PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

6/60

Other browsers it is graded above

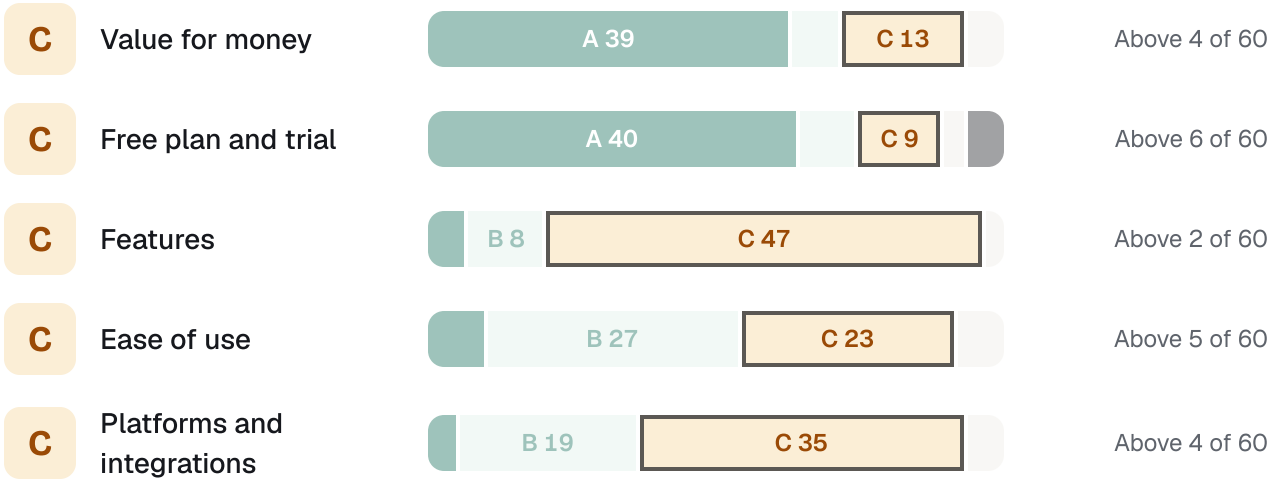

Strawberry Browser's GPA of 2.0 is higher than 6 of the 60 other browsers we grade, and level with 5.

Its paid plans start at $20 a month, against a middle price of $9.50 for the category: 16 of the 19 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 31 tools score higher and cost less.

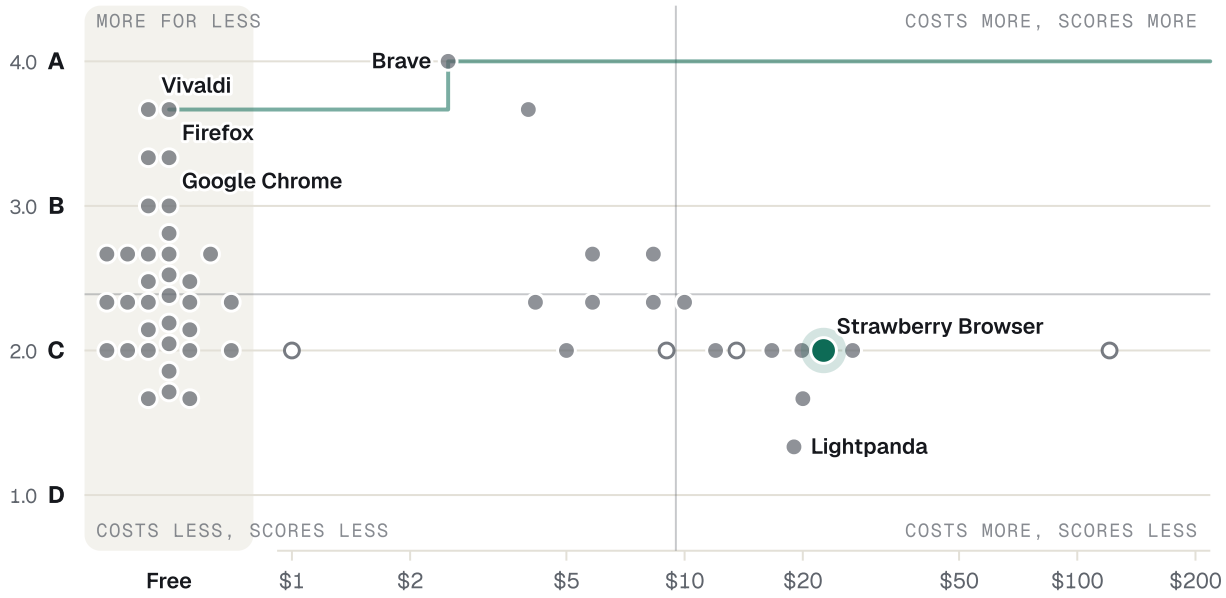

Each grade against the category

Every bar is all 61 browsers we grade, cut by the letter each got. Strawberry Browser's own letter is outlined.

Price against what you get

Each dot is one of 54 browsers. Further left costs less; higher up scores better on features, ease of use and platforms. Strawberry Browser is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Strawberry Browser you would be making a web browser. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 49 of the 60 other browsers grade higher. It costs $240 a year.

What you could not

- ✕ A web browser.
- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ A bot that joins your calls and turns the talk into notes.

- ✕ Connections to other products, each kept working as those products change.
- ✕ A real app for macOS and Windows. Something home-made would be a web page.

What this rests on. Strawberry Browser's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
