Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Traversal's own pages, its app-store listings and our grades. Every fact in it is on Traversal's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 30 of the 178 other AI agents we grade

Traversal is an AI SRE for large engineering organizations. It triages alerts, works out the root cause of incidents, and builds a model of production systems to trace failures between services. It is used from a web app, Slack, Teams, MCP or an API, and is sold through demos with no published prices.

To get you started, here are **7 things to know about Traversal**, taken from its own pages and our grades.

> **No store rating on record, and it has to be connected to your observability and code tools before it finds anything.**
>
> From our grade for ease of use

1 **Best for finding the cause of production incidents**

Traversal is an AI that digs through logs, metrics and code to find why a production system broke, and it posts findings in Slack, Teams or through an API.

2 **It runs on Web**

Web.

3 Alert intelligence

Groups related alerts, merges duplicates, suppresses noise and can adjust thresholds that fire falsely, per the product examples on the site.

4 Incident root cause analysis

Traces a failure through dependent services, such as a slow identity call behind an exhausted gateway pool, to find where it started.

5 Production World Model

A graph of services, clusters, queues and operations that the product searches to understand how a failure spreads.

6 A 1.8 GPA, above 30 of 178

That is against the other AI agents we grade, on value, the free plan, features, ease of use and platforms.

7 Keep it

To replace Traversal you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

Traversal at a glance

PRICING Paid	FREE PLAN No
FREE TRIAL None stated	RUNS ON Web

OUR GRADE 1.8 GPA, weak	

The report card

Best for finding the cause of production incidents

Traversal is an AI that digs through logs, metrics and code to find why a production system broke, and it posts findings in Slack, Teams or through an API. The site pushes a demo, shows no price or trial, and frames the product around petabyte-scale companies, so smaller teams should look elsewhere.

TOOLGPA REPORT CARD

Traversal

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No prices or plans are published, and the pricing address returns not found. Nothing to compare to the category's $25 middle, so it stays at the ordinary grade.
Free plan and trial	F	No free plan and no trial on the site, which points to a demo instead.
Features	C	Alert triage, root cause analysis, a model of your production systems and code-level fixes. The supported-tools page returned an error, so how far it reaches is not shown.
Ease of use	C	No store rating on record, and it has to be connected to your observability and code tools before it finds anything.
Platforms and integrations	B	Web, with Slack, Teams, MCP and an API listed. The integrations page would not load, so the list of connected tools is not confirmed.

Grade point average Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Traversal is for

- ✓ Fits if you run a large production system and on-call is the bottleneck
- ✓ Works for platform teams that already live in Slack or Teams

Who it is not for

- ✗ Skip it if you need a price or a trial before a sales call, since neither is published
- ✗ Not for you if you run a small system, as the site frames the product around petabyte-scale data
- ✗ Not for you if you want a list of supported tools first, as the integrations page returned an error
- ✗ Watch out: it is web only, with no desktop or phone app

Good to know

Good for

- ✓ Platform and SRE teams running large, many-service systems
- ✓ Organizations that want alerts triaged before reaching on-call
- ✓ Teams that want to query production context from chat

Worth knowing

- ⓘ No prices, plans or free trial are published; the pricing page address returns not found and the site points to a demo.
- ⓘ The site frames the product for enterprise scale, at petabyte volumes of data.
- ⓘ The vendor says it never uses customer data to train models for others.
- ⓘ The integrations page address returned an error when read, so supported tools are not listed here.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Traversal's current pricing could not be confirmed from its own site.

> **No prices or plans are published, and the pricing address returns not found.**
>
> From our grade for value for money

We could not confirm Traversal’s current prices from its own site, so this guide lists no plans. traversal.com has them.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

AI SRE that triages alerts and finds root causes. Here is what it does, as its own site describes it, and what it covers: public API, AI features, workflow automation, AI agents.

> **Alert triage, root cause analysis, a model of your production systems and code-level fixes.**
>
> From our grade for features

Alert intelligence

Groups related alerts, merges duplicates, suppresses noise and can adjust thresholds that fire falsely, per the product examples on the site.

Incident root cause analysis

Traces a failure through dependent services, such as a slow identity call behind an exhausted gateway pool, to find where it started.

Production World Model

A graph of services, clusters, queues and operations that the product searches to understand how a failure spreads.

Self-healing and code resilience

The capability list includes automated remediation such as rolling back a bad release, and checks aimed at making code more resilient.

Slack, Teams, MCP and API

Besides the web app, Traversal is reachable from Slack, Microsoft Teams, MCP clients and an API, and offers autonomous Workers.

Where it runs

Web

What it works with

Slack

Microsoft Teams

Traversal is made by Traversal.

Where it stands

Its grades against its category, and whether to keep it or make your own

30/178

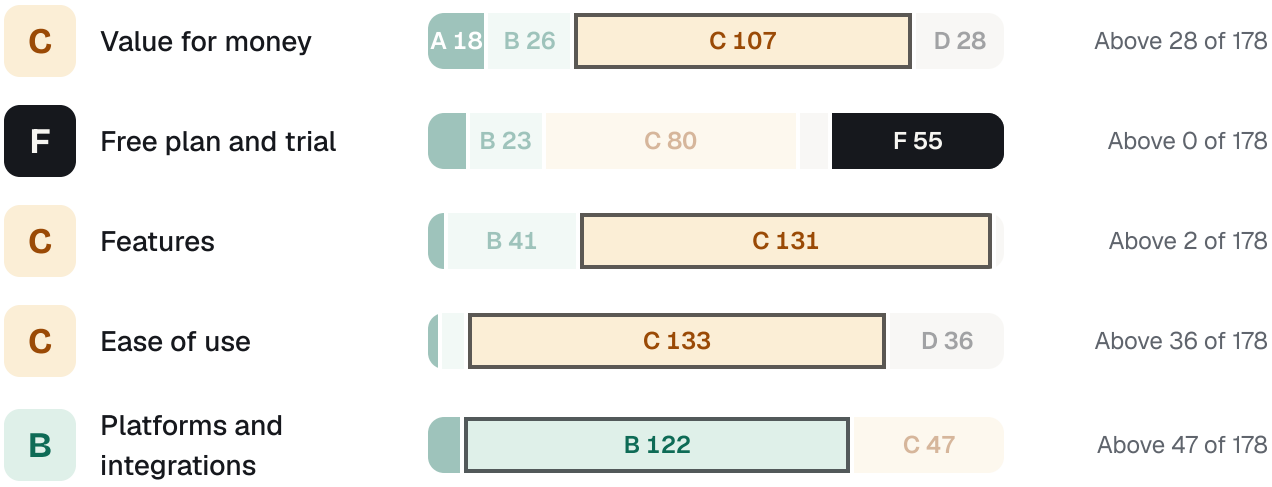

Other AI agents it is graded above

Traversal's GPA of 1.8 is higher than 30 of the 178 other AI agents we grade, and level with 33.

It stands best on platforms and integrations (B, above 47 of 178) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 179 AI agents we grade, cut by the letter each got. Traversal's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Traversal you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 115 of the 178 other AI agents grade higher.

What you could not

- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ Connections to other products, each kept working as those products change.

What this rests on. Traversal's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

PART 05 · ALTERNATIVES

The alternatives

The tools it is most often weighed against, side by side

Resolve AI, Cleric and Devin

The 3 tools Traversal is most often weighed against, with where each one differs from it.

1.8 GPA

Resolve AI

Paid

AI SRE agents for on-call, incidents and production tasks.

Traversal and Resolve AI compared in full

2.0 GPA

Cleric

Free trial · from $700/mo

AI agents that watch production changes and alerts.

Traversal and Cleric compared in full

2.4
GPA

Devin

Free plan · from $20/mo

Autonomous software engineer that runs in the cloud or locally.

- Devin has a free plan. Traversal does not.
- Only Devin lists macOS, Windows and Linux apps.
- Traversal also covers workflow automation.

Traversal and Devin compared in full

PART 06 · QUESTIONS

Quick answers

The questions people ask about it, each answered in a line or two

11

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Traversal free?

No. Traversal is a paid product.

What platforms does Traversal work on?

Traversal is available on Web.

Does Traversal have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. Traversal is listed for Web.

Does Traversal have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. Traversal is listed for Web.

Is Traversal open source?

Traversal is not described as open source on its own site, as read on Nov 13, 2026.

Does Traversal have an API?

Yes. Traversal offers a public API, according to its own site.

What does Traversal integrate with?

Traversal's listing names Slack and Microsoft Teams. A listing names up to eight integrations, so it may connect to more.

Who makes Traversal?

Traversal is made by a company of the same name.

What are the alternatives to Traversal?

The closest alternatives to Traversal in our directory are Resolve AI, Cleric and Devin.

How does Traversal compare with other AI agents?

Traversal's GPA of 1.8 is higher than 30 of the 178 other AI agents we grade, and level with 33.

Could I make my own version of Traversal?

To replace Traversal you would be making an AI agent, with the models and the safeguards behind it.

Where this guide comes from

The prices, plans, platforms and features were read from Traversal's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Traversal's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Traversal. Prices change, so check traversal.com before you buy.

About ToolGPA

Who made this guide, what else is on the site, and how to cite it

7,721

Tools graded, in 95 categories

ToolGPA grades software the way a school report grades a pupil: five subjects, a letter for each with the reason written beside it, and a GPA that averages them. Prices, plans and platforms are read from each maker's own pages and dated, so you always know how fresh a figure is.

Every grade, review and ranking on ToolGPA is our own judgement. No company can pay for a grade or change one. Every tool on the site has a guide like this one, free to download and pass on. It all lives at **toolgpa.com**.
