07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Superblocks's own pages, its app-store listings and our grades. Every fact in it is on Superblocks's page too, where it is kept up to date. Checked Nov 12, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 11 of the 52 other AI app builders we grade

Superblocks is a platform for building internal apps and agents with an AI agent called Clark, while IT and security teams control integrations, permissions and infrastructure. It also provides sandboxed environments for running outside coding agents such as Claude, Codex, Cursor and Copilot. The Teams plan is sold on a flat monthly fee.

> "
>
> **It's a platform you set up with integrations, environments and permissions.**
>
> From our grade for ease of use

To get you started, here are **9 things to know about Superblocks**, taken from its own pages and our grades.

1 **Best for governed internal apps built by AI**

Superblocks is for companies that want AI-built internal apps under IT control.

2 **Paid plans start at $100 a month**

As its pricing page puts it: $100 per month for up to 15 builders, billed annually ($125 billed monthly).

3 **You can try it first**

14-day free trial of the Teams plan

4 **It runs on Web**

Web.

5 **Clark AI agent**

An AI agent for building internal apps, with a user memory, included in the Teams plan within a monthly allowance of Governed Agent Units.

6 **Integration gateway**

Governed access to business systems, with SSO and permissions managed in one place.

7 **Secure sandboxes**

Cloud development and production sandboxes where any coding agent or model can run in an environment IT controls.

8 **A 2.2 GPA, above 11 of 52**

That is against the other AI app builders we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Superblocks you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for governed internal apps built by AI

Superblocks is for companies that want AI-built internal apps under IT control. Teams is $100 a month for up to 15 builders with 100 agent units and 1 hosted app. There's a 14-day trial and no free plan, and SSO needs Enterprise.

TOOLGPA REPORT CARD

Superblocks

Graded Nov 12, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	$100 a month covers up to 15 builders, so $20 each for five, the category's middle. One person still pays the full $100.
Free plan and trial	C	No free plan, but a 14-day trial of Teams. The listing doesn't say if it needs a card.
Features	C	Clark agent, integration gateway, sandboxes and security checks. Extra apps and agent-unit packs cost more, and Enterprise holds VPC, SSO and audit logs.
Ease of use	C	No store rating on record. It's a platform you set up with integrations, environments and permissions.
Platforms and integrations	B	Web app with GitHub, GitLab, Bitbucket and Azure DevOps and with Claude, Codex, Cursor and Copilot.

Grade point average — Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Superblocks is for

- ✓ Makes sense if IT wants control over the internal apps its teams build
- ✓ Fits if you have up to 15 builders to put on one plan

Who it is not for

- ✗ Skip it if you want a free plan: only a 14-day trial exists
- ✗ Pricey if you're one person: Teams is $100 a month flat
- ✗ Watch out: Teams stops at 15 builders and 1 hosted app, then apps are $10 each a month
- ✗ Watch out: SSO, role-based access, audit logs and source control are Enterprise only

Good to know

Good for

- ✓ IT and security teams that want to govern apps built with AI
- ✓ Companies whose employees already build with coding agents
- ✓ Teams of up to 15 builders that want a flat fee

Worth knowing

- ⓘ Teams includes 100 Governed Agent Units a month and 1 hosted app; additional GAU packs and apps ($10 each a month) are extra.
- ⓘ Teams is capped at 15 builders.
- ⓘ VPC deployment, SSO, RBAC, audit logs and source control are Enterprise-only and priced through sales.
- ⓘ There is no free plan, only a 14-day trial.

PART 02 · PRICING

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$100

A month to start

Superblocks is a paid product with a free trial, starting at $100 per month for up to 15 builders, billed annually ($125 billed monthly).

> **The listing doesn't say if it needs a card.**
>
> From our grade for free plan and trial

TEAMS

$100

per month for up to 15 builders, billed annually ($125 billed monthly)

100 Governed Agent Units a month, the Clark AI agent and user memory, staging and production environments, 50+ integrations and 1 hosted app; extra apps are $10 a month.

ENTERPRISE

Custom

Adds VPC deployment, SSO, RBAC, audit logs, source control, secrets management, embedded apps, security scans, a dedicated account team and SLAs.

Superblocks is made by Superblocks.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

11/52

Other AI app builders it is graded above

Superblocks's GPA of 2.2 is higher than 11 of the 52 other AI app builders we grade, and level with 14.

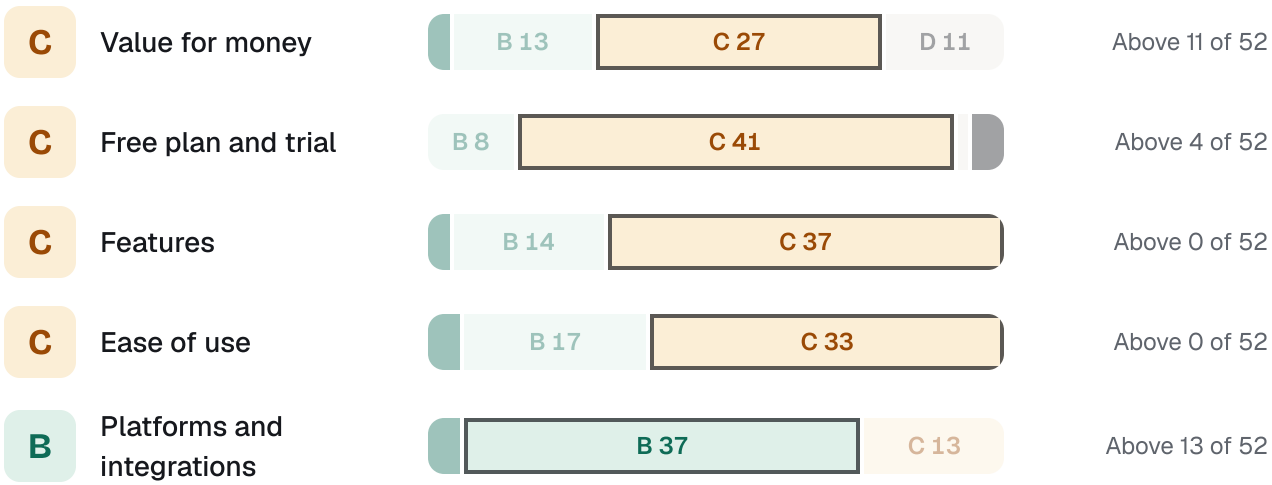

It stands best on platforms and integrations (B, above 13 of 52) and worst on features (C, above 0).

Its paid plans start at $100 a month, against a middle price of $20 for the category: 49 of the 50 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 23 tools score higher and cost less.

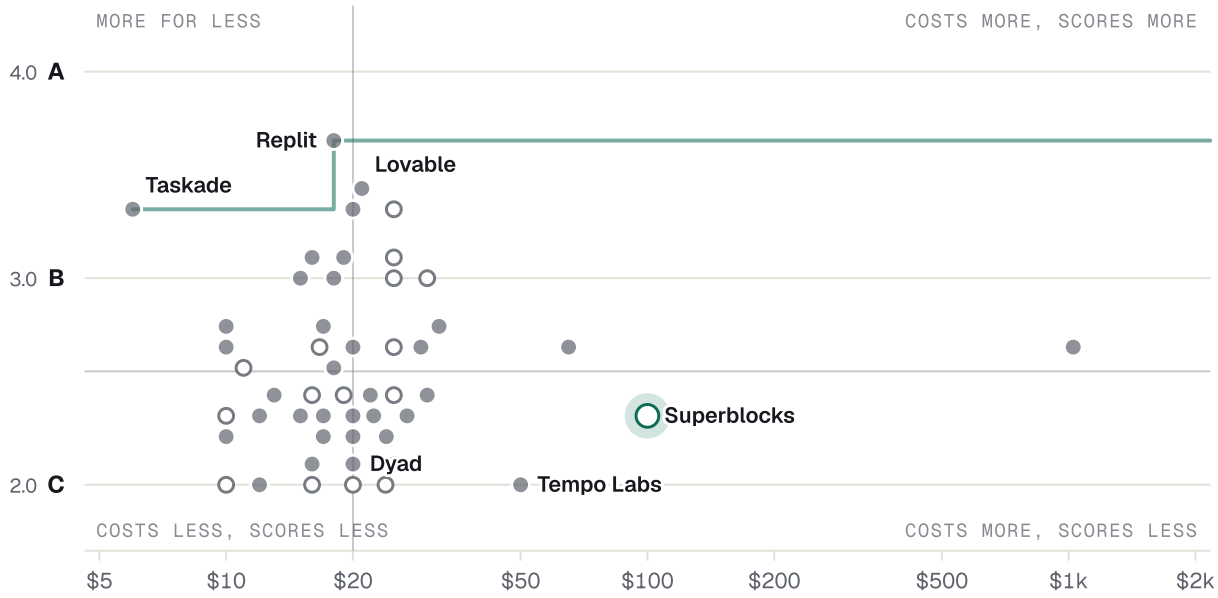

Each grade against the category

Every bar is all 53 AI app builders we grade, cut by the letter each got. Superblocks's own letter is outlined.

Price against what you get

Each dot is one of 51 AI app builders. Further left costs less; higher up scores better on features, ease of use and platforms. Superblocks is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Superblocks you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 27 of the 52 other AI app builders grade higher. It costs $1,200 a year.

What you could not

- ✕ A tool that builds and hosts other apps.
- ✕ An AI agent, with the models and the safeguards behind it.

- ✕ It plugs into other products, Claude, Codex and Cursor among them.
- ✕ What a company asks for before it lets staff use something: single sign-on and roles and permissions.

What this rests on. Superblocks's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Retool, Appsmith, UI Bakery, Base44 and Replit

The 5 tools Superblocks is most often weighed against, with where each one differs from it.

Retool

2.8 GPA

Free plan · from $10/mo

Platform for building internal apps, workflows and AI agents.

- Retool has a free plan. Superblocks does not, though it has a free trial.
- Retool is self-hostable, according to its own site.
- Retool also covers workflow automation and no-code.

Superblocks and Retool compared in full

Appsmith

2.8 GPA

Free plan · from $15/mo

Open-source low-code platform for internal apps.

- Appsmith has a free plan. Superblocks does not, though it has a free trial.
- Appsmith is open source and self-hostable, according to its own site.
- Superblocks also covers AI agents.

Superblocks and Appsmith compared in full

2.6 GPA

UI Bakery

Free plan · from $20/mo

Low-code and AI builder for internal tools.

- UI Bakery has a free plan. Superblocks does not, though it has a free trial.
- UI Bakery is self-hostable, according to its own site.
- Superblocks also covers AI agents.

Superblocks and UI Bakery compared in full

2.8 GPA

Base44

Free plan · from $16/mo

No-code AI builder with a database, login and hosting included.

- Base44 has a free plan. Superblocks does not, though it has a free trial.
- Only Base44 lists iOS and Android apps.
- Superblocks also covers AI agents.

Superblocks and Base44 compared in full

3.0 GPA

Replit

Free plan · from $18/mo

Cloud platform where an AI agent builds, hosts and publishes apps.

- Replit has a free plan. Superblocks does not, though it has a free trial.
- Only Replit lists macOS, Windows, Linux, iOS and Android apps.
- Replit also covers no-code.

Superblocks and Replit compared in full

PART 06 · QUESTIONS

Quick answers

The questions people ask about it, each answered in a line or two

13

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Superblocks free?

No, Superblocks is a paid product, but you can try it first. 14-day free trial of the Teams plan.

How much does Superblocks cost?

Superblocks lists 2 plans. Teams: $100 per month for up to 15 builders, billed annually ($125 billed monthly).

What platforms does Superblocks work on?

Superblocks is available on Web.

Does Superblocks offer any discounts?

Superblocks publicly lists the following: 20% off Teams with annual billing.

Does Superblocks have an Android app?

No Android app was listed when its pages were read on Nov 12, 2026. Superblocks is listed for Web.

Does Superblocks have an iPhone app?

No iPhone app was listed when its pages were read on Nov 12, 2026. Superblocks is listed for Web.

Is Superblocks open source?

Superblocks is not described as open source on its own site, as read on Nov 12, 2026.

What does Superblocks integrate with?

Superblocks's listing names Claude, Codex, Cursor, GitHub Copilot, GitHub, GitLab, Bitbucket and Azure DevOps.

Who makes Superblocks?

Superblocks is made by a company of the same name.

What are the alternatives to Superblocks?

The closest alternatives to Superblocks in our directory are Retool, Appsmith, UI Bakery, Base44 and Replit.

How does Superblocks compare with other AI app builders?

Superblocks's GPA of 2.2 is higher than 11 of the 52 other AI app builders we grade, and level with 14.

Is Superblocks good value for money?

ToolGPA grades Superblocks C for value for money. Its paid plans start at $100 a month, against a middle price of $20 for the category: 49 of the 50 others that charge start lower.

Could I make my own version of Superblocks?

To replace Superblocks you would be making a tool that builds and hosts other apps.

Where this guide comes from

The prices, plans, platforms and features were read from Superblocks's own pages on Nov 12, 2026, and the grades were given on Nov 12, 2026. Graded from this listing, whose facts were read from Superblocks's own pages on 12 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Superblocks. Prices change, so check superblocks.com before you buy.
