Where it stands

Its grades against its category, and whether to keep it or make your own

60/83

Other focus apps it is graded above

Tomighty's GPA of 3.0 is higher than 60 of the 83 other focus apps we grade, and level with 15.

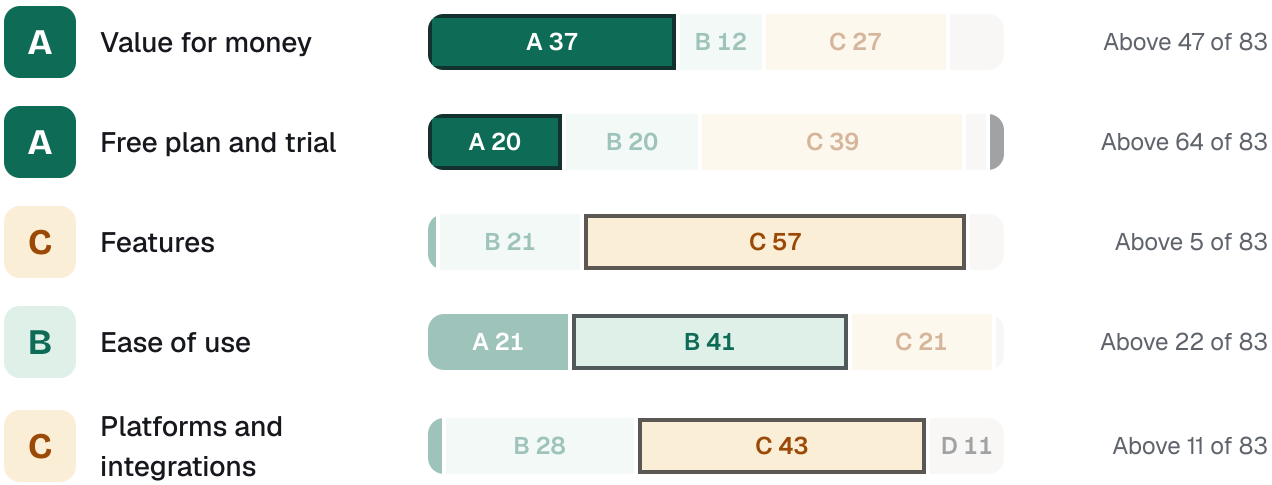

It stands best on free plan and trial (A, above 64 of 83) and worst on features (C, above 5).

Tomighty has no paid plan.

On features, ease of use and platforms it scores 2.3 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

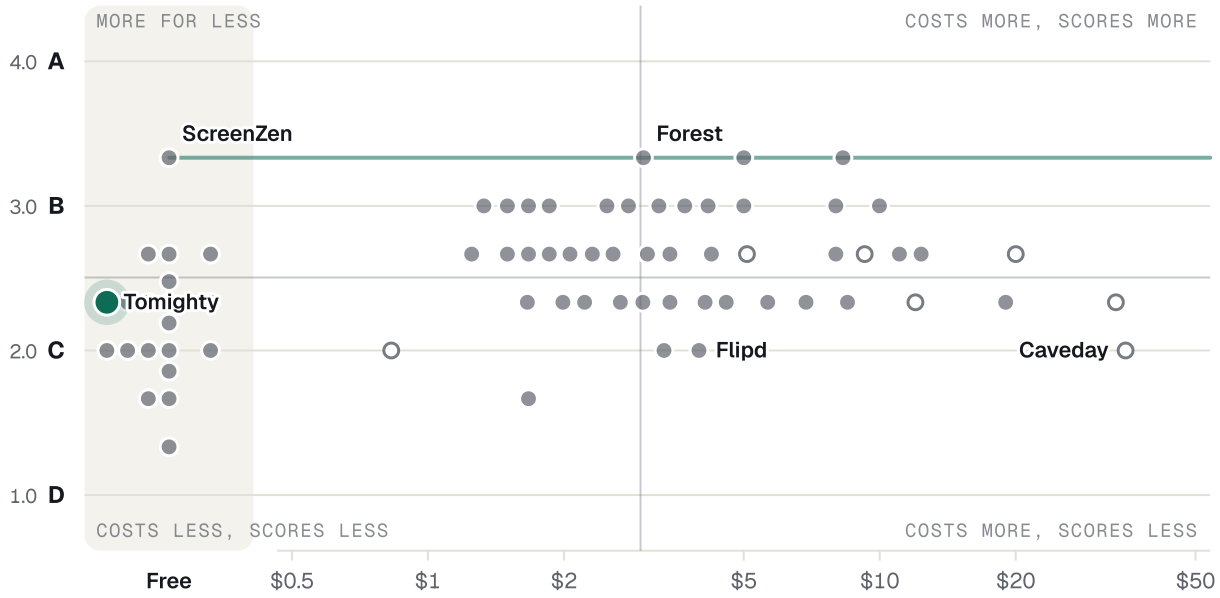

Each grade against the category

Every bar is all 84 focus apps we grade, cut by the letter each got. Tomighty's own letter is outlined.

Price against what you get

Each dot is one of 70 focus apps. Further left costs less; higher up scores better on features, ease of use and platforms. Tomighty is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Tomighty is free, so making your own would save you nothing.

It is one of the better ones too: its GPA of 3.0 is higher than 60 of the 83 other focus apps we grade.

What you could make

- Pomodoro timer: an app builder makes this well.

What you could not

- A real app for macOS and Windows. Something home-made would be a web page.

What this rests on. Tomighty's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
