TTSReader's GPA of 2.6 is higher than 64 of the 72 other AI voice generators we grade, and level with 2.

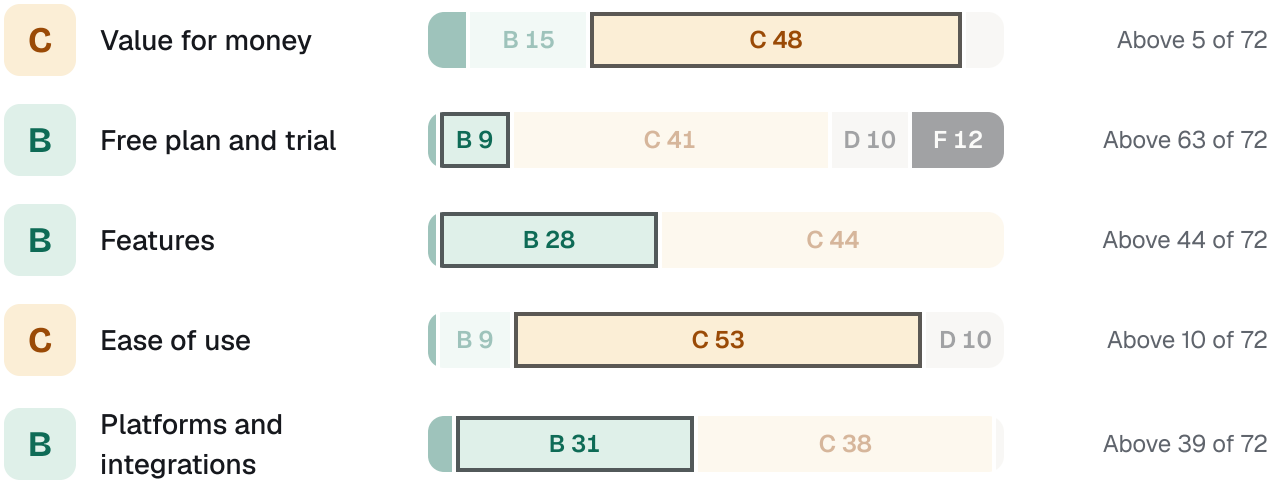

It stands best on free plan and trial (B, above 63 of 72) and worst on value for money (C, above 5).

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace TTSReader you would be making a voice model, which you can rent by the minute but not make. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.6 is higher than 64 of the 72 other AI voice generators we grade. It costs $99 a year.

What you could make

- Read later: an app builder makes this well.

What you could not

- A voice model, which you can rent by the minute but not make.

- A real app for iOS and Android. Something home-made would be a web page.
- It plugs into other products, Google, OpenAI and Microsoft among them, and has an API.
- Hooks into the device itself: CarPlay.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. TTSReader's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
