07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from TG Pro's own pages, its app-store listings and our grades. Every fact in it is on TG Pro's page too, where it is kept up to date. Checked Nov 12, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 35 of the 186 other desktop utilities we grade

TG Pro reads temperature sensors across a Mac, including CPU cores on Apple Silicon, drives, battery and more, and shows them in the menu bar. On Macs with fans it also sets fan speeds by hand or by rules tied to a sensor's temperature.

To get you started, here are **9 things to know about TG Pro**, taken from its own pages and our grades.

> "
>
> **Install it and temperatures appear in the menu bar.**
>
> From our grade for ease of use

1 **Best for Mac temperatures and fan rules**

There is no free plan, fanless Macs only get readings, and manual options depend on the Mac model.

2 **What it costs**

Paid plans start at $10 one-time.

3 **You can try it first**

14-day free trial

4 **It runs on macOS**

macOS.

5 **Auto Boost fan rules**

Set a temperature threshold and fan speed for the CPU, GPU, drive or another sensor, and the fans adjust on their own.

6 **Manual fan speeds**

Set speeds yourself or use Max for immediate cooling. Options depend on the Mac model.

7 **Sensor readings**

Shows current and highest temperatures for CPU cores, GPU, SMART drive data, battery and other components.

8 **A 2.4 GPA, above 35 of 186**

That is against the other desktop utilities we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

Nothing TG Pro does is plain enough to make in a weekend. The 3 things listed below take a company.

TG Pro at a glance

PRICING Free trial, from $10 one-time	FREE PLAN No
FREE TRIAL 14-day free trial	RUNS ON macOS
MADE BY Tunabelly Software Inc.	CATEGORY Desktop Utilities
OUR GRADE 2.4 GPA, fair	

The report card

Best for Mac temperatures and fan rules

TG Pro shows Mac temperatures in the menu bar and lets rules or manual speeds run the fans, for $10 once. There is no free plan, fanless Macs only

get readings, and manual options depend on the Mac model.

TOOLGPA REPORT CARD	TG Pro	Graded Nov 12, 2026
SUBJECT	GRADE	COMMENT
Value for money	A	$10 once with no subscription, far under the category's cheaper quarter.
Free plan and trial	C	A 14-day trial, and the listing doesn't say a card is needed. There is no free plan after it.
Features	C	Sensor readings, Auto Boost rules, manual fan speeds, alerts and CSV logs. It does that job fully, but it is a narrow one.
Ease of use	B	No rating on record. Install it and temperatures appear in the menu bar.
Platforms and integrations	D	Mac only, on Intel and Apple Silicon. No Windows, phone or web version.
Grade point average		Fair, out of 4.0 **2.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who TG Pro is for

- ✓ Fits if you want to see Mac temperatures and keep fans from running late
- ✓ Works for people chasing thermal throttling on heavy work

Who it is not for

- ✗ Skip it if you want a free tool, since there is a 14-day trial and nothing after it
- ✗ Watch out: fanless Macs get temperature readings only
- ✗ Watch out: manual and Max fan options depend on the Mac model and settings
- ✗ Not for you if you use Windows, as it is Mac only

Good to know

Good for

- ✓ Mac owners who want to see temperatures and keep fans from running too late
- ✓ Anyone chasing thermal throttling on a heavy workload

Worth knowing

- ⓘ Mac only; it runs on Intel and Apple Silicon Macs with macOS 10.14 to 27.
- ⓘ Fanless Macs can monitor temperatures only, since fan controls need a model with fans.
- ⓘ Manual and Max fan options depend on the Mac model and settings.
- ⓘ The $10 price is filled in by the page's checkout script, with the static page text showing the same figure.

PART 02 · PRICING

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$10 one-time

To start

TG Pro is a paid product with a free trial, starting at $10 one-time.

TG PRO

$10

one-time, no subscription

Shown on the page as 50% off a crossed-out $20, with no end date stated. Covers monitoring, fan control, alerts and logging.

Trying it first

14-day free trial

Read from tunabellysoftware.com on Nov 12, 2026.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: macOS

Mac temperature monitor with manual and automatic fan control. Here is what it does, as its own site describes it, and what it covers: one-time purchase, menu bar app, system monitor.

"

Sensor readings, Auto Boost rules, manual fan speeds, alerts and CSV logs.

From our grade for features

Auto Boost fan rules

Set a temperature threshold and fan speed for the CPU, GPU, drive or another sensor, and the fans adjust on their own.

Manual fan speeds

Set speeds yourself or use Max for immediate cooling. Options depend on the Mac model.

Sensor readings

Shows current and highest temperatures for CPU cores, GPU, SMART drive data, battery and other components.

Menu bar readouts

Temperatures and fan speeds sit in the menu bar, with per-sensor readings and fan controls in the dropdown.

Hardware health checks

Reports fan and sensor status, battery health and the last shutdown or sleep.

Alerts and CSV logs

Sends local notifications or email alerts at set temperatures and logs readings to CSV.

Where it runs

macOS

What it works with

Its own pages name no integrations.

TG Pro is made by Tunabelly Software Inc.

Where it stands

Its grades against its category, and whether to keep it or make your own

35/186

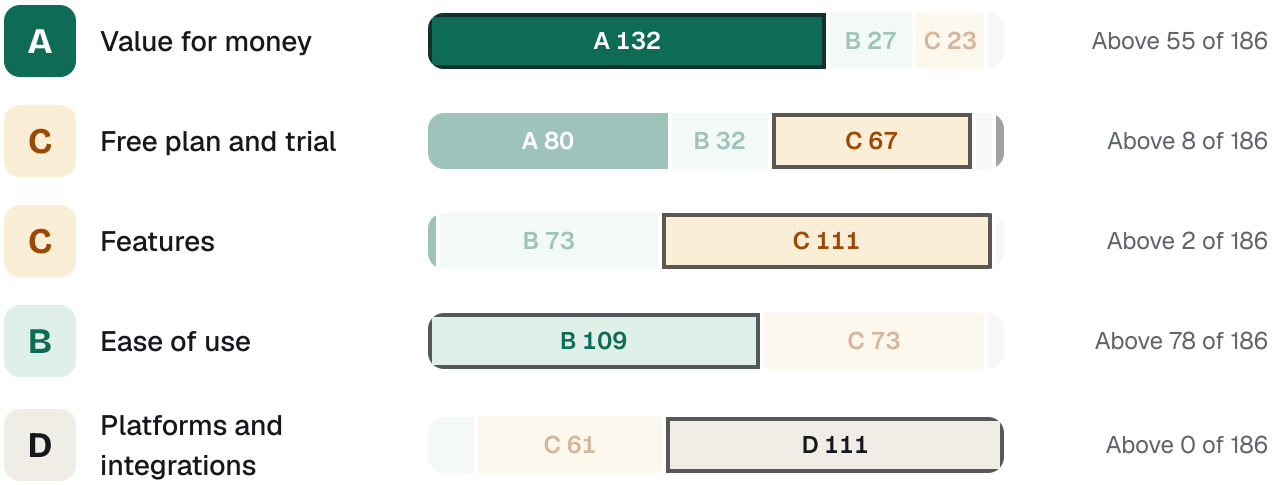

Other desktop utilities it is graded above

TG Pro's GPA of 2.4 is higher than 35 of the 186 other desktop utilities we grade, and level with 33.

It stands best on value for money (A, above 55 of 186) and worst on platforms and integrations (D, above 0).

Each grade against the category

Every bar is all 187 desktop utilities we grade, cut by the letter each got. TG Pro's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Nothing TG Pro does is plain enough to make in a weekend. The 3 things listed below take a company.

That makes this kind of software worth paying for, not this one in particular: 118 of the 186 other desktop utilities grade higher. It costs $10, paid once.

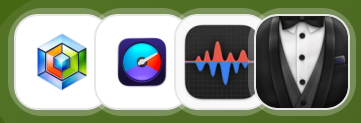

What you could not

- ✕ Readings from inside the operating system.
- ✕ A native app living in the menu bar.
- ✕ A real app for macOS. Something home-made would be a web page.

What this rests on. TG Pro's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Macs Fan Control, iStat Menus, Stats and Bartender

The 4 tools TG Pro is most often weighed against, with where each one differs from it.

2.6 GPA

Macs Fan Control

Free plan · from $14.95 one-time

Free Mac fan monitor with custom speeds and presets in Pro.

- Macs Fan Control has a free plan. TG Pro does not, though it has a free trial.
- Only Macs Fan Control lists a Windows app.

TG Pro and Macs Fan Control compared in full

2.4 GPA

iStat Menus

Free trial · from $11.99 one-time

System monitor that lives in the Mac menu bar.

TG Pro and iStat Menus compared in full

2.8
GPA

Stats

Free

Free, open-source system monitor for the Mac menu bar.

- Stats has a free plan. TG Pro does not, though it has a free trial.
- TG Pro can be bought with a one-time purchase.
- Stats is open source, according to its own site.

TG Pro and Stats compared in full

2.4
GPA

Bartender

Free trial · from $19.99/yr

Menu bar manager for macOS that hides and organizes items.

- TG Pro also covers system monitor.
- Bartender also covers workflow automation and clipboard manager.

TG Pro and Bartender compared in full

PART 06 · QUESTIONS

Quick answers

The questions people ask about it, each answered in a line or two

10

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is TG Pro free?

No, TG Pro is a paid product, but you can try it first. 14-day free trial.

How much does TG Pro cost?

TG Pro lists one plan. TG Pro: $10 one-time, no subscription.

What platforms does TG Pro work on?

TG Pro is available on macOS.

Does TG Pro have an Android app?

No Android app was listed when its pages were read on Nov 12, 2026. TG Pro is listed for macOS.

Does TG Pro have an iPhone app?

No iPhone app was listed when its pages were read on Nov 12, 2026. TG Pro is listed for macOS.

Is TG Pro open source?

TG Pro is not described as open source on its own site, as read on Nov 12, 2026.

Who makes TG Pro?

TG Pro is made by Tunabelly Software Inc.

What are the alternatives to TG Pro?

The closest alternatives to TG Pro in our directory are Macs Fan Control, iStat Menus, Stats and Bartender.

How does TG Pro compare with other desktop utilities?

TG Pro's GPA of 2.4 is higher than 35 of the 186 other desktop utilities we grade, and level with 33.

Could I make my own version of TG Pro?

Nothing TG Pro does is plain enough to make in a weekend. The 3 things listed below take a company.

Where this guide comes from

The prices, plans, platforms and features were read from TG Pro's own pages on Nov 12, 2026, and the grades were given on Nov 12, 2026. Graded from this listing, whose facts were read from Tunabelly Software's own pages on 12 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Tunabelly Software Inc. Prices change, so check tunabellysoftware.com before you buy.
