Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Tresorit Send is free, so making your own would save you nothing.

And it is not the kind of software a weekend replaces. It is one of the better ones too: its GPA of 3.0 is higher than 83 of the 91 other file storage and sync services we grade.

What you could not

- ✕ Storing and serving files for other people.
- ✕ End-to-end encryption done properly.

What this rests on. Tresorit Send's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
