07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Terminal Africa's own pages, its app-store listings and our grades. Every fact in it is on Terminal Africa's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 12 of the 80 other shipping software we grade

Terminal Africa is a delivery aggregator for businesses and individuals shipping from Nigeria. It sends bookings to courier partners, offers a rate calculator, a wallet, a mobile app, an API and a white-label hub for logistics businesses. Rates depend on the courier used.

To get you started, here are **7 things to know about Terminal Africa**, taken from its own pages and our grades.

> **No plan prices are published, the pricing link on the site goes nowhere, and refunds return to a wallet rather than to your card.**
>
> From our report card of Terminal Africa

1 **Best for booking couriers across Africa**

Terminal Africa lets you book couriers from a rate calculator and offers an API for developers and a tool for logistics firms.

2 **It runs on 3 platforms**

Web, iOS and Android.

3 **Courier booking**

Book a shipment with one of the courier partners, local or international, and track it in the app or on the web.

4 **Rate calculator**

A free online calculator estimates delivery cost before booking; the cost depends on the courier, weight or distance.

5 **T-Ship API**

An API for pickups, billing, tracking and delivery that developers can add to their own site.

6 **A 1.8 GPA, above 12 of 80**

That is against the other shipping software we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Terminal Africa you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for booking couriers across Africa

Terminal Africa lets you book couriers from a rate calculator and offers an API for developers and a tool for logistics firms. No plan prices are published, the pricing link on the site goes nowhere, and refunds return to a wallet rather than to your card.

TOOLGPA REPORT CARD

Terminal Africa

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No prices are published, and the rates come from a calculator, so it cannot be set against the category's $9, $19 and $34.99.
Free plan and trial	F	No free plan or trial is listed on the pages read.
Features	C	Booking, a rate calculator, an API, a tool for logistics firms and a wallet. It also sells foreign-store shopping and insurance, which widens it beyond shipping.
Ease of use	C	No store rating is on record. Developers and merchants must set up accounts, wallets and the API.
Platforms and integrations	B	Web, iPhone and Android, plus an API, with no desktop app.

Grade point average — Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Terminal Africa is for

- ✓ Fits if you book couriers in Africa and want one calculator for rates
- ✓ Works for developers who want a shipping API

Who it is not for

- ✗ Skip it if you want published prices, as none exist and the pricing link goes nowhere
- ✗ Not for you if you want refunds to your card, since they go to the Terminal wallet
- ✗ Tight if you want a free trial, as none is listed
- ✗ Watch out: it also sells T-Shop foreign shopping and insurance, which are separate offerings

Good to know

Good for

- ✓ Nigerian sellers shipping abroad through several couriers
- ✓ Logistics businesses wanting a white-label booking platform

Worth knowing

- ⓘ No plan prices are published; the pricing link on the site goes nowhere and rates come from a calculator.
- ⓘ Refunds go to the Terminal wallet, per the FAQ, to be used on other deliveries.
- ⓘ The site also sells shopping from foreign stores (T-Shop) and insurance.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Terminal Africa's current pricing could not be confirmed from its own site.

> **No free plan or trial is listed on the pages read.**
>
> From our grade for free plan and trial

We could not confirm Terminal Africa's current prices from its own site, so this guide lists no plans. terminal.africa has them.

What it does

Its main features, where it runs, what it works with and who makes it

3

Places it runs: Web, iOS and Android

Delivery aggregator booking local and global couriers from Nigeria. Here is what it does, as its own site describes it, and what it covers: public API, shipping labels.

> **Booking, a rate calculator, an API, a tool for logistics firms and a wallet.**

From our grade for features

Courier booking

Book a shipment with one of the courier partners, local or international, and track it in the app or on the web.

Rate calculator

A free online calculator estimates delivery cost before booking; the cost depends on the courier, weight or distance.

T-Ship API

An API for pickups, billing, tracking and delivery that developers can add to their own site.

T-Hub for logistics firms

A product aimed at logistics businesses that lets them run their own branded shipping and set margins.

Wallet and refunds

Shipments are paid from a wallet. The FAQ says a cancelled delivery is refunded to the wallet straight away if it has not been picked up.

Where it runs

Web · iOS · Android

What it works with

Its own pages name no integrations.

Terminal Africa is made by Terminal Africa Inc.

Where it stands

Its grades against its category, and whether to keep it or make your own

12/80

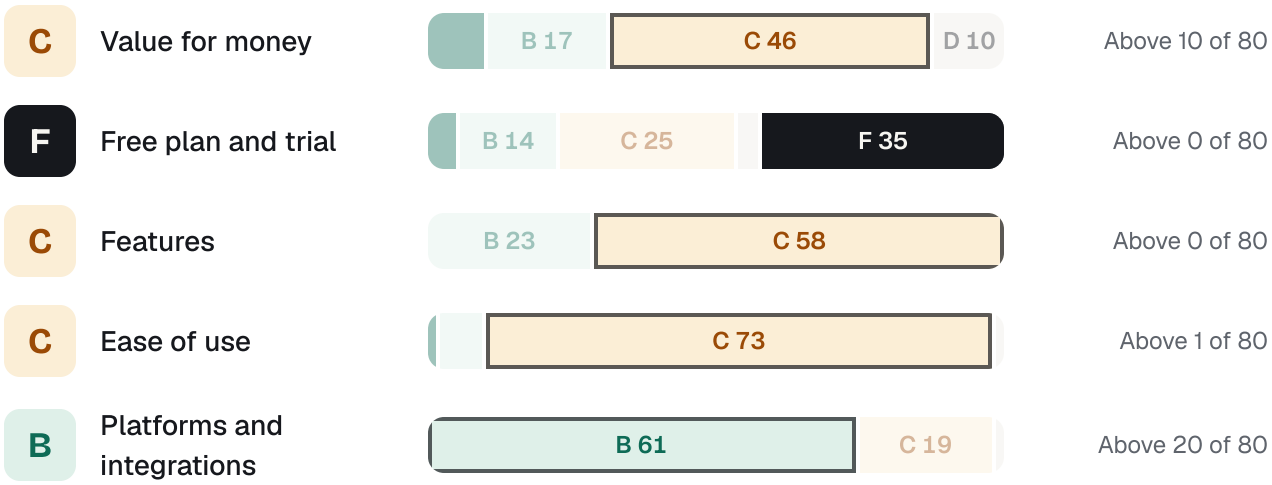

Other shipping software it is graded above

Terminal Africa's GPA of 1.8 is higher than 12 of the 80 other shipping software we grade, and level with 18.

It stands best on platforms and integrations (B, above 20 of 80) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 81 shipping software we grade, cut by the letter each got. Terminal Africa's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Terminal Africa you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 50 of the 80 other shipping software grade higher.

What you could not

- ✕ Discounted carrier rates and labels, which take an agreement with each carrier.
- ✕ A real app for iOS and Android. Something home-made would be a web page.
- ✕ An API that other software can build on.

What this rests on. Terminal Africa's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Shipbubble, Sendbox, Easyship, Sendcloud and Shippo

The 5 tools Terminal Africa is most often weighed against, with where each one differs from it.

2.8 GPA
