Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 6 of the 87 other field service apps we grade

Supermove is software for moving companies covering sales and booking, dispatch, accounting, storage and reporting. It is sold as an office app, a crew app, an estimator app and a storage app, with AI voice agents that answer calls and book moves. It serves household goods and commercial office and industrial movers.

To get you started, here are **7 things to know about Supermove**, taken from its own pages and our grades.

> **No price is published and the site sends you to a demo, and it does not say which add-ons cost extra.**
>
> From our report card of Supermove

1 **Best for AI-led operating system for moving companies**

Supermove pitches AI voice agents, sales follow-up, dispatch and capacity, crew apps and invoicing for moving companies.

2 **It runs on 3 platforms**

Web, iOS and Android.

3 **AI voice agents**

Agents answer calls around the clock, book after-hours leads and make outbound sales calls, alongside an AI email assistant.

4 **Sales and booking**

A lead view shows each lead's last contact and job value, with automated follow-ups, an auto dialer and an AI sales copilot.

5 **Dispatch and capacity**

A single calendar shows bookings and open capacity, with workflows for crew and capacity optimization.

6 **A 1.8 GPA, above 6 of 87**

That is against the other field service apps we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Supermove you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

6/87

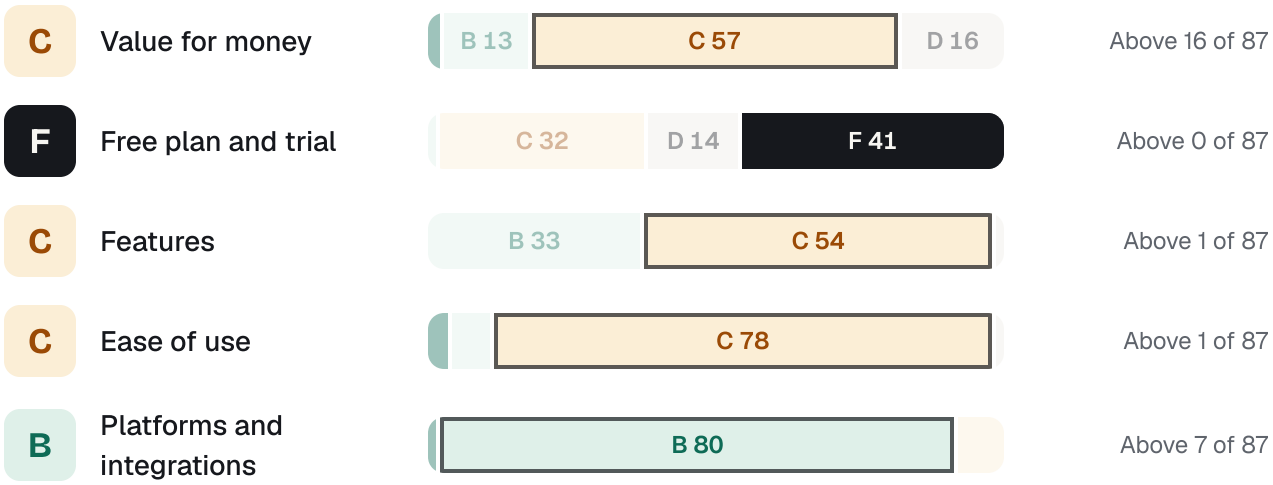

Other field service apps it is graded above

Supermove's GPA of 1.8 is higher than 6 of the 87 other field service apps we grade, and level with 24.

It stands best on platforms and integrations (B, above 7 of 87) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 88 field service apps we grade, cut by the letter each got. Supermove's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Supermove you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 57 of the 87 other field service apps grade higher.

What you could make

- Quotes and estimates, job scheduling, invoicing, sales pipeline and reports: an app builder makes these well.

What you could not

- An AI agent, with the models and the safeguards behind it.
- A real app for iOS and Android. Something home-made would be a web page.

What this rests on. Supermove's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
