Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 41 of the 98 other time tracking apps we grade

TimeLive is a time tracking suite from Livetecs that covers timesheets, expense sheets, time-off requests and clock-in attendance with geofencing. Projects, clients and approval workflows tie the hours to billing. It runs as a hosted service or, for a one-time license fee, on a company's own servers.

To get you started, here are **9 things to know about TimeLive**, taken from its own pages and our grades.

"

Modules, policies and approvals take setting up.

From our grade for ease of use

1 **Best for timesheets, expenses and attendance in one app**

Paid prices depend on which modules you tick, and the free plan's limits contradict themselves on its own pricing page.

2 **Paid plans start at $3 a month for each person**

As its pricing page puts it: $3 per user / month per module, billed annually ($4 billed monthly).

3 **There is a free plan**

3 users and 3 projects with the timesheet, expense, time-off and attendance modules and the mobile app.

4 **It runs on 3 platforms**

Web, iOS and Android.

5 **Timesheets and timer**

Staff log hours with a timer or weekly timesheet against clients, projects and tasks, with approval workflows for managers.

6 **Attendance and geofencing**

Clock in and out with shifts, attendance policies and geofence areas, including polygon boundaries.

7 **Time off and expenses**

Separate modules handle leave policies, requests and approvals, plus expense sheets with types and approval.

8 **A 2.4 GPA, above 41 of 98**

That is against the other time tracking apps we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

The plain part of TimeLive you could make: time tracking, time off, expense tracking, reports and invoicing. What surrounds it you could not. The 5 things listed below take a company, not a weekend.

The report card

Best for timesheets, expenses and attendance in one app

TimeLive covers timesheets, expenses, leave and attendance, with a free plan for 3 users and 3 projects. Paid prices depend on which modules you tick, and the free plan's limits contradict themselves on its own pricing page.

TOOLGPA REPORT CARD — **TimeLive** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	$3 a user a month per module on annual billing. The total depends on the modules you pick, so a team of five with two modules lands mid-range.
Free plan and trial	B	A free plan with all four basic modules for 3 users and 3 projects, enough for a tiny team. The page's FAQ says 2 users.
Features	C	Timesheets, attendance, leave and expenses. Advanced project management and the advanced calendar are upgrades.
Ease of use	C	No store rating on record. Modules, policies and approvals take setting up.
Platforms and integrations	B	Web, iOS and Android with QuickBooks, Xero, Asana, Jira and calendar links. No desktop app.

Grade point average — Fair, out of 4.0 **2.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who TimeLive is for

- ✓ Fits if you are a very small team that wants a free timesheet and leave tracker
- ✓ Works for firms that want an on-premises option

Who it is not for

- ✗ Tight if you have more than 3 projects or 3 users on the free plan, and the page itself disagrees on 2 or 3
- ✗ Skip it if you want one flat price, because the cost depends on modules ticked
- ✗ Not for you if you want Kanban and scheduling in Standard, as those are add-ons
- ✗ Watch out: on-premises licences need a support contract and a sales quote

Good to know

Good for

- ✓ Small and mid-size firms that bill by project and need approvals
- ✓ Companies that want attendance, leave and expenses in one tool
- ✓ Teams that need an on-premises option for time data

Worth knowing

- ⓘ The pricing page computes a total from the modules and users you tick, so the real monthly cost depends on that selection.
- ⓘ The page's free-plan limits conflict: the table shows 3 users, while an FAQ on the same page says up to 2 users.
- ⓘ Advanced calendar and advanced project management are upgrades, not part of Standard.
- ⓘ On-premises licensing requires a support contract and is quoted by sales.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

41/98

Other time tracking apps it is graded above

TimeLive's GPA of 2.4 is higher than 41 of the 98 other time tracking apps we grade, and level with 24.

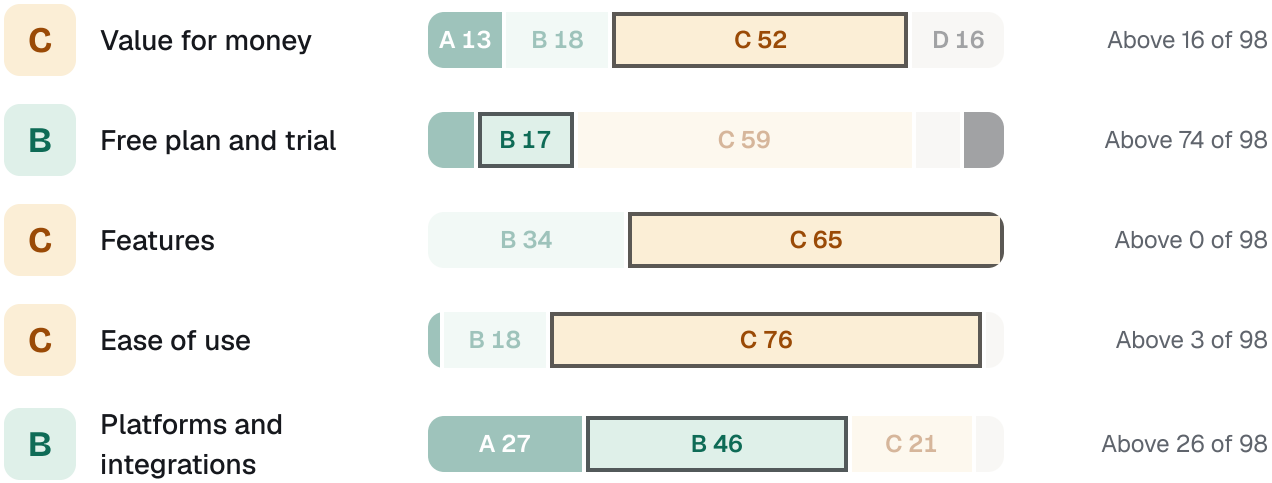

It stands best on free plan and trial (B, above 74 of 98) and worst on features (C, above 0).

Its paid plans start at $3 a month for each person, against a middle price of $6.99 for the category: 3 of the 80 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 2 tools score higher and cost less.

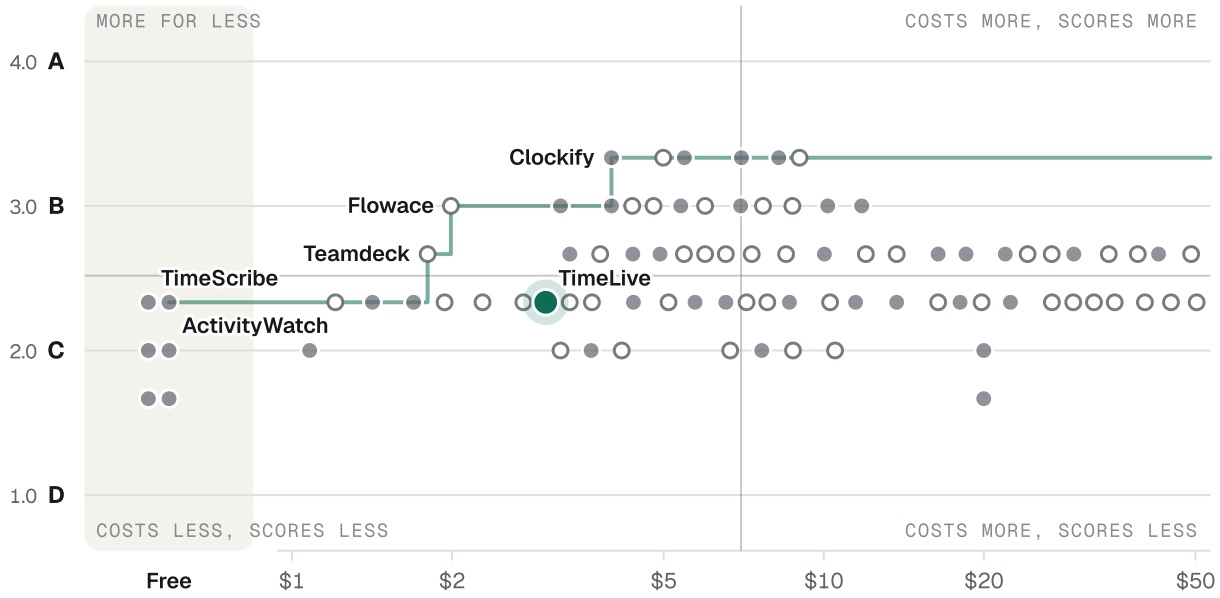

Each grade against the category

Every bar is all 99 time tracking apps we grade, cut by the letter each got. TimeLive's own letter is outlined.

Price against what you get

Each dot is one of 87 time tracking apps. Further left costs less; higher up scores better on features, ease of use and platforms. TimeLive is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of TimeLive you could make: time tracking, time off, expense tracking, reports and invoicing. What surrounds it you could not. The 5 things listed below take a company, not a weekend.

It costs $36 a year.

What you could make

- Time tracking, time off, expense tracking, reports and invoicing: an app builder makes these well.

What you could not

- Clocking in from a phone, checked against where and when.

- Connections that pull numbers from dozens of other services.
- A real app for iOS and Android. Something home-made would be a web page.
- It is priced for each person, which means accounts and billing for a team.
- It plugs into other products, QuickBooks, Xero and Asana among them.

What this rests on. TimeLive's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
