Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Your call

A writing app at its plainest is a page that saves what you type.

You could make the core of Undetectable AI for yourself: documents. What you would give up is listed below. Whether that is worth the price is your call. It costs $60 a year.

What you could make

- Documents: an app builder makes this well.

What you could not

- An API that other software can build on.

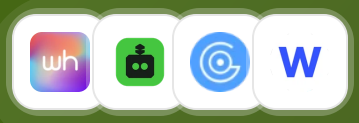

It runs in a browser, which is where something home-made would run too.

× AI features, unless you pay a model provider for each request yourself.

What this rests on. Undetectable AI's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
