Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 6 of the 91 other file storage and sync services we grade

Suite Studios is cloud storage built for creative teams that work with large video and image files. Files are streamed to a desktop app and appear as a local drive instead of being synced in full. It is sold per terabyte, with a bring-your-own-storage option on the Enterprise tier.

To get you started, here are **9 things to know about Suite Studios**, taken from its own pages and our grades.

> "
>
> **You mount drives and set up users and bandwidth.**
>
> From our grade for ease of use

1 **Best for cloud storage for large media files**

That is many times what general storage costs, and there is no free plan and no phone app.

2 **Paid plans start at $75 a month**

As its pricing page puts it: $75 per TB / month.

3 **You can try it first**

14-day free trial of the Managed plan

4 **It runs on 3 platforms**

macOS, Windows and Linux.

5 **File streaming**

Files open from a mounted drive and are fetched as needed, so large media does not have to be downloaded in full first.

6 **Suite Connect transfers**

Send files to people outside the team through Suite Connect, which is included on both plans.

7 **Multiple drives and bandwidth limits**

Managed accounts can create several Suite drives and cap how much bandwidth the app uses.

8 **A 1.8 GPA, above 6 of 91**

That is against the other file storage and sync services we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Suite Studios you would be making files kept in step across devices without losing one. That is not a weekend's work, with an AI app builder or without one.

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	D	$75 per TB a month with 5 users, and $10 for each extra user. General storage plans typically cost around $7 a month, so this is far above the category.
Free plan and trial	C	A 14-day free trial of the Managed plan is the only free offer; the page does not say whether a card is needed.
Features	C	File streaming, multiple drives, bandwidth limits, transfers to outsiders and encryption. S3 access, SSO and bring-your-own-storage sit on Enterprise.
Ease of use	C	No rating on record. You mount drives and set up users and bandwidth.
Platforms and integrations	C	Desktop apps for Mac, Windows and Linux with Amazon S3 access. No phone apps are listed.

Grade point average — Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Suite Studios is for

- ✓ Fits if you edit video straight from a cloud drive
- ✓ Works for teams that share big files with outside clients through Suite Connect

Who it is not for

- ✕ Pricey if you just need general storage: $75 a TB a month
- ✕ Skip it if you want a free plan, as there isn't one
- ✕ Watch out: users beyond five cost $10 each a month
- ✕ Not for you if you need a phone app, since none is listed
- ✕ Tight if you need SSO or your own storage, which are Enterprise with no published price

Good to know

Good for

- ✓ Video and creative teams moving very large project files
- ✓ Teams that want to put their own S3 storage behind a shared drive
- ✓ Small crews that can start with five included users

Worth knowing

- ⓘ There is no free plan; storage is billed by the terabyte from $75 a month.
- ⓘ Users beyond the first five cost $10 each per month on Managed.
- ⓘ The download page lists macOS, Windows and Linux apps; no mobile apps are listed.
- ⓘ Bring-your-own-storage, SSO and SCIM are Enterprise features with no published price.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

6/91

Other file storage and sync services it is graded above

Suite Studios's GPA of 1.8 is higher than 6 of the 91 other file storage and sync services we grade, and level with 6.

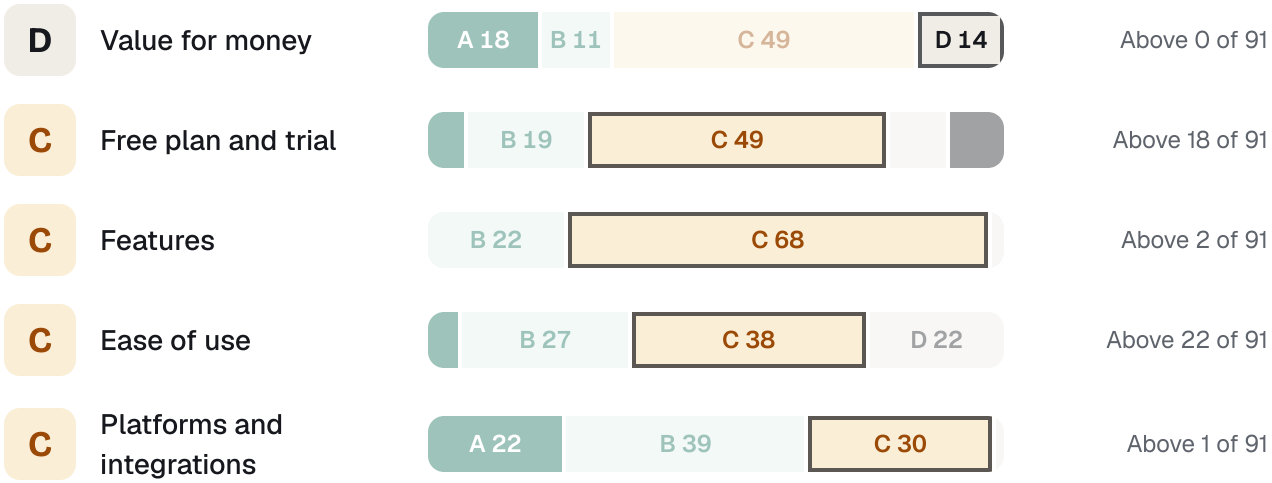

It stands best on ease of use (C, above 22 of 91) and worst on value for money (D, above 0).

Its paid plans start at $75 a month, against a middle price of $6.64 for the category: 58 of the 60 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 49 tools score higher and cost less.

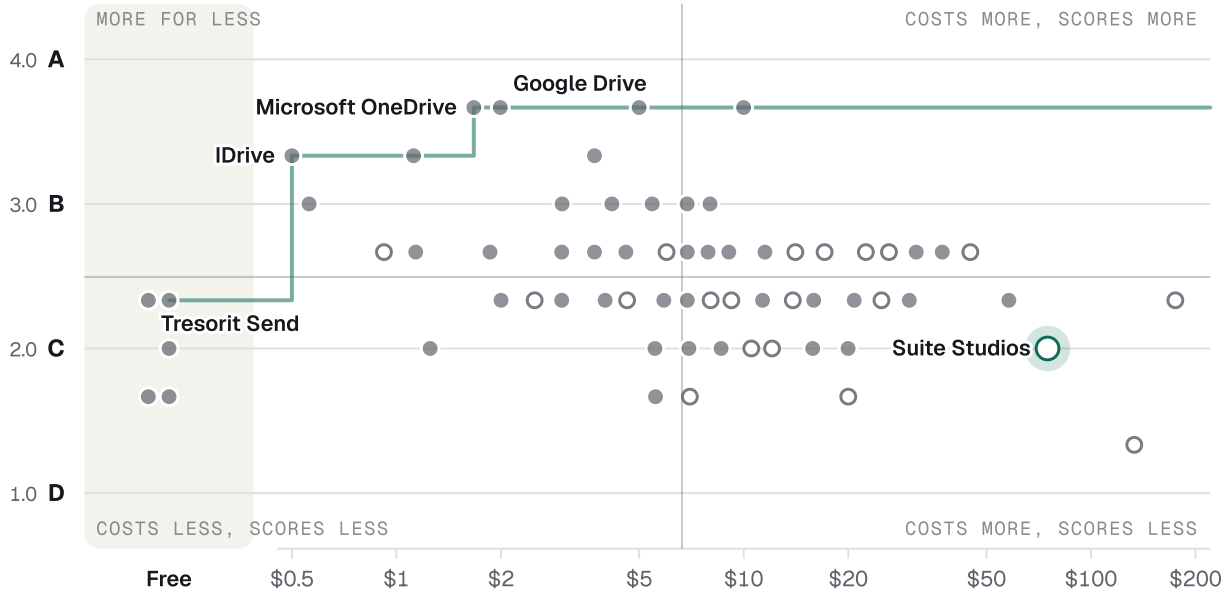

Each grade against the category

Every bar is all 92 file storage and sync services we grade, cut by the letter each got. Suite Studios's own letter is outlined.

Price against what you get

Each dot is one of 66 file storage and sync services. Further left costs less; higher up scores better on features, ease of use and platforms. Suite Studios is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Suite Studios you would be making files kept in step across devices without losing one. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 79 of the 91 other file storage and sync services grade higher. It costs $900 a year.

What you could not

- ✕ Files kept in step across devices without losing one.
- ✕ Storing and serving files for other people.

- ✕ Apps for macOS, Windows and Linux that stay in step with each other.
- ✕ What a company asks for before it lets staff use something: single sign-on and SCIM.

What this rests on. Suite Studios's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
