Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 14 of the 149 other project management tools we grade

Streamtime is project management software for creative businesses such as agencies, in-house design teams and architects. It covers job planning, scheduling and time tracking, quoting and invoicing, and profitability reporting in one tool. It also offers a Kanban view of jobs and an iOS app.

To get you started, here are **7 things to know about Streamtime**, taken from its own pages and our grades.

> **It publishes no prices at all: you get a quote built from team size, freelancers and revenue.**
>
> From our report card of Streamtime

1 **Best for creative agencies that quote, schedule and invoice jobs**

Streamtime handles job planning, scheduling, time tracking, quoting and invoicing for creative agencies, with an iOS app.

2 **It runs on 2 platforms**

Web and iOS.

3 **Job planning with rates and timelines**

Jobs are set up with rates, teams, timelines and planned profit, and progress is followed on a burn-up chart.

4 **Scheduling and time tracking**

Drag-and-drop planning shows availability, including unscheduled hours, and the vendor says time is tracked without timesheets.

5 **Quoting and invoicing**

Job plans turn into quotes and invoices, with expenses rolled into the bill, and sync to Xero, QuickBooks or MYOB AccountRight.

6 **A 2.0 GPA, above 14 of 149**

That is against the other project management tools we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

The plain part of Streamtime you could make: time tracking, kanban boards, invoicing, quotes and estimates and reports. What surrounds it you could not. The 4 things listed below take a company, not a weekend.

The report card

Best for creative agencies that quote, schedule and invoice jobs

Streamtime handles job planning, scheduling, time tracking, quoting and invoicing for creative agencies, with an iOS app. It publishes no prices at all: you get a quote built from team size, freelancers and revenue.

TOOLGPA REPORT CARD **Streamtime** Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published. A quote is built from team size, freelancers and annual revenue, and the vendor says there is no fixed per-user fee.
Free plan and trial	F	No free plan and no trial is listed anywhere on the pricing page.
Features	B	Job planning, scheduling, time tracking, quoting, invoicing, reports and a Kanban board, with nothing in the listing missing for an agency's workflow.
Ease of use	C	No store rating on record. Agencies build job templates and connect accounting first, which takes some setup.
Platforms and integrations	B	Web and iOS apps with Xero, QuickBooks, MYOB, Slack, Google Calendar, Jira, Zapier, Outlook and an API. No Android app.

Grade point average Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Streamtime is for

- ✓ Fits if you run a design or marketing agency and bill by the job
- ✓ Works for teams on Xero, QuickBooks or MYOB who want invoices tied to jobs

Who it is not for

- ✕ Skip it if you want to see a price first, as none is published
- ✕ Not for you if you use Android, since only an iOS app is mentioned
- ✕ Watch out: accounting syncs cover Xero, QuickBooks and MYOB AccountRight only
- ✕ Too light for general teams, as it is built around creative agency jobs
- ✕ Tight if you want a free start, as no plan or trial is listed

Good to know

Good for

- ✓ Creative agencies and design studios that quote and invoice by job
- ✓ In-house creative teams tracking capacity and profitability
- ✓ Architects and other professional-services teams scheduling billable time

Worth knowing

- ⓘ No prices are published: the pricing page builds a quote from team size, freelancers and annual revenue, so pricing is recorded as unverified.
- ⓘ The vendor says it does not charge a fixed per-user fee, so the cost depends on your usage.
- ⓘ The FAQ recommends the latest Chrome for best performance; only an iOS app is mentioned, with no Android app.
- ⓘ Native accounting syncs cover Xero, QuickBooks and MYOB AccountRight only.

What it costs

Job planning with rates and timelines

Jobs are set up with rates, teams, timelines and planned profit, and progress is followed on a burn-up chart.

Scheduling and time tracking

Drag-and-drop planning shows availability, including unscheduled hours, and the vendor says time is tracked without timesheets.

Quoting and invoicing

Job plans turn into quotes and invoices, with expenses rolled into the bill, and sync to Xero, QuickBooks or MYOB AccountRight.

Reporting

Reports cover utilization, profitability and job cost recovery, can be filtered and customized, and export with a click.

Kanban board

A Kanban board tracks every job stage and shows sell totals and status for each job.

AI assistant connector

An MCP connector lets assistants such as Claude, ChatGPT and Copilot read hours and create jobs; quotes and invoices land as drafts.

Streamtime is made by Streamtime Australia Pty Ltd, and has been around since 2002.

Where it stands

Its grades against its category, and whether to keep it or make your own

14/149

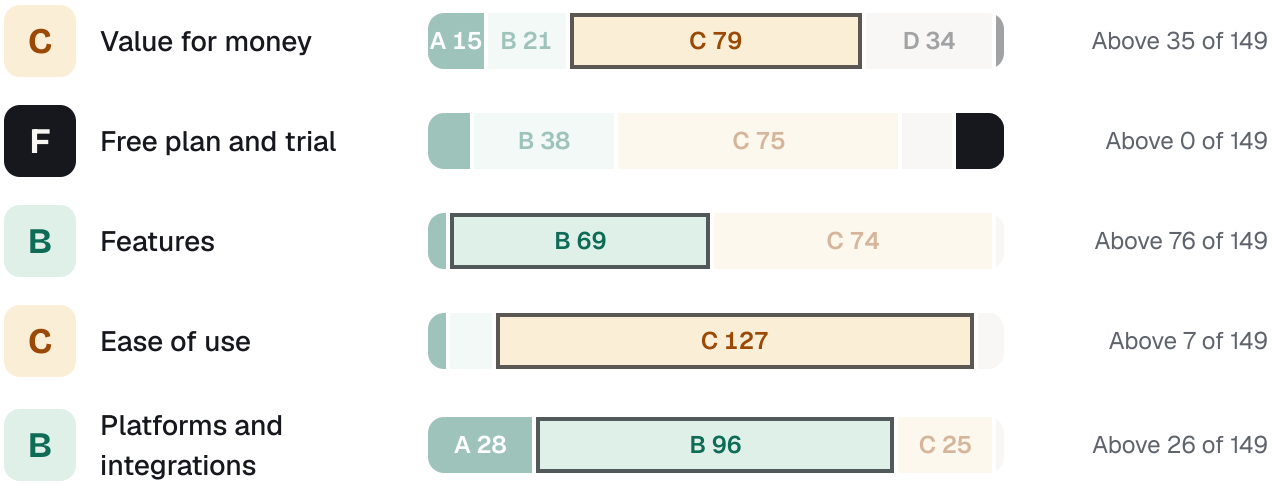

Other project management tools it is graded above

Streamtime's GPA of 2.0 is higher than 14 of the 149 other project management tools we grade, and level with 23.

It stands best on features (B, above 76 of 149) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 150 project management tools we grade, cut by the letter each got. Streamtime's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Streamtime you could make: time tracking, kanban boards, invoicing, quotes and estimates and reports. What surrounds it you could not. The 4 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 112 of the 149 other project management tools grade higher.

What you could make

- Time tracking, kanban boards, invoicing, quotes and estimates and reports: an app builder makes these well.

What you could not

- Connections that pull numbers from dozens of other services.
- A real app for iOS. Something home-made would be a web page.
- It plugs into other products, Xero, QuickBooks and MYOB AccountRight among them, and has an API.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Streamtime's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
