Welcome

What it is, who it suits, its grades and the ten things to know first

2.6

GPA, above 74 of the 122 other email apps we grade

Temp Mail creates temporary email addresses that receive messages and attachments without registration, so people can sign up for services without giving a real address. The iPhone and iPad app is free with in-app Premium subscriptions. The vendor's website blocked our reader, so everything here comes from its US App Store listing.

To get you started, here are **9 things to know about Temp Mail**, taken from its own pages and our grades.

> **Open it and an address is ready, no registration.**
>
> From our grade for ease of use

1 **Best for throwaway email addresses on iPhone**

Temp Mail gives you a disposable address and receives the mail, attachments included, in a free iPhone app.

2 **Paid plans start at $12.96 a month**

As its pricing page puts it: $2.99 per week (Premium, auto-renewing in-app subscription).

3 **There is a free plan**

Free app: generate a disposable address and receive emails and attachments, with ads.

4 **It runs on iOS**

iOS.

5 **Instant disposable address**

Generates a temporary address on demand with no registration, and it can be copied to the clipboard or shown as a QR code.

6 **Attachments and notifications**

Receives emails with attachments, sends push notifications for new messages and lets users download the source (EML) of a message.

7 **Automatic deletion**

The listing says emails are constantly and securely deleted for good, and that addresses can be deleted or replaced in a tap.

8 **A 2.6 GPA, above 74 of 122**

That is against the other email apps we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Temp Mail you would be making an email client: sending, receiving, threading and searching years of mail. That is not a weekend's work, with an AI app builder or without one.

Best for throwaway email addresses on iPhone

Temp Mail gives you a disposable address and receives the mail, attachments included, in a free iPhone app. The free version has ads, anything you want to keep needs a paid plan, and mail is deleted automatically, so it's for short-lived sign-ups only.

Free plan and trial	B	A free app that makes an address and receives mail and attachments, with ads. One person could live on that for sign-ups.

Ease of use	A	4.7 from about 20,000 App Store ratings. Open it and an address is ready, no registration.
Platforms and integrations	C	An iPhone and iPad app on the App Store listing. No Android, web or desktop version is listed there.

Who Temp Mail is for

- ✓ Fits if you want an address to give a site you'll never visit again
- ✓ Works for people who want to keep spam out of their real inbox

Who it is not for

- ✗ Not for you if you want to keep mail, as received emails are deleted automatically
- ✗ Tight if you stay free, since custom names, more mailboxes and no ads are Premium
- ✗ Pricey if you pay weekly, at $2.99 a week against $58.99 for the year
- ✗ Skip it if you use Android, because the listing we read is iOS only
- ✗ Watch out: we couldn't read the temp-mail.org site, so its own plans aren't checked, and App Store prices vary by country

Good to know

Good for

- ✓ Signing up for sites without handing over a real address
- ✓ Keeping newsletters and promotions out of a main inbox

Worth knowing

- ⓘ Prices are the US App Store in-app amounts; the listing says they can vary by country.
- ⓘ The temp-mail.org website returned a bot-protection block, so its own plans were not read.
- ⓘ Received emails are deleted automatically, according to the listing, so it suits short-lived use.

Keep it

It costs $155.48 a year.

What you could not

- An email client: sending, receiving, threading and searching years of mail.
- Filters that read every message as it arrives.

× A real app for iOS. Something home-made would be a web page.

What this rests on. Temp Mail's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
