Static Forms gives a website a single endpoint that screens submissions for spam and delivers them by email and to a dashboard inbox. Paid plans add webhooks, chat alerts, file uploads, form rules and connections to spreadsheet and database tools. Data can be stored in Frankfurt by choosing the EU at signup.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace StaticForms you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.6 is higher than 116 of the 148 other form and survey tools we grade. It costs $48 a year.

What you could make

- Forms: an app builder makes this well.

What you could not

- Connections to other products, each kept working as those products change.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. StaticForms's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
