PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

15/50

Other VPNs it is graded above

Trust.Zone's GPA of 2.2 is higher than 15 of the 50 other VPNs we grade, and level with 6.

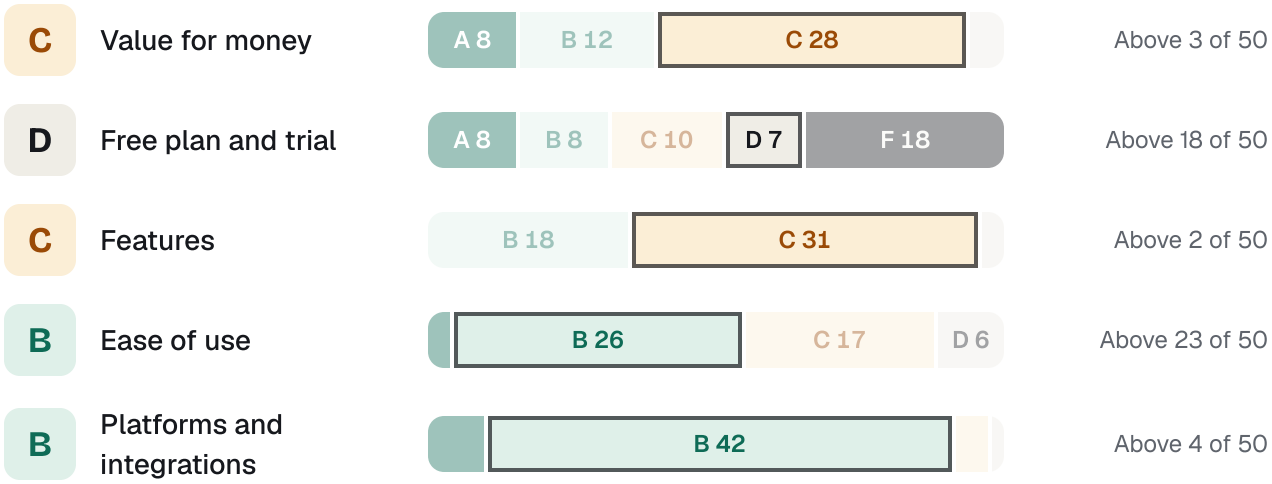

It stands best on ease of use (B, above 23 of 50) and worst on free plan and trial (D, above 18).

Its paid plans start at $9.99 a month, against a middle price of $4.99 for the category: 37 of the 40 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. 13 tools score higher and cost less.

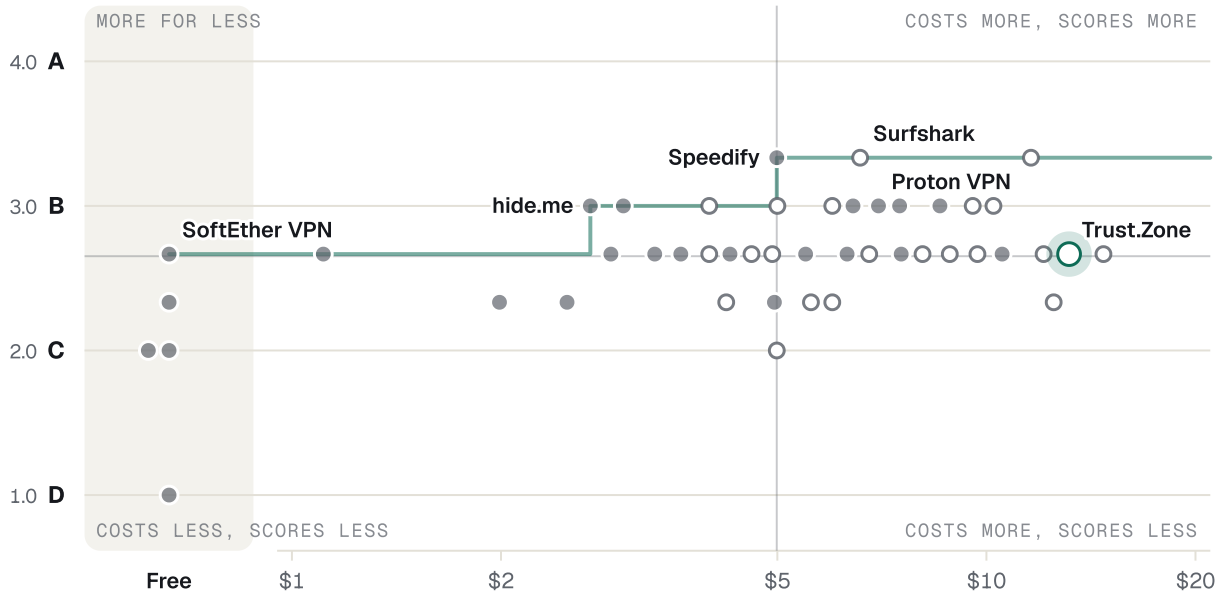

Each grade against the category

Every bar is all 51 VPNs we grade, cut by the letter each got. Trust.Zone's own letter is outlined.

Price against what you get

Each dot is one of 46 VPNs. Further left costs less; higher up scores better on features, ease of use and platforms. Trust.Zone is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Trust.Zone you would be making servers in dozens of countries, kept fast and private. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 29 of the 50 other VPNs grade higher. It costs $119.88 a year.

What you could not

- ✕ Servers in dozens of countries, kept fast and private.
- ✕ Storing and serving files for other people.

- ✕ Apps for macOS, Windows, Linux, iOS and Android that stay in step with each other.

What this rests on. Trust.Zone's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
