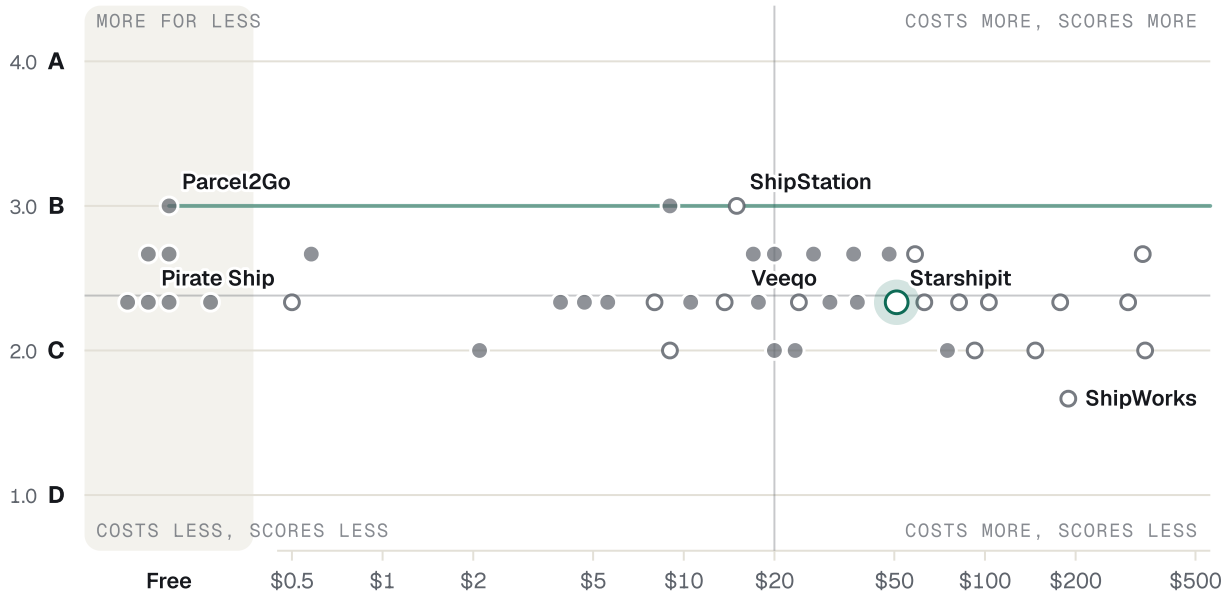

Each grade against the category

Every bar is all 81 shipping software we grade, cut by the letter each got. Starshipit's own letter is outlined.

Price against what you get

Each dot is one of 43 shipping software. Further left costs less; higher up scores better on features, ease of use and platforms. Starshipit is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Starshipit you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

It costs $324 a year.

What you could make

- Inventory and reports: an app builder makes these well.

What you could not

- Discounted carrier rates and labels, which take an agreement with each carrier.

- Connections to other products, each kept working as those products change.
- Scanning barcodes with a phone camera or a scanner.
- A real app for iOS and Android. Something home-made would be a web page.

What this rests on. Starshipit's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
