07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Superdesign's own pages, its app-store listings and our grades. Every fact in it is on Superdesign's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 23 of the 89 other AI app builders we grade

Superdesign is an AI product design agent. You describe a screen and it generates UI designs on an infinite canvas, which you refine by prompting or editing directly. Designs are HTML-first and can be downloaded, copied, sent to a coding agent or exported to Figma.

To get you started, here are **7 things to know about Superdesign**, taken from its own pages and our grades.

> "
>
> **A web app where you describe and refine designs, so some learning is involved.**
>
> From our grade for ease of use

1 **Best for AI-drawn screens to hand to a coding agent**

Superdesign is an AI product design agent that draws screens on a canvas, which you refine by prompting, then export as HTML, to Figma or to a coding agent.

2 **It runs on Web**

Web, with a browser extension too.

3 **Canvas with parallel variants**

Several design agents can run at once on an infinite canvas, and Branch creates parallel options without changing the current design.

4 **Chrome extension for cloning**

A Chrome extension imports a full web page or a single component from any live site into a project.

5 **Export paths**

Frames export as a ZIP of HTML, as copied HTML, through the Superdesign agent skill into a codebase, or to Figma via the html.to.design extension.

6 **A 2.2 GPA, above 23 of 89**

That is against the other AI app builders we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Superdesign you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for AI-drawn screens to hand to a coding agent

Superdesign is an AI product design agent that draws screens on a canvas, which you refine by prompting, then export as HTML, to Figma or to a coding agent. But its pricing page could not be read, so plans, credits and limits are unverified, and moving a design into React goes through a coding agent.

TOOLGPA REPORT CARD

Superdesign

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is on record: /pricing returns not found. The docs say each workspace has its own subscription and credits, so it sits in the middle until a price is published.
Free plan and trial	C	The site's tool pages say it is free to start, but no limits are published, so we cannot tell how far a free account goes.
Features	C	A canvas with parallel variants, a Chrome extension to clone pages, exports, a coding-agent skill and brand assets. It makes designs, not apps, and exports are HTML.
Ease of use	C	A web app where you describe and refine designs, so some learning is involved. No store rating on record.
Platforms and integrations	B	Web plus a Chrome extension and an IDE extension, linking to Claude Code, Cursor, Windsurf, VS Code, Figma and Shopify.

Grade point average Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Superdesign is for

- ✓ Fits if you want several UI options to compare before anyone writes code
- ✓ Works for people who already use Claude Code or Cursor and want designs fed into them

Who it is not for

- ✗ Skip it if you need to know the price first, as no pricing page could be read
- ✗ Too light for a finished app: it makes designs, and exports are HTML
- ✗ Not for you if you work alone and want one subscription across teams, as billing is per workspace
- ✗ Watch out: the free limits are unpublished, so how far a free account goes is unknown

Good to know

Good for

- ✓ Developers who want UI mockups produced from inside Claude Code or Cursor
- ✓ Designers exploring several layout directions quickly
- ✓ Teams that share projects in workspaces

Worth knowing

- ⓘ No pricing page could be read: /pricing returns not found, so plan prices, credits and limits are unverified.
- ⓘ The site's tool pages say it is free to start, and the docs say each workspace has its own subscription and credits.
- ⓘ Exports are HTML; moving a design into a React codebase goes through the agent skill or a coding agent.
- ⓘ Account and billing are managed per workspace, so a personal subscription does not cover a team workspace.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Superdesign's current pricing could not be confirmed from its own site.

> **No price is on record: /pricing returns not found.**
>
> From our grade for value for money

We could not confirm Superdesign’s current prices from its own site, so this guide lists no plans. superdesign.dev has them.

What it does

Its main features, where it runs, what it works with and who makes it

2

Places it runs: Web and Browser extension

AI design agent that turns prompts into UI on a canvas. Here is what it does, as its own site describes it, and what it covers: AI features, real-time collaboration, templates, AI agents, app builder.

> **A canvas with parallel variants, a Chrome extension to clone pages, exports, a coding-agent skill and brand assets.**
>
> From our grade for features

Canvas with parallel variants

Several design agents can run at once on an infinite canvas, and Branch creates parallel options without changing the current design.

Chrome extension for cloning

A Chrome extension imports a full web page or a single component from any live site into a project.

Export paths

Frames export as a ZIP of HTML, as copied HTML, through the Superdesign agent skill into a codebase, or to Figma via the html.to.design extension.

Coding-agent skill and IDE extension

A CLI skill lets Claude Code, Cursor and other agents drive the canvas, and an open-source IDE extension works in Cursor, Windsurf, VS Code and Claude Code.

Brand assets and pinned context

Logos, fonts and images, plus persistent design rules, keep generated designs on-brand across prompts.

Prompt and design-system libraries

A public library of design prompts and a browsable set of design.md design systems to start from.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

23/89

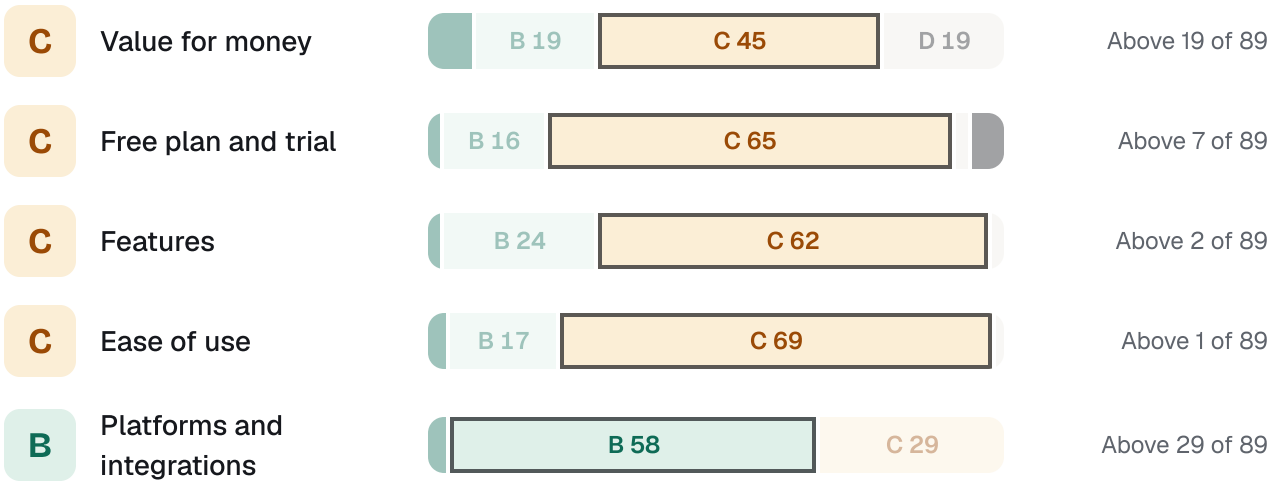

Other AI app builders it is graded above

Superdesign's GPA of 2.2 is higher than 23 of the 89 other AI app builders we grade, and level with 27.

It stands best on platforms and integrations (B, above 29 of 89) and worst on ease of use (C, above 1).

Each grade against the category

Every bar is all 90 AI app builders we grade, cut by the letter each got. Superdesign's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Superdesign you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 39 of the 89 other AI app builders grade higher.

What you could make

- Templates: an app builder makes this well.

What you could not

- A tool that builds and hosts other apps.
- An AI agent, with the models and the safeguards behind it.
- Several people working in it at the same moment.
- It plugs into other products, Claude Code, Cursor and Windsurf among them.

What this rests on. Superdesign's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Magic Patterns, Uizard, Subframe and v0

The 4 tools Superdesign is most often weighed against, with where each one differs from it.

2.2 GPA

Magic Patterns

Free plan · from $17/mo

AI prototyping tool that builds product UIs from prompts.

- Magic Patterns has a free plan. Superdesign does not.
- Only Superdesign lists a browser extension.
- Superdesign also covers templates and AI agents.

Superdesign and Magic Patterns compared in full

2.2 GPA

Uizard

Free plan · from $12/mo

AI UI design tool for app and web mockups and prototypes.

- Uizard has a free plan. Superdesign does not.
- Only Superdesign lists a browser extension.
- Superdesign also covers AI agents and app builder.

Superdesign and Uizard compared in full

2.2
GPA

Subframe

Free plan · from $20/mo

Design canvas, coding agent and browser in one desktop app.

- Subframe has a free plan. Superdesign does not.
- Only Superdesign lists a browser extension.
- Only Subframe lists macOS and Windows apps.

Superdesign and Subframe compared in full

2.4
GPA

v0

Free trial · from $30/mo

Vercel's AI agent for building and deploying full-stack web apps.

- Only Superdesign lists a browser extension.
- Only v0 lists an iOS app.
- Superdesign also covers templates.

Superdesign and v0 compared in full

PART 06 · QUESTIONS

Quick answers

The questions people ask about it, each answered in a line or two

10

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Superdesign free?

Superdesign has a free plan.

What platforms does Superdesign work on?

Superdesign is available on Web. It also has a browser extension.

Does Superdesign have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. Superdesign is listed for Web.

Does Superdesign have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. Superdesign is listed for Web.

Is Superdesign open source?

Superdesign is not described as open source on its own site, as read on Nov 13, 2026.

What does Superdesign integrate with?

Superdesign's listing names Claude Code, Cursor, Windsurf, VS Code, Figma and Shopify.

Who makes Superdesign?

Superdesign is made by a company of the same name.

What are the alternatives to Superdesign?

The closest alternatives to Superdesign in our directory are Magic Patterns, Uizard, Subframe and v0.

How does Superdesign compare with other AI app builders?

Superdesign's GPA of 2.2 is higher than 23 of the 89 other AI app builders we grade, and level with 27.

Could I make my own version of Superdesign?

To replace Superdesign you would be making a tool that builds and hosts other apps.

Where this guide comes from

The prices, plans, platforms and features were read from Superdesign's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Superdesign's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews. Its pricing page showed no plan prices in the text we could read, so the grades lean on the listing.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Superdesign. Prices change, so check superdesign.dev before you buy.

PART 07 · ABOUT

About ToolGPA

Who made this guide, what else is on the site, and how to cite it

7,721

Tools graded, in 95 categories

ToolGPA grades software the way a school report grades a pupil: five subjects, a letter for each with the reason written beside it, and a GPA that averages them. Prices, plans and platforms are read from each maker's own pages and dated, so you always know how fresh a figure is.

Every grade, review and ranking on ToolGPA is our own judgement. No company can pay for a grade or change one. Every tool on the site has a guide like this one, free to download and pass on. It all lives at **toolgpa.com**.
