Where it stands

Its grades against its category, and whether to keep it or make your own

9/70

Other print-on-demand and dropshipping services it is graded above

Teeinblue's GPA of 2.0 is higher than 9 of the 70 other print-on-demand and dropshipping services we grade, and level with 6.

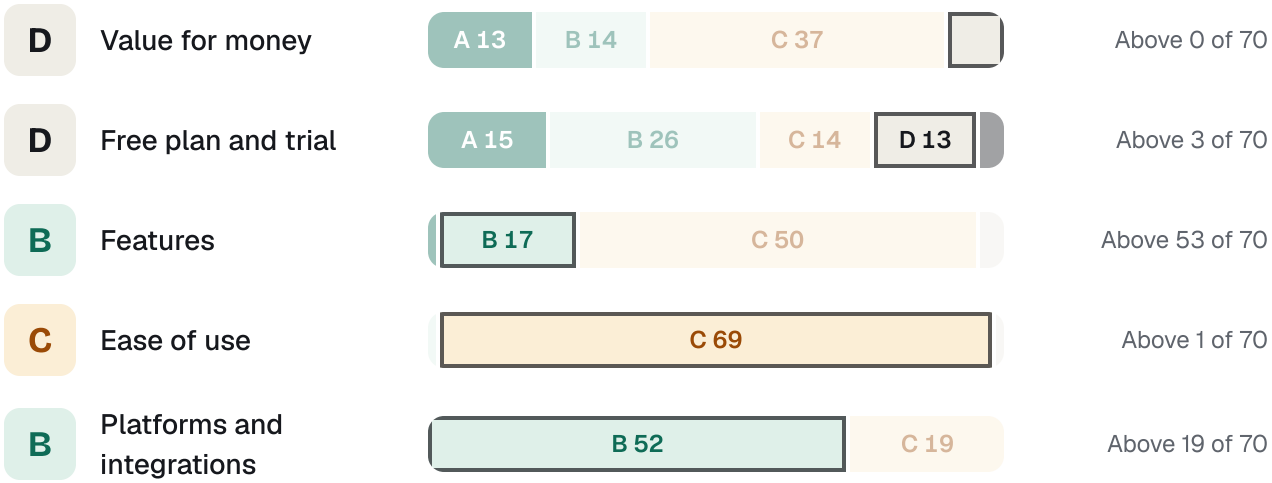

It stands best on features (B, above 53 of 70) and worst on value for money (D, above 0).

Its paid plans start at $49 a month, against a middle price of $25 for the category: 29 of the 36 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. 1 tool scores higher and costs less.

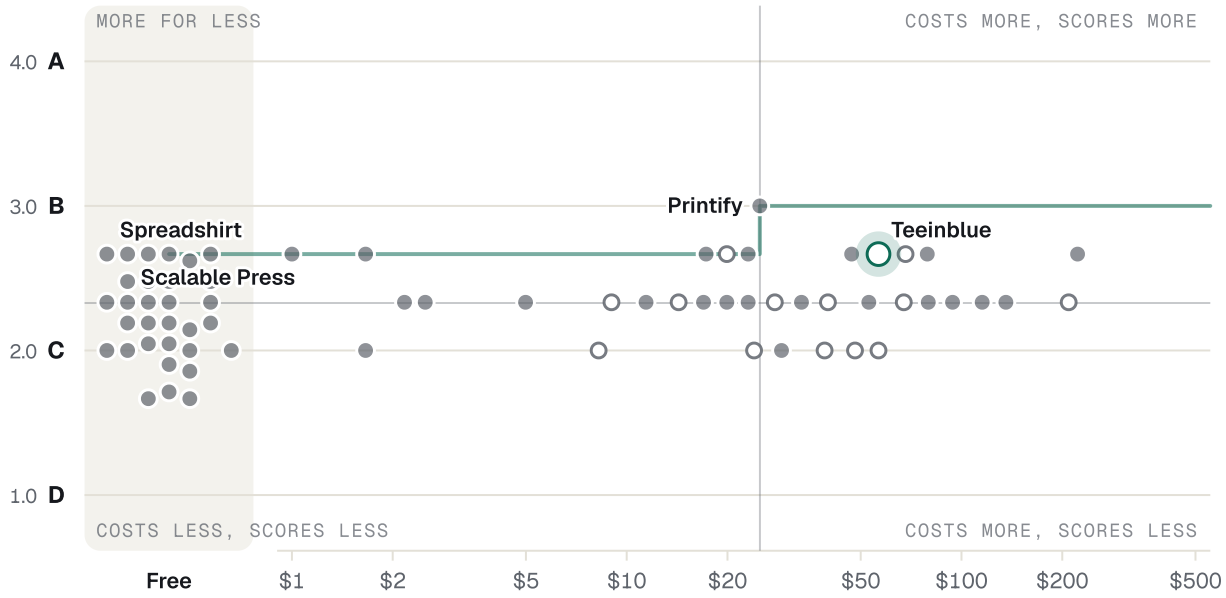

Each grade against the category

Every bar is all 71 print-on-demand and dropshipping services we grade, cut by the letter each got. Teeinblue's own letter is outlined.

Price against what you get

Each dot is one of 68 print-on-demand and dropshipping services. Further left costs less; higher up scores better on features, ease of use and platforms. Teeinblue is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Teeinblue you would be making printers that make and ship each order. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 55 of the 70 other print-on-demand and dropshipping services grade higher. It costs $588 a year.

What you could make

- Templates: an app builder makes this well.

What you could not

- Printers that make and ship each order.
- Checkout, card payments and sales tax handled for you.
- It plugs into other products, Shopify, Etsy and WooCommerce among them.
- AI features, unless you pay a model provider for each request yourself.
- Sharing with other people, which means accounts and invitations.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Teeinblue's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
