Welcome

What it is, who it suits, its grades and the ten things to know first

2.6

GPA, above 66 of the 98 other time tracking apps we grade

TimeTac is a time tracking system sold as two licences that can be combined: working hours and absence, and project time. It records time from a browser, phone apps, NFC tags, terminals and an automatic desktop tracker. The vendor stresses compliance in the DACH region, EU hosting and ISO 27001 certification.

To get you started, here are **9 things to know about TimeTac**, taken from its own pages and our grades.

> "
>
> **Compliance rules and workflows need configuring.**
>
> From our grade for ease of use

1 **Best for teams that need hours, leave and projects tracked**

TimeTac records working hours, leave and project time, with apps for phones and computers.

2 **Paid plans start at $5 a month for each person**

As its pricing page puts it: $5 per user / month, billed yearly ($6 billed monthly), plus a base fee.

3 **You can try it first**

30-day free trial, no credit card required

4 **It runs on 5 platforms**

Web, iOS, Android, macOS and Windows.

5 **Several ways to clock in**

Browser, mobile apps with offline mode, NFC tags, terminals and a time tracking cube, with GPS and geofencing on higher plans.

6 **Absence management**

Leave requests with approval workflows, absence quotas, public holidays and holiday templates, with balances and entitlements from Standard.

7 **Overtime and payroll data**

Overtime rules, paid breaks, automatic break rules and compliance checks prepare hours for payroll on the Standard plan and above.

8 **A 2.6 GPA, above 66 of 98**

That is against the other time tracking apps we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

The plain part of TimeTac you could make: time tracking, time off and reports. What surrounds it you could not. The 6 things listed below take a company, not a weekend.

The report card

Best for teams that need hours, leave and projects tracked

TimeTac records working hours, leave and project time, with apps for phones and computers. But the Working Hours licence adds a $20 a month base fee, compliance and payroll sit on Standard, and prices vary by country.

TOOLGPA REPORT CARD — **TimeTac** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	Working Hours is $5 per user a month billed yearly on Essential and $9 on Standard, plus a $20 base fee. For five people, Standard comes to about $13 a head.
Free plan and trial	C	A 30-day free trial with no card required.
Features	B	Several ways to clock in, absences, overtime and payroll data, project time, automatic tracking, integrations and an API.
Ease of use	C	No store rating on record. Compliance rules and workflows need configuring.
Platforms and integrations	A	Web, iPhone, Android, Mac and Windows, with integrations and an API.

Grade point average — Good, out of 4.0 **2.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who TimeTac is for

- ✓ Fits if you track hours and leave for a team and want apps on phones and computers
- ✓ Works for teams that bill projects as well as hours

Who it is not for

- ✗ Skip it if you want one price per head, as there is a base fee on Working Hours
- ✗ Tight if you need compliance, approvals or the API, which start on Standard
- ✗ Pricey if you want automated tracking, which sits on Project Time Advanced at $18
- ✗ Watch out: prices vary by visitor country, and hardware is priced separately

Good to know

Good for

- ✓ Companies in Germany, Austria and Switzerland needing compliant working-time records
- ✓ Teams that track both attendance and billable project hours
- ✓ Workplaces clocking in at NFC tags or terminals

Worth knowing

- ⓘ The Working Hours licence adds a base fee on top of per-user prices: $20 a month billed yearly or $25 billed monthly.
- ⓘ The price table is built by page script and varies by visitor country; the dollar prices here are the page's US rates.
- ⓘ The page invites teams of 20 or more users to request a personalised quote.
- ⓘ Hardware such as terminals and premium support services are priced individually, not listed.

Several ways to clock in

Browser, mobile apps with offline mode, NFC tags, terminals and a time tracking cube, with GPS and geofencing on higher plans.

Absence management

Leave requests with approval workflows, absence quotas, public holidays and holiday templates, with balances and entitlements from Standard.

Overtime and payroll data

Overtime rules, paid breaks, automatic break rules and compliance checks prepare hours for payroll on the Standard plan and above.

Project time and budgets

Track hours by client, project and task, compare against budgets and run billable-hours and client reports.

Automatic time tracking

A desktop app records apps and browser tabs in the background and suggests entries to confirm. The plan matrix lists it under Project Time Advanced.

Integrations and API

Integrations and an API are part of the Standard plans, with API users and bulk actions on Advanced working hours.

Where it stands

Its grades against its category, and whether to keep it or make your own

66/98

Other time tracking apps it is graded above

TimeTac's GPA of 2.6 is higher than 66 of the 98 other time tracking apps we grade, and level with 15.

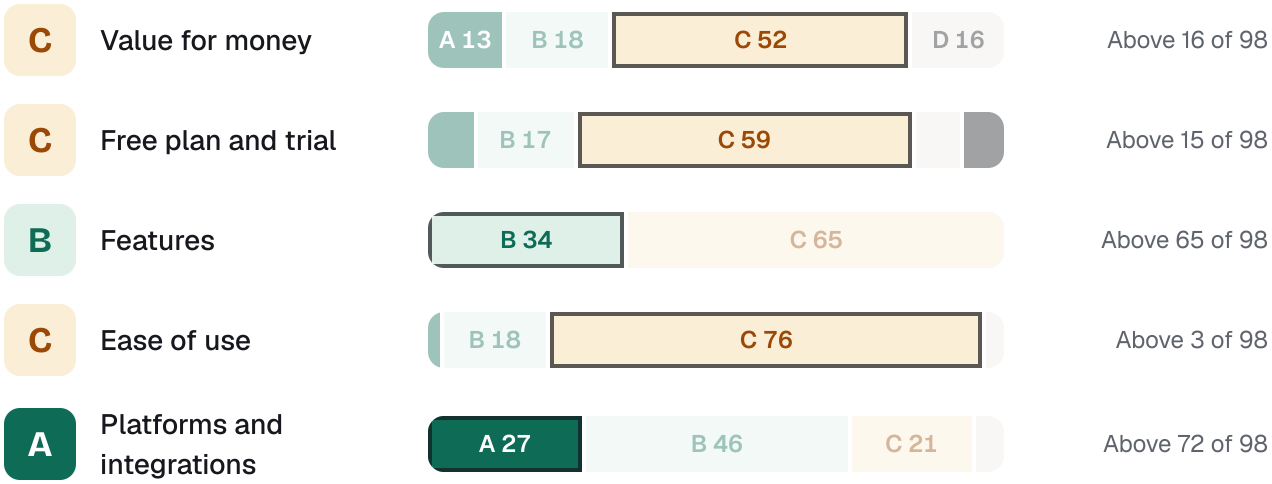

It stands best on platforms and integrations (A, above 72 of 98) and worst on ease of use (C, above 3).

Its paid plans start at $5 a month for each person, against a middle price of $6.99 for the category: 24 of the 80 others that charge start lower.

On features, ease of use and platforms it scores 3.0 out of 4. 2 tools score higher and cost less.

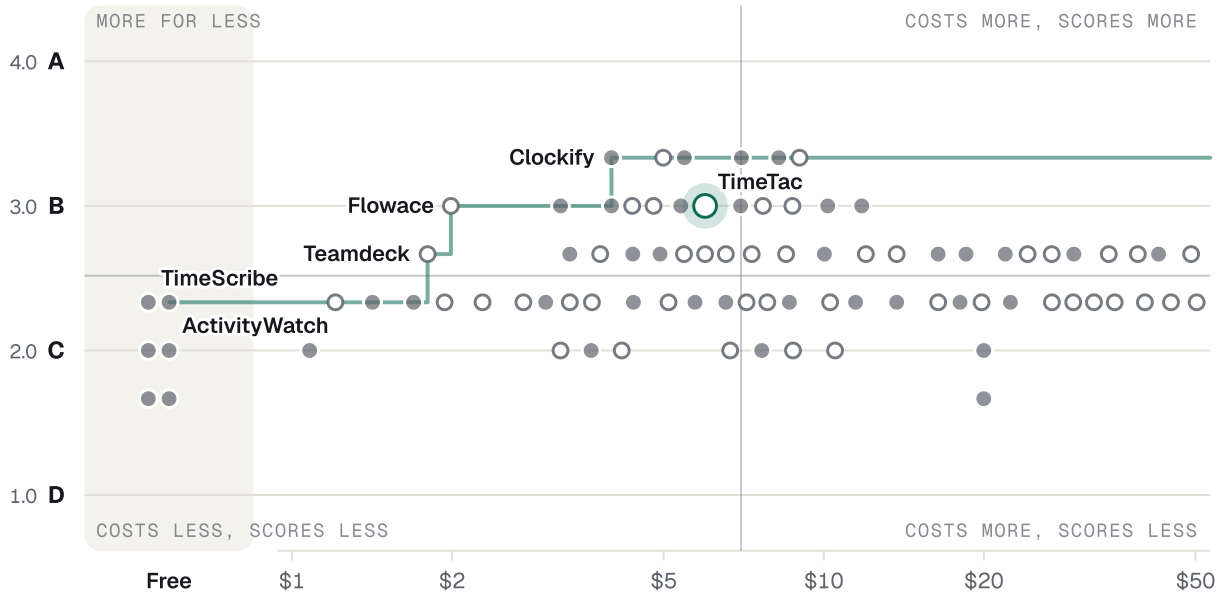

Each grade against the category

Every bar is all 99 time tracking apps we grade, cut by the letter each got. TimeTac's own letter is outlined.

Price against what you get

Each dot is one of 87 time tracking apps. Further left costs less; higher up scores better on features, ease of use and platforms. TimeTac is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of TimeTac you could make: time tracking, time off and reports. What surrounds it you could not. The 6 things listed below take a company, not a weekend.

It is one of the better ones too: its GPA of 2.6 is higher than 66 of the 98 other time tracking apps we grade. It costs $60 a year.

What you could make

- Time tracking, time off and reports: an app builder makes these well.

What you could not

- Clocking in from a phone, checked against where and when.

- Apps for macOS, Windows, iOS and Android that stay in step with each other.
- It is priced for each person, which means accounts and billing for a team.
- An API that other software can build on.
- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. TimeTac's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
