Where it stands

Its grades against its category, and whether to keep it or make your own

14/168

Other AI image and video generators it is graded above

Sync Labs's GPA of 1.8 is higher than 14 of the 168 other AI image and video generators we grade, and level with 16.

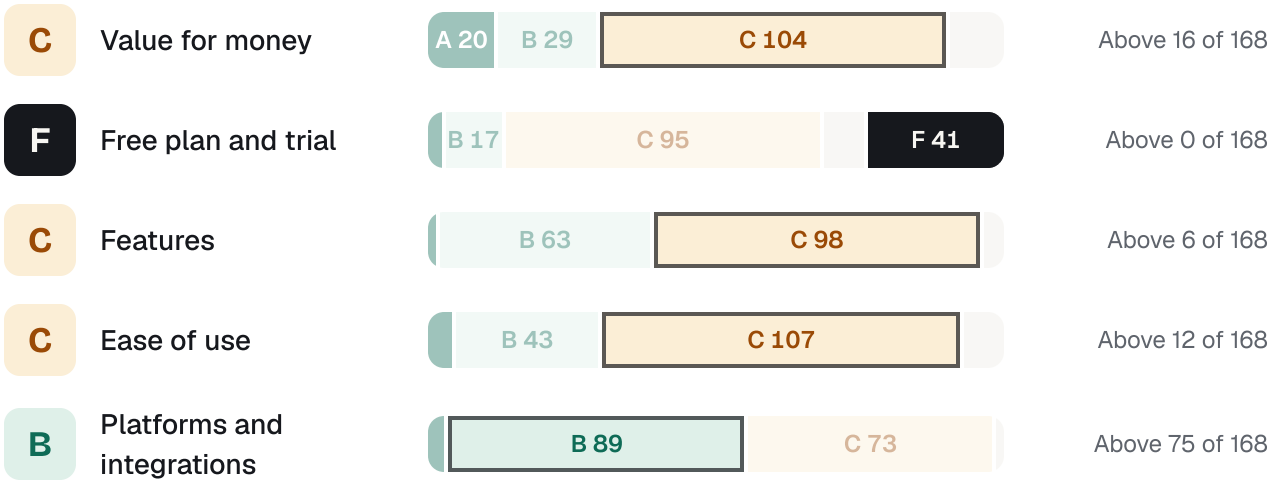

It stands best on platforms and integrations (B, above 75 of 168) and worst on free plan and trial (F, above 0).

Its paid plans start at $5 a month, against a middle price of $11.88 for the category: 9 of the 120 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 8 tools score higher and cost less.

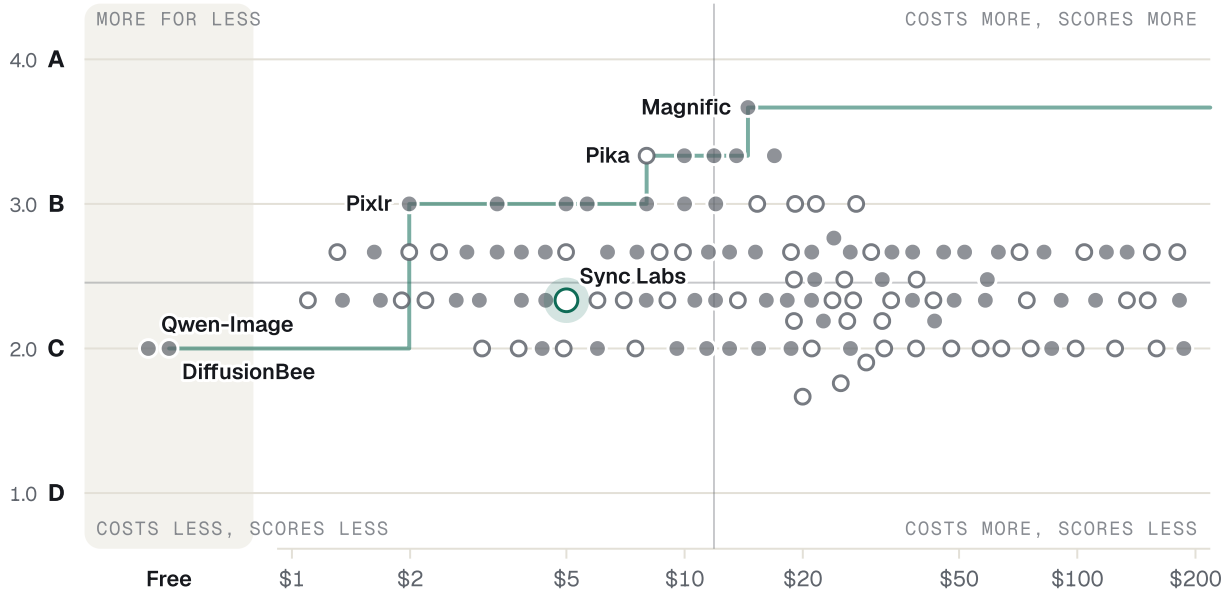

Each grade against the category

Every bar is all 169 AI image and video generators we grade, cut by the letter each got. Sync Labs's own letter is outlined.

Price against what you get

Each dot is one of 123 AI image and video generators. Further left costs less; higher up scores better on features, ease of use and platforms. Sync Labs is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Sync Labs you would be making a video model, which you can rent by the second but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 138 of the 168 other AI image and video generators grade higher. It costs $60 a year.

What you could not

- ✕ A video model, which you can rent by the second but not make.
- ✕ A voice model, which you can rent by the minute but not make.

- ✕ A voice model trained on your recordings.
- ✕ It plugs into other products, Adobe Premiere Pro, DaVinci Resolve and ComfyUI among them, and has an API.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Sync Labs's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
