Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 23 of the 61 other email verification and deliverability tools we grade

Suped collects and parses DMARC reports and shows which services send mail as a domain. It adds alerts, deliverability and blocklist monitoring, and hosted DNS records so authentication can be managed from a dashboard. Plans are priced by monthly email volume, with a free tier for one domain.

To get you started, here are **9 things to know about Suped**, taken from its own pages and our grades.

> **Hosted records, blocklist monitoring and SPF flattening need the Business plan, and API access and SSO are quote-only.**
>
> From our report card of Suped

1 **Best for DMARC monitoring on one or two domains**

Suped reads DMARC reports and has a free plan for one domain.

2 **Paid plans start at $19 a month**

As its pricing page puts it: $19 per month for 2 domains and 100,000 emails, billed annually ($24 billed monthly).

3 There is a free plan

1 domain, 1,000 emails a month, 14 days of data retention and unlimited users, no card required.

4 It runs on Web

Web.

5 DMARC report parsing

Raw XML aggregate reports are turned into a view of every sending source, with alerts when new senders appear or authentication rates drop.

6 Hosted DMARC, SPF, DKIM and MTA-STS

Records are managed from a dashboard instead of edited in DNS by hand. SPF flattening keeps a record under the 10-lookup limit.

7 BIMI setup and hosting

Suped prepares and hosts a BIMI logo and record on paid plans. Trademark registration and certificate services are quoted separately.

8 A 2.2 GPA, above 23 of 61

That is against the other email verification and deliverability tools we grade, on value, the free plan, features, ease of use and platforms.

Who Suped is for

- ✓ Fits if you have one domain and want to read DMARC reports for free
- ✓ Works for small teams, as every plan includes unlimited users

Who it is not for

- ✗ Tight if you send more than 1,000 emails a month, which is the free cap
- ✗ Skip it if you need an API, as that is limited to quote-only Enterprise and MSP
- ✗ Too light for hosted SPF, DKIM, MTA-STS and BIMI on Free, as those need Business
- ✗ Watch out: subdomains count toward the domain limit if they get DMARC reports or hosted records
- ✗ Watch out: free data retention is 14 days

Good to know

Good for

- ✓ IT teams moving a domain from DMARC monitoring to enforcement
- ✓ Small senders who need one domain monitored for free
- ✓ Agencies watching DMARC across many client domains (MSP plan)

Worth knowing

- ⓘ The Free plan covers 1 domain and 1,000 emails a month, with 14 days of data.
- ⓘ Hosted SPF, DKIM and MTA-STS, BIMI hosting and blocklist monitoring need the Business plan or higher.
- ⓘ API access and SAML SSO are limited to Enterprise and MSP, which are quoted on request.
- ⓘ Subdomains count toward the domain limit if they receive DMARC reports or use hosted records.
