07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Sully AI's own pages, its app-store listings and our grades. Every fact in it is on Sully AI's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 30 of the 178 other AI agents we grade

Sully is a set of AI agents for clinics and health systems. The Receptionist answers calls and schedules appointments, the Scribe turns visit conversations into structured notes, the Medical Coder suggests billing codes, and a Consultant drafts clinical plans. It writes back to the major electronic health record systems.

To get you started, here are **7 things to know about Sully AI**, taken from its own pages and our grades.

> "
>
> **No store rating on record, and an EHR connection has to be set up with the vendor.**

From our grade for ease of use

1 **Best for AI front desk and note-taking for medical clinics**

Sully is a set of AI assistants for clinics: a receptionist, a note scribe, a medical coder and a consultant, tied into named EHRs.

2 **It runs on Web**

Web.

3 **Receptionist**

Answers calls, coordinates appointments and helps patients reach the right care team, with a dashboard of scheduling and call activity.

4 **Scribe**

Turns visit conversations into structured clinical notes that the clinician reviews and finalizes.

5 **Medical Coder**

Suggests codes from clinical documentation, each linked to the supporting line in the note, with final review kept with the billing team.

6 **A 1.8 GPA, above 30 of 178**

That is against the other AI agents we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Sully AI you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for AI front desk and note-taking for medical clinics

Sully is a set of AI assistants for clinics: a receptionist, a note scribe, a medical coder and a consultant, tied into named EHRs. There is no published price or trial, coding output and clinical plans are drafts someone must review, and one of the agents is still in beta.

TOOLGPA REPORT CARD	Sully AI	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	C	No price is published and access starts with a demo request, so it stays at the ordinary grade.
Free plan and trial	F	No free plan and no trial terms are listed.
Features	C	Receptionist, scribe, coder and consultant. Coding and clinical plans are drafts that a clinician or billing team has to check, and a Researcher agent is marked beta.
Ease of use	C	No store rating on record, and an EHR connection has to be set up with the vendor.
Platforms and integrations	B	Web, with eight EHR connections named. Other systems are handled by talking to the vendor.
Grade point average		Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Sully AI is for

- ✓ Fits if your clinic uses one of the EHRs it connects to
- ✓ Works for practices that want the phones and the paperwork handled by the same vendor

Who it is not for

- ✗ Skip it if you want a price first, as access starts with a demo request
- ✗ Not for you if you want output you can file unchecked: coding and plans are drafts for review
- ✗ Watch out: the Researcher agent is marked beta
- ✗ Tight if your EHR is not on the list, because other systems mean a conversation with the vendor

Good to know

Good for

- ✓ Clinics that lose time to phone calls and scheduling
- ✓ Practices that want notes and billing codes drafted from each visit
- ✓ Health systems that need the output written back into their EHR

Worth knowing

- ⓘ No prices, plans or trial terms are published; access starts with a demo request.
- ⓘ Medical coding output and clinical plans are drafts that a clinician or billing team has to review.
- ⓘ A Researcher agent is marked as beta in the product view on the homepage.
- ⓘ Integrations cover named EHRs; other systems are handled by talking to the vendor about your setup.

What it costs

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

30/178

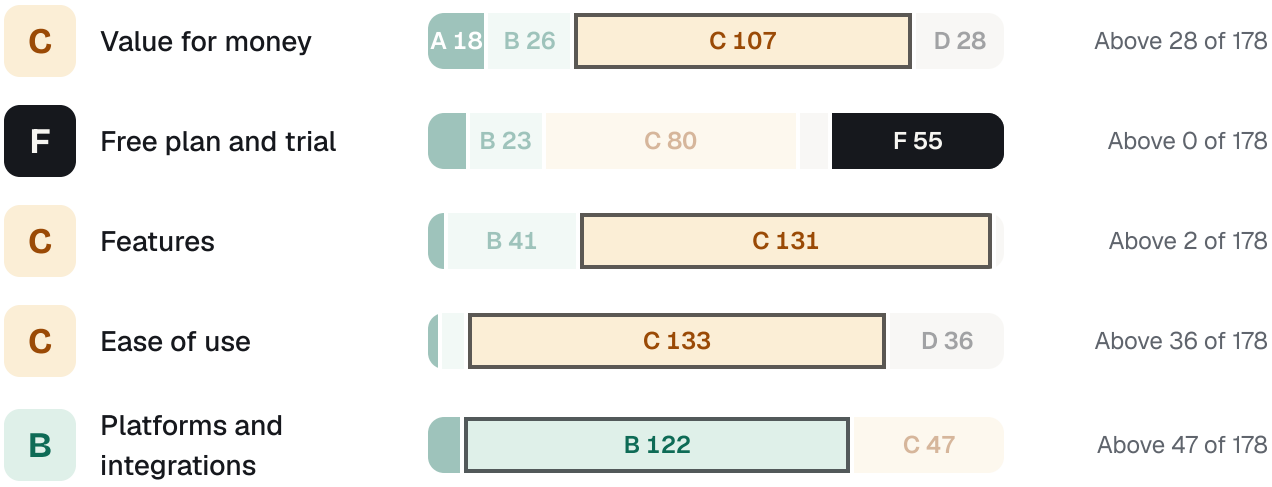

Other AI agents it is graded above

Sully AI's GPA of 1.8 is higher than 30 of the 178 other AI agents we grade, and level with 33.

It stands best on platforms and integrations (B, above 47 of 178) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 179 AI agents we grade, cut by the letter each got. Sully AI's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Sully AI you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 115 of the 178 other AI agents grade higher.

What you could make

- Clinical notes and appointment booking: an app builder makes these well.

What you could not

- An AI agent, with the models and the safeguards behind it.
- Insurance claims sent to payers through a clearinghouse.
- Speech turned into text you can trust.
- It plugs into other products, Epic, athenahealth and Cerner among them.

What this rests on. Sully AI's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
