PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

0/79

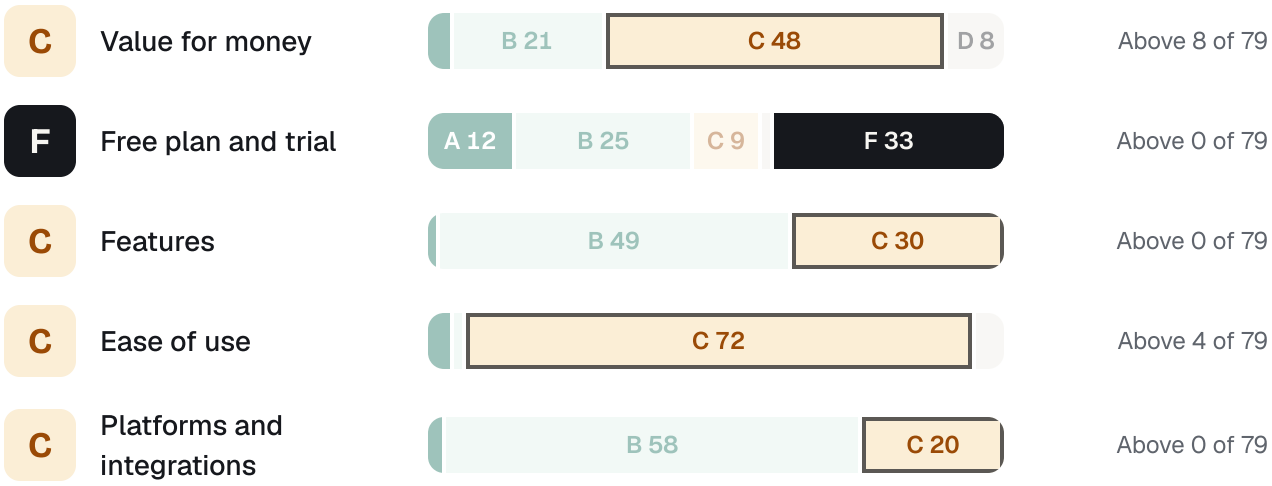

Other event ticketing platforms it is graded above

TicketCo's GPA of 1.6 is higher than 0 of the 79 other event ticketing platforms we grade, and level with 6.

It stands best on value for money (C, above 8 of 79) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 80 event ticketing platforms we grade, cut by the letter each got. TicketCo's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of TicketCo you could make: qR codes. What surrounds it you could not. The 2 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 73 of the 79 other event ticketing platforms grade higher.

What you could make

- QR codes: an app builder makes this well.

What you could not

- Selling tickets and checking them at the door.
- Scanning barcodes with a phone camera or a scanner.

What this rests on. TicketCo's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
